SECURITIES AND EXCHANGE COMMISSION**

Washington, D.C. 20549

FORM 10-K

**ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(D) OF THE SECURITIES EXCHANGE
ACT OF 1934**

For the fiscal year ended - December 31, 2011

OR

**TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(D) OF THE SECURITIES
EXCHANGE ACT OF 1934**

COMMISSION FILE NUMBER 000-30392

ENVIRONMENTAL SOLUTIONS WORLDWIDE, INC.

(Exact name of Company as specified in its charter)

Florida
State or other jurisdiction of
incorporation or organization

13-4172059
(I.R.S. Employer
Identification No.)

335 Connie Crescent
Concord Ontario Canada L4K 5R2
(Address of principal executive offices, including postal code.)

(905) 695-4142
(Registrant's telephone number, including area code)

SECURITIES REGISTERED PURSUANT TO SECTION 12(B) OF THE EXCHANGE ACT:

NONE

SECURITIES REGISTERED PURSUANT TO SECTION 12(G) OF THE EXCHANGE ACT:

COMMON STOCK, \$0.001 PAR VALUE
(Title of class)

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. YES NO

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. YES NO

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. YES NO

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the Registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (ss. 229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer

Accelerated filer

Non-accelerated filer

Smaller reporting company

(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). YES NO

The aggregate market value of the voting and non-voting common equity held by non-affiliates of the registrant was approximately \$ 3,888,874 as of December 31, 2011 based upon the closing sale price reported for such date. Shares of Common Stock held by each officer and director and by each person who owns 5% or more of the outstanding Common Stock have been excluded in that such persons may be deemed to be affiliates of the registrant.

There were 219,450,447 shares of the registrant's Common Stock outstanding as of March 30, 2012.

PART I

This Form 10-K contains certain forward-looking statements regarding, among other things, the anticipated financial and operating results of the Company. Investors are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date hereof. The Company undertakes no obligation to publicly release any modifications or revisions to these forward-looking statements to reflect events or circumstances occurring after the date hereof or to reflect the occurrence of unanticipated events. In connection with the safe harbor provisions of the Private Securities Litigation Reform Act of 1995, the Company cautions investors that actual financial and operating results may differ materially from those projected in forward-looking statements made by, or on behalf of, the Company. Such forward-looking statements involve known and unknown risks, uncertainties, and other factors that may cause the actual results, performance, or achievements of the Company to be materially different from any future results, performance, or achievements expressed or implied by such forward-looking statements.

The words "anticipate," "believe," "estimate," "expect," "intend," "will," "should," "may," "plan," and similar expressions, as they relate to Environmental Solutions Worldwide Inc., ("ESW" or the "Company") or ESW's management, are intended to identify forward-looking statements. Such statements reflect ESW's current views of the Company with respect to future events and are subject to certain risks, uncertainties, and assumptions. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described herein as anticipated, believed, estimated, expected, intended, or planned. ESW assumes no obligations and does not intend to update these forward-looking statements.

Readers are also urged to carefully review and consider the various disclosures made by ESW which attempts to advise interested parties of the factors that affect ESW's business, including without limitation the disclosures made under the caption "Management's Discussion and Analysis" and under the caption "Risk Factors" included herein.

ITEM 1. BUSINESS

GENERAL

Environmental Solutions Worldwide, Inc. ("ESW", "ESW Group" or the "Company") is a publicly traded Florida corporation formed in 1987 in the State of Florida. ESW is currently focused on the medium duty and heavy duty diesel engine market for on-road and off-road vehicles as well as the utility engine, mining, marine, locomotive and military industries. ESW offers engine and after treatment emissions verification testing and certification services. ESW's common stock is currently quoted on the OTCQB, which is part of the OTC Market Group's quotation system under the symbol (ESWW). ESW's common stock is also quoted on the Frankfurt Stock Exchange (FWB), under the symbol (EOW).

The "ESW Group" trade name is being used to identify the Company's potential participation in business opportunities outside its traditional focus of engine emissions controls.

ESW operates through four wholly-owned subsidiaries:

- ESW America Inc. ("ESWA" or "ESW America"), a Delaware corporation, is ESW's emissions testing services division. ESW America houses ESW's engine emissions testing laboratory and certification services known under the trade name "Air Testing Services(TM)" ("ATS") capable of performing engine emissions verification test protocols for the Environmental Protection Agency (EPA), California Air Resources Board ("CARB") and the Mine Safety and Health Administration ("MSHA"). ESW America's capabilities include certification and verification of internal combustion and compression engines ranging from 5 to 600 horsepower as well as vehicle chassis (up to 1000 horsepower) and motorcycle / ATV testing capabilities. ESW America is a fully compliant ISO 9001:2008 certified laboratory testing facility.
- Technology Fabricators Inc. ("TFI") a Delaware corporation, a new wholly-owned subsidiary of ESW, serves as a fabrication, substrate and ThermoCat system manufacturing facility. TFI started active operations in October 2011.
- ESW Canada Inc. ("ESWC" or "ESW Canada"), an Ontario corporation, houses ESW Group's Canadian operations including research and development for ESW's catalytic product lines.
- ESW Technologies Inc. ("ESWT"), a Delaware corporation holds ESW's intellectual property, and/or rights to the same.

ESW is a developer of diesel emissions technology solutions, advancing emissions reduction technology by commercializing leading edge proprietary catalytic emission conversion, control and support products and technologies. ESW's key technologies and products are detailed below and are believed to be responsive to stringent global emissions regulations being implemented. Among the key products are ESW's ThermaCat and XtrmCat diesel emissions control technologies. ESW also manufactures military technologies including the StlthCat and Scat-IR-Shield exhaust shielding technology employed on U.S. Marine Light Armored Vehicles.

ESW is currently focused on the retrofit opportunities available in North America. ESW has successfully expanded coverage of the North American market by growing its distributor base. ESW has 39 distributors as of December 31, 2011. ESW's current distribution network allows the Company to position its technologies in key markets spanning from California to New York. ESW continues to focus on growing its "share of wallet" within its existing distributor base, as well as expanding its distributor network across North America, and will opportunistically expand into markets outside of North America if deemed to be financially accretive in the short term to the Company.

INDUSTRY TRENDS

Emissions regulations for mobile diesel engines in the major markets of North America, Europe and Asia have continued to tighten and are now 40% to 90% lower than previous regulations. Regulations in effect in the United States of America, Europe and in Asia are expected to reduce the emissions level for new mobile diesel engines from 85% to 99% of the levels mandated in the mid-1980s. While much of the regulatory pressure and resulting action from engine manufacturers has focused on reducing emissions from new engines, there is increasing focus and concern over pollution from existing diesel engines, many of which have 20- to 30-year life cycles. The EPA has estimated that in the U.S. alone there are approximately 11 million diesel powered vehicles which need to be retrofitted over the next ten years. ESW's future performance and growth at the present time is directly related to this trend within the global market.

In the U.S., the EPA, CARB and MSHA continue to place great emphasis on compliance with emission reduction standards. The identification of diesel particulate matter ("PM") as a toxic air contaminant in 1998 led CARB to adopt the Risk Reduction Plan to Reduce Particulate Matter Emissions from Diesel-fueled Engines and Vehicles (Plan) in September 2000.

The cost of meeting emission regulations, retrofit and replacement projects in the U.S. is estimated to be approximately \$7.0 billion dollars as published in the National Clean Diesel Campaign Fact Sheet (Source EPA's National Clean Diesel Campaign Fact Sheet). CARB estimates retrofits and engine replacements for approximately 420,000 trucks and buses registered in California as well as those transiting California roadways from other states and countries. As of today, sixteen U.S. states have committed to voluntarily adopt California's stricter regulations to control greenhouse gas emissions.

Over the last five years, the EPA has brought forward a number of very successful innovative programs all designed to reduce emissions from diesel fleets. In conjunction with state and local governments, public interest groups and industry partners, the EPA has established a goal of reducing emissions from the over 11 million diesel engines in the existing fleets by 2014. The EPA offers numerous programs in order to provide technical and financial assistance to stakeholders interested in reducing their fleets' emissions effectively and efficiently.

The Diesel Emissions Reduction Program (known as "DERA") was created under the Energy Policy Act of 2005. This gave the EPA new grant and loan authority for promoting diesel emission reductions and authorized appropriations to the EPA of up to \$200 million per year for fiscal years 2007 through 2011. In January 2011, the U.S. government successfully reauthorized the DERA for five more years. This will continue the legislation's important environmental and economic benefits for the US. Passage of the DERA reauthorization will play a major role in the U.S.'s effort to expand clean air initiatives. In its first five years, DERA has proven to be one of the nation's most successful clean air programs. In addition, DERA has provided an average of \$20 worth of environmental and health benefits for every \$1 spent.

The EPA and CARB programs are accelerating the activities toward creation of active markets for diesel emissions reduction technologies and products in the U.S. These markets include retrofit applications in on- and off-road segments, as well as for stationary power generation and marine and rail applications. Thus, the market for diesel emissions reduction technologies and products is still emerging. We expect growing demand for diesel emissions reduction technologies and products for the diesel engine market, owners of existing fleets of diesel-powered vehicles, and expanding requirements from the off-road, marine and railroad sectors. It is an essential requirement of the U.S. retrofit market that emissions control products and systems are verified under the EPA and/or CARB protocols to qualify for credits within the EPA and/or CARB programs. Funding for these emissions control products and systems is generally limited to those products and technologies that have already been verified. As of the date of this report, ESW has CARB Level III + product verifications that allows ESW to sell to customers with access to governmental funding for retrofit programs.

BUSINESS STRATEGY

ESW's focus is to be a leading player in the environmental emissions market by providing leading-edge catalyst technology as well as best-in-class engine, motorcycle / ATV and vehicle emissions testing services. The Company's strategy is centered on identifying and deploying resources against its "sweet-spot" products, where ESW has identified its core competencies and differentiation in the marketplace. ESW's core geography focus is North America, and will opportunistically explore business development opportunities in other markets if accretive to the Company in the short term. By focusing financial, human and intellectual capital on ESW's core competencies and markets, the Company is targeting profitable growth in the short term and value creation for its shareholders over the long term.

ESW is executing on the following items to succeed in its business strategy:

- Increase the revenue and margin opportunities from its catalyst product line by identifying and focusing resources on its "sweet-spots".
- Expand its North American distribution network and increase its "share of wallet" with the funding agencies.
- Seek complimentary partnerships that provide growth opportunities for its core businesses.
- Invest in new product and process technologies to broaden its array of products available to distributors and end-users.
- Act as a trusted emissions solution provider to regulators and clients
- Capitalize on ESW America's unique geographical presence and performing engine emissions verification test protocols to provide value-added services in the testing verification /certification for ESW as well as third party products.
- Implement a continuous improvement and performance based culture, focused on identifying product design improvements, streamlining processes and optimizing manufacturing capabilities.
- Focus on delivering exceptional product quality and customer service.

PRINCIPAL PRODUCTS AND THEIR MARKETS:

ESW's woven stainless steel wire mesh catalytic converter substrate forms the basis of ESW's product lines. This key component can be produced in almost any size and shape. The wire mesh substrate creates a turbulent environment, which increases catalytic activity, and when manufactured for diesel applications, is designed to serve as a partial filter of PM, an important factor in diesel emission control. ESW's manufacturing process and chemical wash coat formula is proprietary.

THERMACAT Active Diesel Particulate Filter is an advanced Level III+ technology that provides the flexibility and pre-retrofit usability that makes the ThermaCat a seamless retrofit device for its end users. Other competing retrofit technologies either limit the vehicles' use or required driver interaction and limit the vehicles' availability during regular or multi-shift operations. These competing solutions increase costs in manpower and vehicle management that add to the retrofit devices initial purchase price. The ThermaCat is designed to address these issues with the introduction of an exothermic based (flameless technology) that utilizes the vehicle's existing fuel supply to supplement and raise the exhaust heat so that the Diesel Particulate Filter can regenerate and continue normal operations. The system operates in the background, transparent to the vehicle operator and does not impact the vehicle's normal operations. ESW took comprehensive steps to ensure the safe operation of the ThermaCat that included meeting Federal Motor Vehicle Safety Standards 301S for fuel system integrity for School Buses. This included a school bus crash test that tested the integrity of the fuel system incorporated in the ThermaCat system. ESW also completed a 1,000 hour vibration test that simulated a typical 100,000 mile life cycle on rural roads. ESW's ThermaCat Active Level III+ catalyst system has obtained CARB verification for a variety of on- and off-road engine applications.

XTRMCAT is an innovative proprietary diesel oxidation catalyst designed for Electro Motive Diesel (EMD) turbocharged and roots blown engine systems. The durability and flexible characteristics enable the XtrmCat to perform within the extreme operating conditions of locomotive and marine two stroke diesel engine applications. The XtrmCat for marine applications has been certified with the U.S. EPA. XtrmCat provides reductions of PM, hydro carbons ("HC"), and carbon monoxide ("CO"), which may allow EMD engines to be rebuilt to the stringent EPA standards.

STLTHCAT incorporates the Company's proprietary catalyzed wire mesh substrate integrated into an advanced sound abatement system. The units were specifically engineered to decrease military vehicles and equipment's overall tactical signature by reducing the diesel engines black smoke (soot), eye and throat irritating noxious diesel engine emissions, temperature and sound. The StlthCat is currently employed on U.S. Military vehicles.

AIR TESTING SERVICES(TM) ("ATS") is ESW America's Emissions and Durability Testing Facility. ATS performs engine emissions verification test protocols according to established EPA, CARB and MSHA standards, while providing vehicle and engine manufacturers with a wide range engine and chassis dynamometer-based durability testing. ATS has capabilities for providing testing protocols with a broad range of fuels, including diesel, gasoline, and alternative fuels. ATS Engine Dynamometer-based Durability Testing protocols can also help develop custom accelerated aging test schedules for emissions control technologies, or support customer-designed tests for component stress. A full range of services is offered including emissions testing, compilation and submission of applications, final issuance of the certifications, production line, and audit testing. ATS offers customers complete testing and validation services that includes complete project management and verification management.

ESW's objective is the development and commercialization of technologies to reduce the overall emissions from diesel applications. Central to the emissions reduction market is the certification, verification and registration process established by regulatory bodies in the United States. The industry is substantially driven by higher emissions reductions targets set by Federal and state-level regulations, which led ESW to focus on the development of the ThermaCat Level III Active Diesel Particulate Filter for on/off-road, medium and heavy duty diesel engines and the XtrmCat Diesel Oxidation Catalyst for marine and rail applications. ESW achieved the ThermaCat Level III Active Diesel Particulate Filter development through verifications from CARB with product development and testing conducted at ESW's Air Testing Services division.

ESW's target markets include the following areas regulated in North America by EPA, CARB, and other state and local standards:

1. On-road vehicle sector generally comprised of on-road trucks and school buses employed with private and municipal fleets.
2. Off-road engine / vehicle sector defined as construction equipment, tractors, power generators, irrigation pumps, stationary power and others.
3. Marine sector comprising of solutions for workboat applications such as tows, ferries, dredges, tugs, and yachts, to generator sets on blue water vessels.
4. Rail sector comprising of solutions for line haul and switching, as well as passenger rail locomotive and head end power systems.
5. Mining industry, including all equipment and vehicles operating in and around a mine.
6. Military sector, including catalyst products and support technologies.
7. Engine and vehicle emissions testing services.

DISTRIBUTION

ESW distributes its catalyst technologies through:

1. A comprehensive network of established independent distributors that actively service the emissions and retrofit market;
2. Strategic partnerships that provide a unique competitive advantage into specific markets; and
3. Direct sales leveraging ESW's sales personnel, local trade magazines and trade shows to complement distribution of its products into key markets.

Within the ATS business, ESW is currently focused on a direct sales program targeting Original Equipment Manufacturers ("OEM") and other companies demanding engine and vehicle emissions testing services.

COMPETITION

ESW sells into a competitive market focused on providing retrofit solutions for diesel powered engines, with the number of competitors varying by market segment. ESW competes primarily on the basis of technology, performance, price, quality, reliability, distribution, customer service, and support. ESW's competitors include companies that have deeper financial, technological, manufacturing and personnel resources. Other than other Level III+, marine and rail products that are available in the marketplace, ESW faces competition from substitute products that offer lower emissions reduction benefits or technology but are also more competitively priced and are deemed by the ultimate users as acceptable alternatives to ESW's products and services.

ESW's direct competitors in the North American on-road, off-road, and mining markets include Engine Control Systems, Donaldson, DCL, Huss and Cleaire.

ESW's marine and rail products compete in the engine rebuild sector with low oil consumption kits provided by manufacturers such as EMD and other DOC technology providers such as Miratech.

ESW America faces competition from established emissions and durability testing facilities such as South West Research Institute and TRC and smaller facilities such as Olson-Eco Logic and California Environmental Engineering.

ESW believes it can address the competitive landscape within the catalyst emissions market by providing:

- Unique Substrate Technology - ESW's proprietary wire mesh substrate is very flexible in design, size, performance and overall product configuration. The high mechanical and thermally durable wire mesh technology is suitable for Diesel Oxidation Catalyst applications. The technology is cost effective and can be applied to almost any application. Traditional ceramic or metal based flow-through type technologies are typically less durable and efficient, larger in size, and are only available in pre-configured sizes and designs.
- Leading edge products that are designed to have operational and technical advantages over the competition and are priced aggressively in the market. The ThermaCat is an example of a product that offers technical and operational advantages over competing products.
- Solution driven services - ESW does not only offer an emission control technology, but also provides a variety of tailored engineering solutions, extensive on-site and remote installation training programs, as well as project management services.
- Air Testing Services(TM) - ESW America provides the Company with the unique ability to develop and verify new catalyst technologies developed by the Company. ESWA allows the Company to quickly react to changing regulatory requirements, as well as offer the trusted emissions results to ESW and external clients that comply with strict CARB and EPA testing standards.

ESW America differentiates itself from the competition in the air and durability testing market by continually updating its testing facilities and equipment in response to changing regulatory mandates and vehicle technology. ATS also provides a broad set of capabilities for advanced research, engineering and testing for various aftermarket products and new technologies. In addition, ESW America is one of a small number of testing facilities located on the east coast of the United States which is capable of running tests for CARB and EPA certification and verification programs. ESW America's location provides a logistical advantage for clients focused on the east coast of the United States.

RAW MATERIALS

The primary raw materials used to manufacture ESW's catalyst products include, but are not limited to stainless steel, stainless steel wire, stainless steel tubing, precious metals such as platinum and palladium, particulate filters and other electronic and mechanical components.

Overall, particulate filters and precious metal coated components accounted for the most significant component of ESW's raw materials costs in 2011. ESW is exposed to fluctuating raw material prices, and is particularly exposed to price fluctuations for certain precious metals such as platinum and palladium. ESW seeks to offset raw material price fluctuations on its result of operations by passing through certain price increases, negotiating volume discounts from raw material suppliers; purchasing high-value inventory components based on committed orders; scrapping and selling steel cut-offs at the highest possible price; and implementing continuous cost reduction programs. ESW does not currently pursue a financial hedging strategy for any of its raw materials. ESW's results of operations could be adversely affected if steel and precious metal prices increase substantially unless the Company is successful in passing along these price increases to customers or otherwise offset these in material and/or operating costs.

Other raw materials or components purchased by ESW include electronic components, tools, fasteners, other steel and components for the Level III plus ThermaCat product, as well as a variety of custom alloy materials and chemicals, all of which are available from numerous suppliers. For Air Testing Services, key raw materials include fuels, rollers and other consumables.

CUSTOMERS

ESW's customers consist of established distributors focused in the emissions retrofit space and OEM engine manufacturers for the Air Testing business. ESW recorded sales from 44 customers in 2011 as compared to 30 customers in fiscal year 2010. The top three customers accounted for 41.2%, 15.7% and 10.6% of revenues in 2011. In 2010, top three customers accounted for 21%, 19%, and 13% of ESW's revenue.

ESW will continue to establish long-term relationships with new customers and foster greater opportunities with existing distributors. The loss of, or major reduction in business from, one or more of the major distributors could have a material adverse effect on ESW's liquidity, financial position, or results of operations.

PATENT AND TRADEMARKS

ESW develops new technologies or furthers the development of existing technologies through internal research and development. Where necessary, ESW will seek access to third-party patents and/or licenses to develop new products and services aimed at the emissions and air testing markets.

Through its wholly-owned subsidiary ESW Technologies Inc., ESW holds both Canadian and U.S. patents covering the catalytic converter and related technology. ESW will pursue its legal rights to the fullest extent of the law to ensure non-infringement of its established patents. However, there can be no assurance that these patents or existing or future trade secret protections that ESW pursues, will survive legal challenge, or provide meaningful levels of protection.

Additionally, ESW possesses certain registered, pending and common law trademarks. ESW considers the goodwill associated with the trademarks to be an important part of developing product identity.

PRODUCT CERTIFICATION

ESW's customers have acquired, where necessary, engine certifications and catalyst verifications using ESW products from such authorities as the EPA, CARB, MSHA and ETV Canada for gasoline and diesel products.

CARB has established three primary technology levels for diesel catalyst verifications.

LEVEL I:	PM reduction greater than 25%
LEVEL II:	PM reduction greater than 50%
LEVEL III:	PM reduction greater than 85%

Effective January 1, 2009, the EPA has established a NO₂ limit for diesel retrofit technologies verified under the EPA's National Clean Diesel Campaign ("NCDC") Retrofit Technology Verification Program. The EPA implemented a NO₂ increase limit that is harmonized with the requirements for retrofit technologies by CARB. This requirement limits the increase in NO₂ emissions associated with retrofit technologies to levels no greater than 20% above baseline engine levels.

ESW has developed an existing Level I & II diesel retrofit replacement device to meet the aforementioned new regulations, however at the present time has decided not to pursue the verification of these technologies in North America. ESW will opportunistically explore markets outside of North America for applicability of these technologies.

In 2009 ESW's ThermaCat Active Level III Plus catalyst system was verified by CARB for a variety of on- and off-road engine applications (PM reduction greater than 85%). The ThermaCat filter system is a combined technology comprised of a chemically coated wire mesh substrate and Diesel Particulate Filter (DPF) combined with an electronically controlled external fuel injection component. The ThermaCat regeneration process is an electronically controlled exothermic reaction and occurs automatically during normal vehicle operation, transparent to the operator.

In August 2011, ESW's XtrmCat Kit was certified for 2 stroke, Category 2, marine engines by the EPA. The issuance of the remanufacturing certificate' is a significant milestone for the Company as it validates the DOC technology for the marine market sector. The Certifications are applicable to Electro-Motive Diesel ("EMD") 710 and 645 engines. The XtrmCat can achieve Tier 0 and Tier I compliance as per 40 CFR 1042 when retrofitted to EMD 710 and 645 engines.

ESW's products are generally sold according to appropriate government application regulations; however, ESW does not necessarily need government approval to sell its products into unregulated markets.

WARRANTY MATTERS

ESW may face an inherent business risk of exposure to product liability and warranty claims in the event that its products fail to perform as expected. ESW cannot assure that it will not experience any material warranty or product liability losses in the future or that it will not incur significant costs to defend such claims. In addition, if any of the products are or are alleged to be defective; ESW may be required to participate in a recall involving such products. Each of ESW's customers has its own policy regarding product recalls and other product liability actions relating to its suppliers. CARB verified products require ESW to provide specific warranties and warranty reporting on products depending upon engine applications. A successful claim brought against ESW or a requirement to participate in a product recall may have a material adverse effect on ESW's business.

ESW's ThermaCat Active Level III Plus on-road catalyst system which has been verified as a Level III technology is typically required to meet CARB limited warranty standard of 5 years or 100,000 miles or 5 years or 150,000 miles, or 2 years unlimited miles depending on engine application.

ESW's ThermaCat Active Level III Plus off-road catalyst system which has been verified as a Level III technology is typically required to meet CARB limited warranty standard of 5 years or 4,200 hours.

To date ESW has not had any major product warranty recalls.

MANUFACTURING AND TESTING SERVICES

In 2011, ESW established a wholly-owned subsidiary named Technology Fabricators Inc. TFI houses ESW's manufacturing operations which are now co-located at 200 Progress Drive, Montgomeryville, PA, 18936 along with ESW's ATS operations. TFI has manufactured ESW's products since October 1, 2011. This facility has the capability to design, develop and manufacture complete catalytic converter systems based on specific customer requirements. The 40,200 square foot facility also houses the ATS' emissions testing laboratory that is recognized as capable of performing engine emissions verification test protocols. ATS incorporates eight dedicated engine and vehicle dynamometer test cells.

ATS's capabilities include:

- Engine dynamometer capacity from 5hp to 600hp, including both transient and steady state testing.
- Chassis dynamometer testing, including light duty (up to 10,000lbs) and medium/heavy duty (up to 50,000lbs).
- Motorcycle / ATV dynamometer
- Full flow Constant Volume Sampling emission measurement system capability across all test cells.
- All emission systems have dual Nitrogen Oxide Chemiluminescence detector and non-methane hydrocarbon measurement capability.
- Engine dynamometer test cells comply with 40 Code of Federal Regulations (CFR) Part 60, 86, 89, 90, 92, 1042, 1048 and CARB testing protocols.
- Test Cells are currently in transition to 40 CFR Part 1065.

ESW is making additional investments in the air testing business to set up a high horsepower (up to 1,000 HP) engine dynamometer as well as 1065 standard capable test bench. ESW has also made significant capital investment in its manufacturing capabilities in Montgomeryville, PA.

ESW's manufacturing and testing facilities are subject to continuous investment to ensure best-in-class capabilities to meet the challenges of a dynamic marketplace, as well as the need for greater efficiencies, to improve quality systems, and to meet the demands placed by changing regulations.

ESW is in the process of closing its manufacturing facility in Concord, Ontario, Canada.

RESEARCH AND DEVELOPMENT

In 2011, research and development costs amounted to \$692,977 (2010 - \$783,944). ESW aggressively pursues testing as well as research and development for new products to serve potential customers and meet new regulations that are regularly being imposed on the industry. Through proprietary methods for improving ESW's catalyzed substrates, there are prospects for the development of innovative applications outside of ESW's current verified product line. ESW continues to spend further resources on new research and development projects.

ENVIRONMENTAL MATTERS

ESW is presently engaged in a business that does not generate significant hazardous waste. ESW's facilities may have tanks for storage of diesel fuel and other petroleum products that are subject to laws regulating such storage tanks. Federal, state, and local provisions relating to the protection of the environment have not had, and are not expected to have, a material adverse effect on ESW's liquidity, financial position, and results of operations. However, like all manufacturers, if a release of hazardous substances occurs, ESW may be held liable for the contamination, and the amount of such liability could be material. While ESW devotes resources designed to maintaining compliance with these requirements, there can be no assurance that ESW operates at all times in complete compliance with all such requirements.

EMPLOYEES

ESW and its subsidiaries presently employ 38 full-time employees. ESW does not have any collective bargaining agreements and considers its relationship with its employees to be good.

ITEM 1A. RISK FACTORS

CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

This report includes statements of our expectations, intentions, plans and beliefs that constitute "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934 and are intended to come within the safe harbour protection provided by those sections. These statements, which involve risks and uncertainties, relate to matters such as sales growth, price demand for our products and services as well as competition, and our ability to obtain additional financing should same be necessary to sustain our operations. We have used words such as "may," "will," "should," "expects," "intends," "plans," "anticipates," "believes," "thinks," "estimates," "seeks," "predicts," "could," "projects," "potential" and other similar terms and phrases, including references to assumptions, in this report to identify forward-looking statements. These forward-looking statements are made based on expectations and beliefs concerning future events affecting us and are subject to uncertainties, risks and factors relating our operations and business environments, all of which are difficult to predict and many of which are beyond our control, that could cause our actual results to differ materially from those matters expressed or implied by these forward-looking statements. These risks and other factors include those listed in this Item 1A. "Risk Factors" and elsewhere in this report.

When considering these forward-looking statements, you should keep in mind the cautionary statements in this report and the documents incorporated by reference. New risks and uncertainties arise from time to time, and we cannot predict those events or how they may affect us. There may also be other factors that we cannot anticipate or that are not described in this report that could cause results to differ materially from our expectations. Forward-looking statements speak only as of the date they are made and we assume no obligation to update them after the date of this report as a result of new information, future events or subsequent developments, except as required by the federal securities law.

IF CASH FLOWS FROM OPERATIONS ARE NOT SUFFICIENT AND IF ESW IS UNABLE TO OBTAIN ADDITIONAL FUNDING THEN, ESW MAY HAVE TO SIGNIFICANTLY CURTAIL THE SCOPE OF ITS OPERATIONS AND ALTER ITS BUSINESS MODEL.

ESW's sales are unpredictable; the market that ESW operates in is highly competitive and is dependent on federal and state-level public budgets for funding of retrofit programs. In the event that profitable operations are not achieved, ESW's present financial resources and track record for raising capital should allow it to continue operations in the short term. If additional financing is required and not available when required, or is not available on acceptable terms, ESW may be unable to continue its operations at current levels or satisfy the requirements necessary to fulfill its order book. ESW continues to implement corrective actions to minimize its operating losses. ESW would consider strategic opportunities, including investments in ESW, or other acceptable transactions, to sustain its operations. There can be no assurances that additional capital will be available to ESW on acceptable terms, or at all.

ESW HAS INCURRED LOSSES IN THE PAST AND EXPECTS TO INCUR LOSSES IN THE FUTURE SHOULD ITS BUSINESS PLAN NOT BE EFFECTIVE.

ESW has incurred losses in each year since its inception. ESW's net loss for the fiscal year ended December 31, 2011 was \$9,127,088 and accumulated deficit as of December 31, 2011 was \$ 52,753,926. As ESW's sales and revenue continue to be unpredictable, and should ESW's current business plan not be effective, ESW expects to experience additional periods with operating losses.

THE PRICE OF ESW'S SHARES MAY BE ADVERSELY AFFECTED BY THE PUBLIC SALE OF A SIGNIFICANT NUMBER OF THE SHARES ELIGIBLE FOR FUTURE SALE.

Sales of a large amount of ESW's common stock in the public market could materially adversely affect the market price of ESW's common stock. Such sales may also inhibit ESW's ability to obtain future equity or equity-related financing on acceptable terms. The issuance of additional shares could have a significant adverse effect on the trading price of ESW's common stock.

RISKS RELATED TO THE MARKET FOR ESW'S COMMON STOCK

THE PRICE OF ESW'S COMMON STOCK HAS BEEN HIGHLY VOLATILE.

ESW's common stock has traded as low as \$0.05 per share and as high as \$0.29 per share in the twelve (12) months ended December 31, 2011. Some of the factors leading to the volatility include:

- price and volume fluctuation in the stock market at large and market conditions which are not necessarily related to ESW operating performance;
- limited trading volumes;
- fluctuation in ESW's operating results;
- concerns about ESW's ability to finance continuing operations;
- financing arrangements which may require the issuance of a significant number of shares in relation to the number shares of ESW's common stock currently outstanding;
- announcements of agreements, technological innovations, certification / verifications or new products which ESW or its competitors make;
- costs and availability of precious metals used in the production of ESW's products; and
- Fluctuations in market demand and supply of ESW products.

ESW'S COMMON STOCK IS CURRENTLY TRADED ON THE OTC MARKETS - OTCQB TIER AND THE FRANKFURT EXCHANGE AND AN INVESTOR'S ABILITY TO TRADE ESW'S COMMON STOCK MAY BE LIMITED BY TRADING VOLUME.

The trading volume in ESW's common stock has been relatively limited. ESW's common stock may not generate a consistently active trading market on the OTC Markets or the Frankfurt Stock Exchange. The average daily trading volume of ESW common stock for the year ended December 31, 2011 was approximately 18,349 shares. ESW's common stock started trading on the Frankfurt Exchange in 2007, ESW has a limited trading history and there can be no assurances that there will be increased liquidity in ESW stock.

ESW's stock was previously quoted on the OTCBB under the symbol (ESWW.OB). On February 23, 2011, the Company's common stock was removed from the OTCBB automated quotation system. The Company's common stock along with the securities of over 600 other issuers were deleted from the OTCBB due to the quotation inactivity by the Market Makers of the respective issuers affected under Exchange Act Rule 15c2-11.

THE COMPANY MAY ISSUE MORE SHARES IN CONNECTION WITH A FINANCING, MERGER OR ACQUISITION, WHICH WOULD RESULT IN SUBSTANTIAL DILUTION.

ESW's Certificate of Incorporation authorizes the issuance of a maximum of 250,000,000 shares of common stock. Any further financing, merger or acquisition effected by ESW may result in the issuance of additional securities without stockholder approval and may result in substantial dilution in the percentage of ESW's common stock held by ESW's then existing stockholders. Moreover, the common stock issued in any such financing, merger or acquisition transaction may be valued on an arbitrary or non-arm's-length basis by ESW management, resulting in an additional reduction in the percentage of common stock held by ESW's then existing stockholders. ESW's Board of Directors has the power to issue any or all of such authorized but unissued shares without stockholder approval. To the extent that additional shares of common stock are issued in connection with a financing, business combination or otherwise, dilution to the interests of ESW's stockholders will occur and the rights of the holders of common stock might be materially adversely affected.

SEVERAL OF ESW'S SHAREHOLDERS OWN A SIGNIFICANT AMOUNT OF ESW'S OUTSTANDING SHARES AND COLLECTIVELY MAY BE ABLE TO DECIDE CERTAIN CORPORATE ACTION.

A group of ESW's shareholders collectively own 154,635,883 shares which is equivalent to 70.47% of the outstanding shares of the Company based upon the Company's certified list of shareholders as of March 30, 2012 on an undiluted basis. As such, all or some of these shareholders may be able to control aspects of ESW's business operations including the election of board members, the acquisition or disposition of assets, the Company's business plans / strategy and the future issuance of shares. For additional information about beneficial ownership please refer to ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS, MANAGEMENT AND RELATED STOCKHOLDER MATTERS.

ESW DOES NOT EXPECT TO PAY DIVIDENDS ON COMMON STOCK AND INVESTORS WILL ONLY BE ABLE TO RECEIVE CASH IN RESPECT OF THEIR SHARES OF COMMON STOCK UPON THE SALE OF THEIR SHARES.

We have never paid any cash dividends on our common stock, and we have no intention in the foreseeable future to pay any cash dividends on our common stock. Therefore, an investor in our common stock will obtain an economic benefit from the common stock only after an increase in its trading price and only by selling the common stock.

OUR STOCKHOLDERS HAVE APPROVED A REVERSE STOCK SPLIT AND A REVERSE STOCK SPLIT COULD HAVE CERTAIN ADVERSE EFFECTS.

In September 2010, our stockholders approved an amendment of our articles of incorporation at the discretion of the Board of Directors to effect a combination of our shares of common stock, or reverse stock split, at a ratio of up to eight shares of common stock converted into one share of common stock with the par value remaining the same. The authorization to permit our Board of Directors the discretion to effectuate a reverse split will be limited to certain instances where our Board of Directors in its best judgment determines that a reverse split will be beneficial to us and our shareholders for business opportunities in the future or for potential listings on a new exchange that is intended to provide greater liquidity in shares of our common stock. In the proposed share combination, the par value of our common stock and the amount of authorized stock will not change. All the fractional shares resulting from a combination would be rounded up to the nearest whole share.

A reverse stock split could have certain adverse consequences, including:

- If the reverse stock split is effected and the market price of our common stock declines, the percentage decline may be greater than would occur in the absence of a reverse stock split.
- There can be no assurance that the total market capitalization of our common stock (the aggregate value of all our common stock at the then market price) after a reverse stock split is implemented will be equal to or greater than the total market capitalization before a reverse stock split or that the per share market price of our common stock following the implementation of a reverse stock split will increase in proportion to the reduction in the number of shares of our common stock outstanding before a reverse stock split.
- If the reverse stock split is effected, the resulting per-share stock price may not attract institutional investors or investment funds and may not satisfy the investing guidelines of such investors and, consequently, the trading liquidity of our common stock may not be improved. While the Board of Directors may believe that a higher stock price may help generate investor interest, there can be no assurance that the implementation of a reverse stock split will result in a per-share price that will attract institutional investors or investment funds or that such share price will satisfy the investing guidelines of institutional investors or investment funds. As a result, the trading liquidity of our common stock may not necessarily improve.
- Since the number of issued and outstanding shares of common stock would decrease as result of the reverse stock split, the number of authorized but unissued shares of common stock may increase on a relative basis. If we issue additional shares of common stock, the ownership interest of our current stockholders would be diluted, possibly substantially.
- The proportion of unissued authorized shares to issued shares could, under certain circumstances, have an anti-takeover effect. For example, the issuance of a large block of common stock could dilute the stock ownership of a person seeking to effect a change in the composition of the Board of Directors or contemplating a tender offer or other transaction for the combination of the company with another company.
- The reverse stock split may result in some stockholders owning “odd lots” of less than 100 shares of common stock. Odd lot shares may be more difficult to sell, and brokerage commissions and other costs of transactions in odd lots are generally somewhat higher than the costs of transactions in “round lots” of even multiples of 100 shares.

RISKS RELATED TO ESW'S BUSINESS

ESW'S RESULTS MAY FLUCTUATE DUE TO CERTAIN REGULATORY, MARKETING AND COMPETITIVE FACTORS OVER WHICH ESW HAS LITTLE OR NO CONTROL.

The factors listed below some of which ESW cannot control may cause the Company's revenues and result of operations to fluctuate significantly:

- Actions taken by regulatory bodies relating to the verification and certification of ESW products.
- Changes in federal and state level retrofit compliance mandates.
- Availability of federal and state level funding to support retrofit sales.
- The extent to which ESW products obtain market acceptance.
- The timing and size of customer purchases.
- Customer and distributors' concerns about the stability of ESW's business which could cause them to seek alternatives to ESW products.

ESW IS CURRENTLY DEPENDENT ON A FEW MAJOR CUSTOMERS / DISTRIBUTORS FOR A SIGNIFICANT PORTION OF ITS REVENUES.

ESW recorded sales from 44 customers in fiscal year 2011 as compared to 30 in fiscal year 2010. Three of its customers accounted for 41.2%, 15.7% and 10.6% respectively of the Company's revenue in the fiscal year 2011. Three of its customers accounted for 21%, 19%, and 13% respectively of the Company's revenue for the fiscal year 2010. ESW will continue to establish long-term relationships with new customers and foster greater opportunities with existing distributors. The loss of, or major reduction in business from, one or more of the major distributors could have a material adverse effect on ESW's liquidity, financial position, or results of operations.

ESW DOES NOT HAVE A LONG HISTORY OF SELLING AND MARKETING ITS PRODUCTS.

At the current time, ESW has limited marketing capabilities as compared to many of ESW's competitors. ESW does not have a large sales, promotion and marketing budget. ESW is constrained by working capital and its ability to generate the necessary cash flow from business operations to re-invest in its marketing programs. As a result of ESW's limited marketing capabilities, it is forced to rely upon customer / distributor referrals, trade publications and a small sales force. ESW's competitors have direct advertising and sales promotion programs for their products as well as sales and marketing personnel that may have a competitive advantage over ESW in contacting prospective customers / distributors. ESW's position in the industry is considered small in comparison to that of its competitors. ESW continues to develop and explore new marketing methods and techniques such as, trade show representation and sales programs directed toward customers / distributors. ESW's ability to compete at the present time is limited. ESW's success depends upon the ability to market, penetrate and expand markets and form alliances with third party distributors.

There can be no assurances that:

- ESW's selling efforts will be effective;
- ESW will obtain an expanded degree of market acceptance; or
- ESW will be able to successfully form additional relationships with distributors to market its products.

ESW DEPENDS UPON THE MARKETABILITY OF ITS CORE PRODUCTS.

Catalytic converters are ESW's primary products. ESW may have to cease operations if its primary products fail to achieve market acceptance and/or generate significant revenues. Additionally, the marketability of ESW's products is dependent upon obtaining and maintaining verification and certifications as well as the effectiveness of the product in relation to various environmental regulations as well as competitor's products in the various jurisdictions ESW markets and sells its products.

ESW MAY NOT BE ABLE TO OBTAIN DIRECT OR INDIRECT REGULATORY CERTIFICATION OR VERIFICATION APPROVALS WITH RESPECT TO CERTAIN PRODUCTS.

The industry that ESW operates in is regulated. In the United States of America these regulations are enforced by U.S. Environmental Protection Agency ("EPA") and California Air Resources Board ("CARB"). ESW plans to further develop and market catalytic converter products and support technologies that meet new regulations enforced by these agencies (see ITEM 1. BUSINESS, PRODUCT CERTIFICATION for regulations). If ESW is unable to demonstrate the feasibility of these products or obtain in a timely manner the verification and or certifications for its products from such regulatory agencies as the EPA or CARB, ESW may have to abandon the products or alter its business plan. Such modifications to ESW's business plan will have an adverse effect on revenue and its ability to achieve profitability. The regulatory approval process with EPA and CARB is complex and requires lengthy durability testing which must precede final certification/verification of ESW's products. ESW does not control the timeliness of the certification/verification process; however, ESW has taken steps to ensure the efficacy of ESW's contribution to the certification/verification process.

ESW FACES CONSTANT CHANGES IN GOVERNMENTAL STANDARDS BY WHICH ITS PRODUCTS ARE EVALUATED.

ESW believes that due to the constant focus on the environment and clean air standards throughout the world, ESW will be required in the future to adhere to new and more stringent regulations. Governmental agencies constantly seek to improve standards required for verification and or certification of products intended to promote clean air. In the event ESW's products fail to meet these ever changing standards, some or all of its products may become obsolete or de-listed from government verification having a direct negative effect on the Company's ability to generate revenue and become profitable.

ESW DOES NOT HAVE A LONG HISTORY OF MANUFACTURING ITS PRODUCTS AND DOES NOT HAVE A LONG HISTORY OF MANUFACTURING ITS PRODUCTS IN COMMERCIAL QUANTITIES.

ESW may encounter difficulties in ramping up production of current and any future products due to:

- lack of working capital;
- quality control and assurance issues;
- raw material supplies, lead times and prices;
- shortages of qualified and trained personnel; and
- equipment capable of producing large quantities

Any of the foregoing would affect ESW's ability to meet increases in demand should its products gain market acceptance and reduce growth in its sales revenues.

ESW FACES INTENSE COMPETITION AND RAPID TECHNOLOGICAL ADVANCES FROM COMPETITORS.

Competition among companies that provide solutions for pollutant emissions from diesel engines is intense. Several companies market products that compete directly with ESW products. Other companies offer products that potential customers may consider to be acceptable alternatives to ESW products and services. ESW faces direct competition from companies with far greater financial, technological, manufacturing and personnel resources, including Corning, NGK and Emitec. Corning and NGK are the two major manufacturers of ceramic cores, which are integral components in current catalytic converter production, and Emitec is the major manufacturer of metal cores. ESW also faces direct competition with companies like BASF/Engelhard and Johnson Matthey, who purchase their substrates from others, and do further processing with their own formulas and fabrication for direct sale to the market place. Newly developed products could be more effective and cost efficient than ESW's current products or those ESW may develop in the future. Many of ESW's current and potential future competitors have substantially more engineering, sales and marketing capabilities, substantially greater financial, technological and personnel resources, and broader product lines than ESW. ESW also faces indirect competition in the form of alternative fuel consumption vehicles such as those using methanol, hydrogen, ethanol and electricity.

ESW CLAIMS CERTAIN PROPRIETARY RIGHTS IN CONNECTION WITH THE DESIGN AND MANUFACTURE OF ITS PRODUCTS.

The protections provided by patents are important to ESW's business, although ESW believes that no individual right is material to its business at the present time. There can be no assurance that these patents or existing or future trade secret protections that ESW seeks will survive legal challenge, or provide meaningful levels of protection. Additionally, there can be no assurances when these patents or pending patents may be assigned to ESW directly. The Canadian patent registered to one of ESW's subsidiaries only affords protection against the manufacture, use or sale of the patented technology within Canada. The U.S. patent application for ESW's method of producing a catalytic element was filed on October 1, 2004 and a patent has been issued as of December 2, 2008. ESW does not presently have any worldwide patent protection or any immediate plans to file for protection in any foreign countries other than Canada. There can be no assurances that any patents ESW may have or have applied for or any agreements ESW has in place or will enter into will protect ESW's technology and or prevent competitors from employing the use of ESW's design and production information.

ATTRACTION AND RETENTION OF KEY PERSONNEL.

ESW's success depends in significant part, on the continued services of key technical, sales and senior management personnel. The loss of ESW's executive officers or other key employees could have materially adverse effects on ESW's business, results of operations and financial condition. ESW's success depends upon its continued ability to attract and attain highly qualified technical, sales and managerial personnel. There can be no assurances that ESW can attract, assimilate or retain other highly qualified technical, sales and managerial personnel in the future. At the present time certain key employees of the company and or subsidiaries do not have employment contracts and may be viewed as employees at will.

ESW IS DEPENDENT UPON KEY SUPPLIERS FOR CERTAIN MATERIALS WHICH ARE ONE OF THE NECESSARY COMPONENTS OF ITS PRODUCTS.

The production process of ESW's products includes certain raw materials including:

- stainless steel;
- particulate filters;
- precious metals ; and
- electronic components.

An extended interruption of the supply of precious metals and components necessary for the production of ESW's products could have an adverse effect on ESW. Further, a substantial price increase of the raw materials that are components of ESW's products could also have an adverse effect on ESW's business. ESW currently relies on third party vendors to provide certain components of its products. ESW currently does not have any fixed commitments from suppliers to provide supplies.

ESW DOES NOT HAVE A SIGNIFICANT LEVEL OF PRODUCT RECALL INSURANCE DUE TO ITS HIGH COST.

ESW's catalytic converter products are subject to extended warranty programs that could generate substantive product liability and warranty claims against the Company. ESW's ThermaCat Active Level III Plus on-road catalyst system which has been verified as a Level III technology is typically required to meet CARB limited warranty standard of 5 years or 100,000 miles, or 5 years or 150,000 miles, or 2 years unlimited miles depending on engine application. ESW's ThermaCat Active Level III Plus off-road catalyst system which has been verified as a Level III technology is typically required to meet CARB limited warranty standard of 5 years or 4,200 hours. Any failure of ESW's product may result in a recall or a claim against ESW. Due to the high cost of product recall insurance, ESW does not maintain significant amounts of insurance to protect against claims associated with use of its product. Any claim against ESW, whether or not successful, may result in expenditure of substantial funds and litigation and may require management's time and use of ESW resources and may have a materially adverse impact on the Company's overall ability to continue operations.

JOINT VENTURES AND/OR RELATIONSHIPS ENTERED INTO OR SOUGHT BY ESW FOR DEVELOPMENT AND SALE OF ITS PRODUCTS.

ESW's success partially depends on the relationships that it develops with various suppliers, OEM's, dealers, and distributors for the further development and deployment of its technology in the field. ESW does not manage these entities nor is it assured that ESW will be able to create relationships with these entities. The absence of such relationships could adversely impact ESW's business plans.

ITEM 1B. UNRESOLVED STAFF COMMENTS.

ESW has received no written comments regarding its periodic or current reports from the staff of the Securities and Exchange Commission that were issued 180 days or more preceding the end of our 2011 fiscal year and that remained unresolved.

ITEM 2. PROPERTIES

ESW does not own real property. Through its subsidiary, ESW Canada Inc., ESW leases its executive offices as well as its prior production facility which totals approximately 50,000 square feet located at 335 Connie Crescent, Concord, Ontario, Canada. The lease expires September 30, 2015. The end used date of this facility is June 30, 2012 and ESW is actively marketing the facility for sub-lease or lease takeover.

Additionally, ESW's wholly-owned subsidiary ESW America Inc. leases approximately 40,220 square feet at 200 Progress Drive, Montgomery Township, Pennsylvania. The leasehold space houses ESW's Air testing laboratory, manufacturing facility and research and development facilities. The lease expires February 28, 2013.

ITEM 3. LEGAL PROCEEDINGS

From time to time, the Company may be involved in a variety of claims, suits, investigations and proceedings arising from the ordinary course of our business, breach of contract claims, labor and employment claims, tax and other matters. Although claims, suits, investigations and proceedings are inherently uncertain and their results cannot be predicted with certainty, ESW believes that the resolution of current pending matters will not have a material adverse effect on its business, consolidated financial position, results of operations or cash flow. Regardless of the outcome, litigation can have an adverse impact on ESW because of legal costs, diversion of management resources and other factors. In addition, it is possible that an unfavourable resolution of one or more such proceedings could in the future materially and adversely affect ESW's financial position, results of operations or cash flows in a particular period.

ITEM 4. MINE SAFETY DISCLOSURES

None.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY AND RELATED STOCKHOLDER MATTERS AND ISSUERS PURCHASES OF EQUITY SECURITIES

MARKET INFORMATION

The Company's Common Stock is quoted under the symbol "ESWW" on the OTC Markets ("OTCM") - OTCQB tier operated by the OTC Markets Group Inc. The Company's Common Stock is also listed on the Frankfurt Stock exchange (FWB), under the trading symbol "EOW".

On February 23, 2011, the Company's common stock was removed from the OTCBB quotation system. The stock continues to be quoted on the OTCQB, which is part of the OTC Market Group's quotation system.

The following table sets forth the high and low bid prices, for the common stock for the quarters indicated, as reported by Bloomberg Reporting Service. Such market quotations reflect inter-dealer prices, without retail mark-up, markdown or commission and may not necessarily represent actual transactions:

FISCAL 2011	HIGH	LOW
1st Quarter	\$ 0.29	\$ 0.16
2nd Quarter	\$ 0.22	\$ 0.07
3rd Quarter	\$ 0.13	\$ 0.08
4th Quarter	\$ 0.11	\$ 0.05

FISCAL 2010	HIGH	LOW
1st Quarter	\$ 0.86	\$ 0.46
2nd Quarter	\$ 0.70	\$ 0.45
3rd Quarter	\$ 0.52	\$ 0.38
4th Quarter	\$ 0.44	\$ 0.16

HOLDERS

As of December 31, 2011 there were approximately 274 stockholders of record of the Company's Common Stock. The Company estimates there are approximately 2,109 additional stockholders with stock held in street name. On December 31, 2011, there were 219,450,447 shares of common stock outstanding.

DIVIDENDS

The Company has not declared or issued any dividends in the past and intends to retain future earnings, if any, for general business purposes.

SECURITIES AUTHORIZED FOR ISSUANCE UNDER EQUITY COMPENSATION PLANS

The following table sets forth as at December 31, 2011 securities authorized for issuance under equity compensation plans.

PLAN CATEGORY	EQUITY COMPENSATION PLAN INFORMATION		
	(A)	(B)	(C)
	NUMBER OF SECURITIES TO BE ISSUED UPON EXERCISE OF OUTSTANDING OPTIONS / RESTRICTED STOCK GRANTS	Weighted-average exercise price of outstanding options	Number of securities remaining available for future issuance under equity compensation plans (excluding securities in column A)
2002 Stock Option Plan (Shareholder Approved. Authorized - 5,000,000 shares)	3,100,000	\$0.67	0
2010 Stock Option Plan (Shareholder Approved. Authorized - 5,000,000 shares)	1,275,000	--	3,075,000

As reflected in the aggregate numbers above, the Board of Directors granted an aggregate award of 475,000 options to purchase shares of common stock and 1,450,000 shares of restricted common stock under the Company's 2010 stock plan in fiscal 2011.

On April 15, 2010, the Board of Directors granted an aggregate award of 900,000 stock options to a prior executive officer and director and one prior director. The options vest over a period of three years with an exercise price of \$0.65 (fair market value of the Company's common stock as of the date of grant) with expiry of five years from the date of award; of this award 300,000 options have expired.

The 2010 Stock Incentive Plan (the "Stock Incentive Plan" or the "Plan") replaces the Company's 2002 Stock Option Plan. While previously granted options under the Company's 2002 Stock Option Plan will remain in effect in accordance with the terms of the individual options, the 2010 Stock Incentive Plan will replace the Company's 2002 Plan for future grants. The Stock Incentive Plan is to be capitalized with 5,000,000 shares. The Stock Incentive Plan authorizes the granting of awards to employees (including officers) of the Company and certain related companies in the form of any combination of (1) options to purchase shares of common stock, (2) stock appreciation rights ("SARs"), (3) shares of restricted common stock ("restricted stock"), (4) shares of deferred common stock ("deferred stock"), (5) bonus stock, and (6) tax-offset payments with respect to any of such awards. The Stock Incentive Plan also authorizes the granting of awards to directors who are not employees or officers of the Company ("Outside Directors") to purchase shares of common stock and related limited SARs and tax-offset payments.

ITEM 6. SELECTED FINANCIAL DATA

Not Applicable.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion should be read in conjunction with ESW's Consolidated Financial Statements and Notes thereto included elsewhere in this Report.

This Form 10-K contains certain forward-looking statements regarding, among other things, the anticipated financial and operating results of ESW's business. Investors are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date hereof. ESW undertakes no obligation to publicly release any modifications or revisions to these forward-looking statements to reflect events or circumstances occurring after the date hereof or to reflect the occurrence of unanticipated events. In connection with the safe harbor provisions of the Private Securities Litigation Reform Act of 1995, ESW caution investors that actual financial and operating results may differ materially from those projected in forward-looking statements made by, or on behalf of, ESW. Such forward-looking statements involve known and unknown risks, uncertainties, and other factors that may cause the actual results, performance, or achievements to be materially different from any future results, performance, or achievements expressed or implied by such forward-looking statements. Risks and uncertainties inherent in forward-looking statements (are set forth in the Risk Factor disclosure contained elsewhere in this report).

OVERVIEW

Environmental Solutions Worldwide Inc. ("we," "us," "ESW" or the "Company") is a publicly traded company engaged through its wholly-owned subsidiaries ESW Canada Inc. ("ESWC"), ESW America Inc. ("ESWA"), Technology Fabricators Inc. ("TFI") and ESW Technologies Inc. ("ESWT"), (together the "ESW Group of Companies") in the design, development, manufacture and sale of emission technologies and services. ESW is currently focused on the international medium duty and heavy duty diesel engine market for on-road and off-road vehicles as well as the utility engine, mining, marine, locomotive and military industries. ESW also offers engine and after treatment emissions verification testing and certification services.

ESW's focus is to be an integrated solutions provider to the environmental emissions market by providing leading-edge catalyst technology as well as best-in-class engine and vehicle emissions testing and certification services. The Company's strategy is centered on identifying and deploying resources against its "sweet-spot" products, where ESW has identified its core competencies and differentiation in the marketplace. ESW's core geography focus is North America, and will opportunistically explore business development opportunities in other markets if accretive to the Company in the short term. By focusing financial, human and intellectual capital on ESW's core competencies and markets, the Company is targeting profitable growth in the short term and value creation for its shareholders over the long term.

Factors that are critical to ESW's success include winning new business, obtaining additional regulatory verifications for emission control products, managing and optimizing ESW's manufacturing capabilities to correspond with business needs, maintaining competitive wages and benefits, maximizing efficiencies in its manufacturing processes, and reducing overall costs. In addition, ESW's ability to adapt to key industry trends, such as increasing technologically sophisticated products, changing aftermarket distribution partners, and increasing environmental standards, also plays a critical role in its success. Other factors that are critical to ESW's success include adjusting to environmental and economic challenges such as increases in the cost of raw materials and ESW's ability to offset such cost increases through material substitutions, cost reduction initiatives and other methods.

ESW has made significant efforts and investment to comply with new regulations which came into force in January of 2009. (See ITEM 1. BUSINESS - PRODUCT CERTIFICATION). ESW's ThermaCat Active Level III Plus catalyst system has been verified by CARB for a variety of on- and off-road engine applications (PM reduction greater than 85%). The ThermaCat filter system is a combined technology comprised of a chemically coated wire mesh substrate and Diesel Particulate Filter (DPF) combined with an electronically controlled external fuel injection component. The ThermaCat regeneration process is an electronically controlled exothermic reaction and occurs automatically during normal vehicle operation, transparent to the operator.

The EPA's Voluntary Diesel Retrofit Program signed a Memorandum of Agreement with the State of California Air Resources Board for the coordination and reciprocity in diesel retrofit device verification. The EPA recognizes and accepts those retrofit hardware strategies or device-based systems that have been verified by CARB. This reciprocity agreement allows ESW's Therma Cat (TM) technology to be used in the remaining 49 states and it allows ESW to participate in EPA funded programs worldwide.

In 2011, ESW focused on optimizing the Company's operations around its "sweet spots" and capturing a greater market share in the catalytic converter and emissions testing markets whilst ensuring steps towards profitable growth as compared to 2010. The key factors that are in ESW's favor are: (a) continued regulatory push for emissions reductions in the United States, (b) funding available from public agencies, (c) a market-leading Level III active catalytic converter technology and an established distribution network in North America, and (d) CARB and EPA certification and verification capable emissions and durability testing services.

ESW believes that it can improve and achieve profitability and grow its business by pursuing the following strategy:

- Focus on delivering controlled and profitable growth to its shareholders.
- Provide integrated solutions to the emissions market by leveraging its product development, testing and certification services, and distribution and post-sale services capabilities.
- Center the Company's sales strategy around identified "sweet-spots" that will allow manufacturing efficiency gains and optimized resource allocation.
- Educate the end customers about the technology and ensure realistic delivery timeline expectations.
- Enhance scheduling and customer service functions and importance.
- Work with vendors to optimize ESW's material buys and lead times.
- Constantly review operations, processes and products under a Continuous Improvement / Performance Based culture.

To deliver against this strategic intent, in February and May 2011, ESW secured a total of \$4 million in financing through certain note subscription agreements and issued unsecured subordinated promissory notes to affiliate shareholders (the "Bridge Lenders"). Proceeds of the notes, along with available cash, were used to fund working capital, capital investments and other general corporate purposes. The notes allowed the Company and its subsidiaries to comply with covenant obligations under the credit agreement with its senior lender dated March 10, 2010 for which the Company and subsidiaries had previously obtained waivers of covenant obligations that expired February 15, 2011.

Effective May 10, 2011, the Company announced that it had entered into an Investment Agreement with the Bridge Lenders, who are current shareholders and at the time were also subordinated lenders to ESW under unsecured promissory notes totaling \$4.0 million. The Bridge Lenders agreed to provide a backstop commitment to a rights offering of the Company's common stock at a sale price of \$0.12 per share (Qualified Offering) and agreed to collectively backstop the Qualified Offering by purchasing from the Company at a subscription price of \$0.12 per share of Common Stock. The backstop provided for the participants of the Investment Agreement to buy any shares not purchased by the Company's shareholders of record that were entitled to participate in the rights offering (after giving effect to any oversubscriptions) up to 29,166,667 shares of Common Stock for a total purchase price of \$3.5 million.

On May 10, 2011 the Company filed a Registration Statement related to subscription rights to purchase Common Stock, \$0.001 par value and the shares of Common Stock deliverable upon the exercise of the subscription rights pursuant to the rights offering. The registration statement was declared effective by the Securities and Exchange Commission on June 9, 2011. The Company offered rights to existing shareholders of record as of June 9, 2011 to purchase approximately \$8 million in shares of common stock. The rights offering sought to raise cash for the Company to meet its working capital needs and pay down ESW's senior lender. The rights offering allowed for all subordinated lenders to exchange their unsecured subordinated promissory notes (and other notes paid in-kind for the payment of interest under the notes) for shares of common stock under the offering. On June 30, 2011, the Company closed its rights offering. A total of 66,670,012 shares were issued as part of the rights offering and related transactions, \$3.9 million was raised in cash and \$4.1 million was paid for through the exchange of principal and accrued interest on the Notes. Under the Rights Offering, shareholders subscribed for 15,590,234 shares for approximately \$1.9 million in cash. The Bridge Lenders subscribed for 23,228,970 shares of Common Stock at a price of \$0.12 per share, which was paid for through the exchange of principal and accrued interest on the Notes of approximately \$2.8 million. Pursuant to the backstop commitment, the Bridge Lenders purchased 27,714,385 shares of Common Stock at price of \$0.12 per share for approximately \$3.3 million, of which \$2.0 million was paid in cash and \$1.3 million was paid for through the exchange of the balance of principal and accrued interest due on the Notes. As a result of these transactions, the Company satisfied its obligations with respect to the Notes and the Notes were cancelled.

Effective July 18, 2011, ESWC paid its senior lender the amount of \$1.5 million (Canadian dollars) from the proceeds of the rights offering to liquidate the outstanding balance on the bank loan. The senior lender has discharged all liens, encumbrances and securities against ESW and its subsidiaries and cancelled the March 31, 2010 demand revolving credit facility agreement.

The additional capital raised by the rights offering is expected to give ESW the opportunity to execute against its short term and medium term plans.

ESW has made significant investments in research and development and obtaining regulatory approvals for its technologies.

On August 23, 2011, ESW received notification from the United States Environmental Protection Agency ("EPA") that the Company's XtrmCat Kit is now certified for 2 stroke, Category 2, marine engines. The issuance of the 'remanufacturing certificate' is a significant milestone for the Company as it validates the DOC technology for the marine market sector. The Certifications are applicable to Electro-Motive Diesel ("EMD") 710 and 645 engines. The XtrmCat can achieve Tier 0 and Tier I compliance as per 40 CFR 1042 when retrofitted to EMD 710 and 645 engines. ESW is pursuing opportunities to commercialize this technology into the marketplace.

The products that ESW is pursuing for verification / certification to cover the following primary technology levels established by CARB:

- Expansion of On Road Active Diesel Particulate Filter verification to include Exhaust Gas Recirculation engines for Level III +- PM reduction greater than 85%.
- ESW's XtrmCat product designed for locomotive, Tier 0, turbocharged EMD 645 and 710 engines was tested at an EPA recognized facility for certification during March and April 2011 along with the marine product. Certification applications for the rail product are pending with the EPA.

ESW believes that with the additional certifications/verification of the above range of products, ESW will cover a significant portion of the market and give ESW the competitive advantage to be the technology of first choice in retrofit and OEM applications. ESW is not contemplating pursuing verification for a Level II and/or Level I product in North America and will opportunistically explore deployment of these products in overseas markets.

The cost of developing a complete range of products to meet regulations is substantial. ESW believes that it possesses a competitive advantage in ensuring regulatory compliance by leveraging its Testing and Research facility in Montgomeryville, Pennsylvania to support its certification and verification efforts. ESW has also managed to offset some of these development costs through the application of research grants and tax refunds.

ESW has made the following adjustments to its business in 2011:

1) ESW has reviewed and continues to review its costs for inefficiencies and has taken steps to reduce its operating expenses. Key cost reduction initiatives during the first half 2011 included the restructuring of its management team, the termination of certain contracts and the re-negotiation of board and consulting obligations, amongst others.

In addition, during the second semester of the year, ESW reduced its overhead costs by re-locating its Canadian manufacturing operations to its facilities located in the State of Pennsylvania in the United States. ESW believes that the synergies from operating at a single location will provide significant financial and logistical advantages, as well as synergies with its testing operations. In addition, the move to the United States will help mitigate currency risk as currently all of ESW's revenues are from the United States and a significant portion of ESW's raw materials and components are being sourced from the United States. Key components of our transition plan have been completed. For the Canadian facility at Concord, Ontario ESW has retained a commercial real estate broker and the facility is being marketed for a sub-lease or re-lease ESW expects to transition out of the Canadian facility by June 30, 2012.

ESW is also offsetting a portion of the relocation and training costs through state grants provided by the State of Pennsylvania. In addition, ESW has also applied to the State of Pennsylvania for up to \$500,000 capital financing under its economic development programs, initial approval for the loan has been received and ESW is in the process of finalizing principal, security and terms. ESW has transitioned the production from Concord, Ontario, Canada to its existing facility located in Montgomeryville, PA. During the last quarter of 2011 all products were produced and shipped from Montgomeryville, PA. ESW has made changes to its Canadian operations and the phased reduction in headcount has been completed.

ESW will continuously revisit opportunities to further streamline the business.

2) Since January 2010 there has been a significant increase in the cost of material and components that ESW uses. ESW has revised the pricing to its dealers to help recover product margins. The first phase of the price increases was implemented on June 30, 2011. ESW has also revised its overall commercial policies, including its general terms and conditions and lead time expectations on its products. Changes have also been implemented to ESW's costing and quoting processes, including frequent periodic review of its bill of materials and the proactive negotiation of raw material prices.

3) ESW is focusing on increasing sales volumes on its core "sweet spot" products to reduce production complexities and improve inventory management. ESW has also implemented new continuous improvement programs such as the cross-functional "Product and Process Review" stream led by ESW's engineering team searching for product, product quality and product development process enhancements.

4) ESW has revisited relationships with critical vendors, in addition to setting up favorable payment plans to reduce the outstanding balances with these vendors. ESW has also secured and continues to secure volume discounts on critical components. ESW has also identified and engaged new vendors in the U.S. for parts supply. In addition, there is a greater focus on outsourcing opportunity for labor intensive parts.

5) ESW has revised and implemented its new warranty policy to ensure that warranty terms and conditions meet industry standards whilst mitigating warranty risks to the fullest extent possible. ESW has also launched a backend website to assist its distributors and installers in day to day operations, training and processes.

6) ESW is in the process of continuously engaging its existing dealers to help better understand ESW's business and product positioning and to strengthen ESW's partnership with its distribution base. ESW is also opportunistically adding new independent emissions focused dealers to enhance the Company's North American sales coverage.

7) ESW is focusing on increasing revenue from testing services provided to third parties from its Air Testing Facility in Montgomeryville, Pennsylvania.

In 2011, ESW's Air Testing Services in Montgomeryville, PA has seen a sizeable increase in business, in line with ESW's effort to increase revenues from these operations. Revenue from offering air testing as a service to outside customers has increased from \$ 153,379 for the year ended 2010 to \$581,591 for the year ended 2011.

As a result from these actions, the Company is positioned to improve its operational results in 2012. The Company has reduced inefficiencies in personnel-related costs, manufacturing costs and other discretionary expenditures that are within the Company's control. The Company is also seeking to lower its overhead costs while maintaining its focus on the Sales, Marketing and Customer Service efforts. The changes in the business are anticipated to lower the overall operating costs in the Company and improve the Company's overall results, without affecting the Company's positioning of its existing products and testing services as well as its efforts to develop and deliver to market the next generation of leading emissions products and services.

COMPARISON OF YEAR ENDED DECEMBER 31, 2011 TO YEAR ENDED DECEMBER 31, 2010

RESULTS OF OPERATIONS

Revenues for the year ended December 31, 2011, increased by \$1,448,520, or 13.9 percent, to \$11,885,665 from \$10,437,145 for the year ended December 31, 2010. The increase in revenue is mainly related to a 17% increase sales of ESW's verified ThermaCat Level III products, further complemented by an increase in revenues of ESW America's air testing operations, revenue from air testing as a service to outside customers has increased from \$ 153,379 for the year ended 2010 to \$581,591 for the year ended 2011. These revenue increases were offset by decreases in sales of the CleanCat product that was not sold in 2011 and a decrease in revenues for the XtrmCat marine product, which received certification in August 2011.

Cost of sales as a percentage of revenues for the year ended December 31, 2011 was 81.7 percent compared to 69.6 percent for the year ended December 31, 2010. Cost of sales for the year ended December 31, 2011 increased by \$2,451,354 or 33.76 percent. The primary reason for the lower gross margin for the year ended December 31, 2011 was: (a) the write-down of inventory in the amount of \$638,048, of this amount \$223,007 has been setup as a reserve at December 31, 2011 and relates to the higher overhead costs of the Canadian operations, (b) increases in the cost of materials of \$964,913 mainly driven by the increasing cost of precious metals, components and supplies used in production (c) an increase in overhead costs of \$717,709 as we apply higher overheads to our cost of sales that was previously expensed as operating expenses, and (d) an increase of \$130,684 in labour cost that was also previously expensed as operating expenses. The Company is constantly reviewing its production costing and has updated the pricing of its products to distributors. In addition, ESW has also streamlined its manufacturing operations by relocating the manufacturing operations to Montgomeryville, PA, where it is co-located with the air testing operations, which reduces manufacturing overhead expense.

Marketing, office and general expenses for the year ended December 31, 2011, decreased by \$827,548, or 17.5 percent, to \$3,891,814 from \$4,719,362 for the year ended December 31, 2010. The decrease is primarily due to: (a) a decrease in Sales and Marketing wages and selling expenses by \$194,613, resulting from a decrease in Sales and Marketing wages and a reversal of bad debt provisions on December 31, 2010, (b) a decrease of \$88,961 in facility costs as we apply higher facility overheads to cost of sales, (c) a decrease in factory expenses of \$259,125 resulting from higher overheads applied to cost of sales, (d) a decrease in administration salaries and wages of \$49,375 resulting from restructuring activities, (e) a decrease in investor relation costs of \$98,663 resulting from cancellation of an investor relation contract, and (f) a decrease in general administration costs of \$136,811 resulting from restructuring activities. During the fourth quarter of 2011, all manufacturing operations were conducted out of the Montgomeryville, PA facility and the rent for the Canadian facility for this period has been expensed as Marketing, office and general expenses under facility costs. ESW has retained a commercial real estate broker and the facility is being marketed for a sub-lease or re-lease ESW expects to transition completely out of the Canadian facility by June 30, 2012.

The Company incurred \$1,385,685 in restructuring charges for the year ended December 31, 2011 (December 31, 2010 - \$0), due to severance and other related payments. The Company incurred severance expenses related to separation agreements with its former Chief Executive Officer, Vice President of Operations and Director of Sales in the amount of \$450,309, and separation agreements for the second round of restructuring as a result of relocation of operations in the amount of \$297,846. The total of all severance agreements with employees amounted to \$748,155. The details of the restructuring charges are as follows:

Details	\$
Severance agreements	\$ 748,155
Software impairment	133,542
Product line changes	125,113
Training and set up expenses	172,748
Travel costs	62,933
Moving expenses	40,025
Legal fees	26,467
Relocation costs	22,437
Others	54,265
	<u>\$1,385,685</u>

Research and development ("R&D") expenses for the year ended December 31, 2011 decreased by \$90,967, or 11.6 percent, to \$692,977 from \$783,944 for the year ended December 31, 2010. The primary driver of R&D expenses for the fiscal year 2011 related to ESW's pursuit of the certification of its locomotive and marine product, the XtrmCat, including the final EPA certification testing at a recognized testing facility. To offset this increase, the Company received grant money amounting to \$278,712 and \$143,375 for the year ended December 31, 2011 and 2010 respectively.

Officers' compensation and directors' fees for the year ended December 31, 2011 decreased by \$253,914, or 26.6 percent, to \$700,140 from \$954,054 for the year ended December 31, 2010. The decrease is mainly due to changes in executive management and the Company's board compensation structure.

Consulting and professional fees for the year ended December 31, 2011 decreased by \$114,822, or 25.4 percent, to \$336,523 from \$451,345 for the year ended December 31, 2010. In the prior year period expenses were higher and related to (a) legal fees for ESW's March 2010 demand revolving credit facility agreement with a Canadian chartered bank, (b) higher audit fees, (c) fees related to Sarbanes-Oxley 404 consulting, and (d) fees related to a management consultant.

Foreign exchange loss for the year ended December 31, 2011, was \$248,306 as compared to a loss of \$103,256 for the year ended December 31, 2010. Due to the change in accounting policy, as described in Note 3 to the consolidated financial statements, ESW recognized a translation loss of \$186,812, which is included in foreign exchange loss in the consolidated statements of operations and comprehensive loss for the year ended December 31, 2011.

Depreciation and amortization expense for the year ended December 31, 2011 decreased by 56.3 percent from \$837,448 to \$366,266 year-on-year. In the year ended December 31, 2011 the depreciation costs were substantially lower as (a) we did not depreciate assets held for sale and scrapped as a result of the relocation of operations from Canada, (b) we applied additional depreciation to cost of sales, (c) patents were fully amortized, and (d) a portion of the assets have been fully depreciated.

The Company has recorded an impairment loss of \$163,668 for property, plant and equipment of ESW Canada for the year ended December 31, 2011. ESW recovered \$131,570 from sales of assets with no further recovery estimated from the sale of plant and machinery and office equipment, with the remaining plant and machinery and office equipment remaining in Canada being fully written down. The balance of the plant and machinery and office equipment has been transferred to Montgomeryville, PA. The leasehold improvements have been fully written down as the operations have been relocated from the Concord, Ontario, facility. Loss on impairment of property plant and equipment for the year ended December 31, 2010 was \$0.

Loss from operations for the year ended December 31, 2011, increased by \$938,804 or 20.1 percent, to \$5,612,564 from \$4,673,760 for the year ended December 31, 2010. Of the \$5,612,564 in loss from operations, \$2,097,383 was attributed to non cash losses for the year ended December 31, 2011, including depreciation and amortization of \$735,030, loss on impairment of property plant and equipment of \$295,238, write-down of inventory in the amount of \$638,048, stock based compensation of \$180,761 and a foreign exchange loss of \$248,306. In addition, the Company has also incurred \$1,385,685 of expenses related to the restructuring of its operations.

Interest expense on long-term debt related to Convertible Debentures was \$0 for the year ended December 31, 2011 as compared to \$183,858 for the year ended December 31, 2010. Amortization of deferred costs amounted to \$0 for the year ended December 31, 2011 as compared to \$117,131 for the year ended December 31, 2010. Long term debt accretion expenses amounted to \$0 for the year ended December 31, 2011 as compared to \$768,981 for the year ended December 31, 2010.

Effective March 25, 2010, the November 2008 and the August 2009 debenture holders agreed to convert all outstanding convertible debentures as per the terms of the respective debenture agreements. The early conversion of the debentures was a condition precedent to the Company's wholly-owned subsidiary, ESW Canada, entering into a new credit facility with CIBC. The conversion of the November 2008 and the August 2009 debentures also triggered the mandatory conversion feature on the March 19, 2010, debentures. As part of the agreement to convert all existing convertible debentures the Company has paid a premium as an inducement to convert all debentures. The premium was payable to all converting debenture holders and was subject to a positive fairness opinion by a Fairness Committee consisting of independent directors of the Company's Board of Directors and an increase in the share capital of the Company. The premium consists of 4,375,665 shares of Common Stock. As the Company did not have sufficient authorized shares as of the date of conversion of the debentures to fulfill the premium, the premium had been recorded as an advance share purchase agreement at fair market value \$2,909,872 at September 30, 2010. The agreement was without interest, subordinated to the banks position and payable in a fixed number of common shares (4,375,665 shares) of the Company upon increase in the authorized share capital of the Company. In summary, the fair value of the advanced share subscription was dependent on the market price of the Company's common stock, as the Company did not have sufficient available authorized common shares to fulfill this obligation as on September 30, 2010. The advanced share subscription was re-valued based on the market price of the Company's common stock at the end of each reporting period until it was fulfilled by the issuance of authorized common shares in November 2010. The resulting revaluations either cause gains or losses on the consolidated statement of operations and comprehensive loss.

The Share Subscription Agreement for the 2010 Debentures contained an exchange feature. The exchange feature provided that if within twelve months from March 19, 2010, the Company entered into or closed another financing or other transaction (which for securities law purposes would be integrable with the offer and sale of the Securities) on terms and conditions more favorable to another purchaser, the terms and conditions of the 2010 Debentures shall be adjusted to reflect the more favorable terms. On March 31, 2011, the Company re-evaluated the fair value of the exchange feature and determined that the probability of closing another financing was 100% and the conversion price of the 2010 Debentures would be reset. On March 31, 2011, an additional liability of \$578,739 was recorded for the exchange feature in these consolidated financial statements with a \$578,739 expense related to change in fair value of exchange feature liability recorded in the consolidated statements of operations and comprehensive loss. Change in fair value of exchange feature liability for the year ended December 31, 2011, amounted to \$578,739 as compared to \$2,021,213 for the year ended December 31, 2010.

The Company incurred \$126,850 interest cost on notes payable to related party for the \$4 million unsecured subordinated promissory notes during for the year ended December 31, 2011, as compared to \$11,342 for the \$500,000 unsecured subordinated promissory notes during the year ended December 31, 2010.

During the year ended December 31, 2011, the Company recorded interest accretion expense of \$3,506,074 (2010 - \$0), a financing charge on embedded derivative liability of \$485,101 (2010 - \$0) and a gain on convertible derivative of \$1,336,445 (2010 - \$0) related to the discount feature and the embedded derivative features in the \$4 million notes payable to related party.

Bank fees resulting from credit facility covenant waivers related to ESW's secured demand credit agreement amounted to \$154,205 for the year ended December 31, 2011 (2010 - \$0).

Restructuring of manufacturing operations : In August 2011, ESW adopted a reorganization plan to reduce its overhead costs by re-locating its Canadian manufacturing operations into its facilities located in the United States. ESW believes that the synergies from operating at a single location will provide significant financial and logistical advantages, as well as synergies with its testing operations also located in the same facility. ESW has transitioned the production from Concord, Ontario, Canada to its existing facility located in Montgomeryville, PA, United States, during the fourth quarter of 2011 all products were manufactured and shipped from the United States. ESW recognized a loss on impairment of property plant and equipment of \$0.2 million for the year ended December 31, 2011 and restructuring charges amounted to \$1,385,685. In addition, ESW expects to incur additional restructuring charges associated with the closure of the facility, transfer of manufacturing equipment excluding any severance charges during the first half of fiscal 2012.

In accordance with ASC 420-10-25-11 costs to terminate an operating lease" arise when a lessee will either: (a) terminate an operating lease; or (b) if it is unable to terminate the lease, discontinue its use of the asset and continue to make lease payments over the remaining term of the lease without benefit. When the lease will be terminated, the lessee should recognize a liability for the cost of terminating the lease at the time the lease is terminated. If the lease will not be terminated and the lessee will continue to incur costs under the lease without future benefit, the lessee should recognize a liability on the cease-use date (the date the lessee discontinues its use of the asset). In accordance with paragraphs 420-10-30-7 through 30-9, a liability for the remaining lease rentals, reduced by actual (or estimated) sublease rentals, would be recognized and measured at its fair value at the cease-use date. In accordance with paragraphs 420-10-35-1 through 35-4:, the liability would be adjusted for changes, if any, resulting from revisions to estimated cash flows after the cease-use date, measured using the credit-adjusted risk-free rate that was used to measure the liability initially. The fair value estimate at the cease-use date amounts to \$0.14 million associated with the release of its manufacturing facility at Concord, Ontario, Canada. This fair value estimate will be re-measured and recorded as a liability at June 30, 2012 the expected cease use date of the facility, any sub-lease or rent earned from the Concord, Ontario, Canada facility in excess of the fair value estimate will be used to offset this liability.

LIQUIDITY AND CAPITAL RESOURCES

ESW's principal sources of operating capital have been the proceeds from its various financing transactions. During year ended December 31, 2011, the Company used \$2,643,776 of cash to sustain operating activities compared with \$5,875,140 for year ended December 31, 2010. As of At December 31, 2011 and 2010, the Company had cash and cash equivalents of \$1,103,649 and \$13,328, respectively.

Net cash used in operating activities for the year ended amounted to \$2,643,776. This amount was attributable to the net loss of \$9,127,088, plus non-cash expenses such as depreciation, amortization, interest accretion expense, change in fair value of exchange feature liability and others of \$5,066,467, and an increase in net operating assets and liabilities of \$1,416,845. Net cash used in operating activities for year ended December 31, 2010 amounted to \$5,875,140. This amount was attributable to the net loss of \$9,447,641, plus non cash expenses such as depreciation, amortization, interest and accretion on long term debt, inducement premium on conversion of debentures and others of \$6,370,409, and a decrease in net operating assets and liabilities of \$2,797,908.

Net cash used in investing activities was \$252,385 for year ended December 31, 2011, as compared to \$414,188 used in investing activities for year ended December 31, 2010.

Net cash provided by financing activities totaled \$4,000,712 for year ended December 31, 2011, as compared to \$5,570,429 for year ended December 31, 2010. In fiscal year 2011, \$4,000,000 was provided through the issuance of the notes payable to related parties and \$3,857,997 from the issuance of common stock through a rights offering. From the funds raised, \$419,410 was paid towards rights offering costs, \$3,434,075 was repaid under ESW's CIBC credit facility and \$3,800 was repaid under capital lease obligation. In the prior year 2010, \$2,919,375 (net of \$80,625 debt issuance costs) was provided through issuance of convertible debentures, \$3,312,254 in funds was provided by ESW's bank loan, \$576,000 (net of broker fees of \$24,000) from the issuance of common stock. From the funds raised in fiscal year 2010, \$500,000 was repaid promissory notes to a related party, and \$13,769 was repaid under capital lease obligation.

ESW operates in a capital intensive and highly regulated industry, where a long lead time to bring new products into market is considered normal. ESW continues to invest in research and development to improve its technologies and bring them to the point where its customers have a high confidence level to purchase our products.

During year ended December 31, 2011 and in 2010, ESW did not produce sufficient cash from operations to support its expenditures. Prior financings supported the Company's operations during the period. ESW's principal use of liquidity relates to the Company's working capital needs and to finance any further capital expenditures or tooling needed for production and/or its testing facilities.

ESW anticipates certain capital expenditures in 2012 related to the general operation of its business as well as to upgrade the air testing facilities in Montgomeryville, Pennsylvania.

Overall, capital adequacy is monitored on an ongoing basis by our management and reviewed quarterly by the Board of Directors.

Effective March 31, 2010, ESWC entered into a demand revolving credit facility agreement with a Canadian chartered bank, CIBC to meet working capital requirements (the "Demand Credit Agreement"). The Demand Credit Agreement had a credit limit of \$4 million Canadian. Borrowings under the Demand Credit Agreement were limited to a percentage of accounts receivable plus a percentage of inventories (capped at CAD\$ 1 million or 50% of the accounts receivable portion) less any prior ranking claims.

Effective May 31, 2011, ESWC entered into a modification of its Demand Credit Agreement dated March 10, 2010 (the "Demand Credit Agreement") whereby it received an extension on the term of its Credit Agreement from its commercial lender through September 30, 2011. The new modification was subject to all covenants and the security margin under the Credit Agreement remaining in order at all times. The commercial lender and the Company agreed to reduce the Operating Loan limit as defined in the Credit Agreement to a maximum of \$1,500,000 Canadian or the borrowing base established by the security margin if less; all loans made by the commercial lender were to be satisfied and the credit facilities cancelled upon the earlier of the completion of the Company's rights offering or June 30, 2011.

In February 2011, ESW secured \$3 million in additional financing through certain note subscription agreements and issued unsecured subordinated promissory notes (collectively, "the Notes"). Proceeds of the Notes, along with available cash, will be used to fund working capital, planned capital investments and other general corporate purposes. The Company required additional working capital to secure and deliver the second quarter sales opportunities. On May 3, 2011, the Company secured \$1 million in additional financing through certain note subscription agreements and issued unsecured subordinated promissory notes to affiliate shareholders.

On June 30, 2011, the Company closed its rights offering. A total of 66,670,012 shares were issued as part of the rights offering and related transactions, \$3.9 million was raised in cash and \$4.1 million was paid for through the exchange of principal and accrued interest on the Unsecured Subordinated Promissory Notes (the "Notes") issued to related parties (the "Bridge Lenders") in February and May of 2011. Under the Rights Offering, shareholders subscribed for 15,590,234 shares for approximately \$1.9 million in cash. The Bridge Lenders subscribed for 23,228,970 shares of Common Stock at a price of \$0.12 per share, which was paid for through the exchange of principal and accrued interest on the Notes of approximately \$2.8 million. Pursuant to backstop commitment, the Bridge Lenders purchased 27,714,385 shares of Common Stock at price of \$0.12 per share for approximately \$3.3 million, of which \$2.0 million was paid in cash and \$1.3 million was paid for through the exchange of the balance of principal and accrued interest due on the Notes. As a result of these transactions, the Company satisfied its obligations with respect to the Notes and the Notes were cancelled.

Effective July 18, 2011, ESWC paid its senior lender the amount of \$1.5 million (Canadian dollars) from the proceeds of the rights offering to liquidate the outstanding balance on the bank loan. The senior lender has discharged all liens, securities and encumbrances against ESW and its subsidiaries and the March 31, 2010 demand revolving credit facility agreement has been cancelled.

ESW has 700,000 Class A special shares, authorized, issued and outstanding, recorded at \$453,900 (based on the historical exchange rate at the time of issuance). The Class A special shares are issued by BBL Technologies, Inc. ("BBL") without par value, and are redeemable on demand by the Holder of the shares which is a private Ontario Corporation at \$700,000 Canadian (which translates to \$688,310 U.S. and \$703,801 U.S. at December 31, 2011 and 2010, respectively). As the redeemable Class A special shares were issued by the BBL, the maximum value upon which the Company is liable is the net book value of BBL. As of December 30, 2011 and December 31, 2010, BBL had an accumulated deficit of \$1,194,705 U.S. (\$1,847,203 Canadian) and \$1,192,858 U.S. (\$1,845,375 Canadian) respectively, and therefore, the holder would be unable to redeem the redeemable Class A special shares at their ascribed value.

Competition is expected to intensify as the market for ESW's products expands. ESW's ability to continue to gain significant market share will depend upon its ability to continue to develop strong relationships with distributors, regulators, customers and develop new products. Increased competition in the market place could result in lower average pricing which could adversely affect ESW's margins and pricing for its products.

DEBT STRUCTURE

At December 31, 2011 ESW had of \$0 of debt on the consolidated balance sheet. At December 31, 2010 ESW had a Bank loan of \$3,424,889 and Exchange feature liability of \$2,133,862.

Effective March 19, 2010, the Company issued \$3,000,000 of its 9% convertible debentures (the "Debentures") to five (5) accredited investors under Rule 506 of Regulation D. The Debentures were for a term of three (3) years and were convertible into shares of the Company's common stock at the option of the holder by dividing the principal amount of the Debenture to be converted by \$0.50. The Debentures earned interest at a rate of 9% per annum payable in cash or in shares of the Company's common stock at the option of the holder. If the Holder elected to receive interest in shares of common stock, the number of shares of common stock to be issued for interest would be determined by dividing accrued interest by \$0.50. The Debentures had a mandatory conversion feature that required the holders to convert in the event a majority of the Company's pre-existing outstanding 9% convertible debentures converted. Subject to the holder's right to convert and the mandatory conversion feature, the Company had the right to redeem the Debentures at a price equal to one hundred and ten percent (110%) multiplied by the then outstanding principal amount plus unpaid interest to the date of redemption. Upon maturity, the debenture and interest was payable in cash or common stock at the option of the Holder. The Company also had provided the holders of the Debentures registration rights. The Debentures contained customary price adjustment protections.

Effective March 25, 2010, the November 2008 and the August 2009 debenture holders agreed to convert all outstanding convertible debentures as per the terms of the respective debenture agreements. The early conversion of the debentures was a condition precedent to the Company's wholly-owned subsidiary ESW Canada entering into a new credit facility with CIBC. The conversion of the November 2008 and the August 2009 debentures also triggered the mandatory conversion feature on the March 19, 2010 debentures. As part of the agreement to convert all existing convertible debentures the Company has paid a share-based premium as an inducement to convert all debentures. The premium was payable to all converting debenture holders and was subject to a positive fairness opinion, provided by a Fairness Committee consisting of independent directors of the Company's Board of Directors, and an increase in the share capital of the Company. The premium consisted of 4,375,665 shares of Common Stock. As the Company did not have sufficient authorized shares as of the date of conversion of the debentures to fulfill the premium, the premium had been recorded as an advance share purchase agreement at fair market value \$2,909,872 at June 30, 2010 (\$0 at June 30, 2011), the agreement was without interest, subordinated to the banks position and payable in a fixed number of common shares (4,375,665 shares) of the Company upon a subsequent increase in the authorized share capital of the Company. In summary, the fair value of the advanced share subscription was dependent on the market price of the Company's common stock, as the Company did not have sufficient available authorized common shares to fulfill this obligation as on June 30, 2010, it was treated as a liability. The advanced share subscription was re-valued based on the market price of the Company's common stock at the end of each reporting period until it was fulfilled by the issuance of authorized common shares in November 2010. Gains and losses from the resulting revaluations were recognized on the consolidated statement of operations and comprehensive loss.

The Share Subscription Agreement for the 2010 Debentures contained an exchange feature. The exchange feature provides that if within twelve months from March 19, 2010, the Company entered into or closed another financing or other transaction (which for securities law purposes would be integrable with the offer and sale of the Securities) on terms and conditions more favorable to another purchaser, the terms and conditions of the 2010 Debentures shall be adjusted to reflect the more favorable terms. On March 31, 2011, the Company re-evaluated the fair value of the exchange feature and determined that the probability of closing another financing was 100% and the conversion price of the 2010 Debentures would be reset. On March 31, 2011 an additional liability of \$578,739 was recorded for the exchange feature in these consolidated financial statements with a \$578,739 expense related to change in fair value of exchange feature liability recorded in the consolidated statements of operations and comprehensive loss. On June 30, 2011 concurrent with the closing of the rights offering the exchange feature liability was moved to paid in capital.

Effective March 31, 2010 ESWC entered into the Demand Credit Agreement. The Demand Credit Agreement has a credit limit of CAD \$4 million. Borrowings under the facility were limited to a percentage of accounts receivable plus a percentage of inventories (capped at CAD \$1 million or 50% of the accounts receivable portion) less any prior ranking claims. The Demand Credit Agreement was guaranteed by the Company and its subsidiaries ESW Canada Inc., ESW America Inc., BBL Technologies Inc., and ESW Technologies Inc., through a general security agreement over all assets to its senior lender. The Demand Credit Agreement had been guaranteed to the bank under the EDC's Export Guarantee Program. Borrowings under the Demand Credit Agreement bear interest at 4.5% above the bank's prime rate of interest. Obligations under the Demand Credit Agreement were collateralized by a first-priority lien on the assets of the Company and its subsidiaries, including, accounts receivable, inventory, equipment and other tangible and intangible property, including the capital stock of all direct subsidiaries.

The terms relating to the Demand Credit Agreement specifically note that the Company maintain a tangible net worth of at least \$4.0 million. The Demand Credit Agreement contained, among other things, covenants, representations and warranties and events of default customary for a facility of this type for the Company and its subsidiaries. Such covenants include certain restrictions on the incurrence of additional indebtedness, liens, acquisitions and other investments, mergers, consolidations, liquidations and dissolutions, sales of assets, dividends and other repurchases in respect of capital stock, voluntary prepayments of certain other indebtedness, capital expenditures and transactions with affiliates, subject to certain exceptions. Under certain conditions amounts outstanding under the credit agreements may be accelerated. Such events include failure to comply with covenants, breach of representations or warranties in any material respect, non-payment or acceleration of other material debt, entry of material judgments not covered by insurance, or a change of control of the Company.

From November 8, 2010 through February 14, 2011, ESWC received waivers of certain financial covenants under the Demand Credit Agreement. Without the waivers, ESWC would not be in compliance with certain covenants in the Demand Credit Agreement. On February 17, 2011, the Company raised a \$3 million through the issuance of unsecured subordinated promissory notes. With the proceeds of the Notes, the Company became compliant with covenant obligations under the Demand Credit Agreement with CIBC.

Effective July 18, 2011, ESW's wholly-owned subsidiary ESW Canada Inc, paid its senior lender the amount of \$1.5 million (Canadian dollars) from the proceeds of the rights offering to liquidate the outstanding balance on the bank loan. The senior lender has discharged all liens, securities and encumbrances against ESW and its subsidiaries credit facility agreement has been cancelled.

As of December 31, 2011, \$0 was owed under the Demand Credit Agreement compared to \$ 3,424,889 as of December 31, 2010.

On February 17, 2011, the Company entered into note subscription agreements (collectively, the "Loan Agreements"), and issued unsecured subordinated promissory notes to, nine lenders, who are current shareholders and deemed affiliates of certain members of the Board of Directors of the Company (the "Subordinated Lenders"). The Loan Agreements were approved by the independent directors of the Company. As per the Loan Agreements, the Subordinated Lenders made loans to the Company in the principal aggregate amount of \$3 million, represented by unsecured subordinated promissory notes (the "Notes"), dated February 17, 2011. Proceeds of the Loan, along with available cash, were used to fund working capital, planned capital investments and other general corporate purposes. The Notes bore interest at a rate of 10% per annum, payable in-kind on a monthly basis commencing March 17, 2011, up to the date on which the Note has been paid in full. The maturity date of the Loans was the earlier of: (i) the closing of a rights offering of the Company's common stock, par value \$.001 per share, at a sale price of \$0.12 per share (adjusted for any stock split, stock dividend or other similar adjustment) pursuant to which the Company planned to offer rights to purchase approximately up to \$8 million in shares of Common Stock the ("Qualified Offering"), and would also permit all Subordinated Lenders to exchange their Notes, accrued interest (and the any Notes that may be issued for payment of interest) for shares of Common Stock at \$0.12 per share or (ii) June 17, 2011 (the "Outside Date"). The Qualified Offering was also been approved by the independent directors of the Company.

Subsequently on May 3, 2011, the Company entered into additional note subscription agreements and issued unsecured subordinated promissory notes (the "Bridge Notes") to, nine lenders, who are current shareholders and were subordinated lenders under prior loan agreements in the aggregate amount of \$3 million with the Company entered into February 17, 2011 and may be deemed affiliates of the Company. The Bridge Notes were approved by the Company's independent directors. Pursuant to the Loan agreements, the Subordinated Lenders agreed made loans to the Company in the aggregate principal amount of \$1 million subject to the terms and conditions set forth in the Loan Agreements and represented by unsecured subordinated convertible promissory notes, effective as of April 27, 2011. Proceeds of the Bridge Loan, along with available cash, were used by the Company to fund working capital.

Effective May 10, 2011, the Company entered into an Investment Agreement (the "Investment Agreement") with Orchard Investments, LLC ("Orchard"); Black Family 1997 Trust; Leon D. Black, UAD 11/30/92 FBO Alexander Black; Leon D. Black, UAD 11/30/92 FBO Benjamin Black; Leon D. Black, UAD 11/30/92 FBO Joshua Black; Leon D. Black, UAD 11/30/92 FBO Victoria Black; Leon D. Black; John J. Hannan and Richard Ressler ("Ressler")(each individually a "Bridge Lender" and collectively the "Bridge Lenders"). Pursuant to the Investment Agreement, the Bridge Lenders agreed to provide a backstop commitment to the Qualified Offering by purchasing from the Company at a subscription price of \$0.12 per share of Common Stock any shares not purchased by the Company's shareholders of record who were entitled to participate in the rights offering (after giving effect to any oversubscriptions) up to 29,166,667 shares of Common Stock for a total purchase price of \$3.5 million (the "Backstop Commitment"). In addition to their rights to purchase shares pursuant to the Qualified Offering and the Backstop Commitment, the Bridge Lenders have the option, in their sole discretion, to purchase from the Company, at the subscription price, any other shares not purchased by the Company's stockholders through the Qualified Offering (the "Purchase Option"). If, after giving effect to the Qualified Offering, the Backstop Commitment and the Purchase Option, any of the Bridge Lenders shall have been unable to exchange any portion of his or its Notes, the Company will also offer each Bridge Lender the right to purchase additional shares of Common Stock at the subscription price (payable through the exchange of Bridge Loans for Common Stock) such that each Bridge Lender shall have exchanged all of his or its notes for shares of Common Stock (the "Additional Subscription Offer"). In addition, if Ressler and Orchard collectively acquire less than \$1.0 million worth of shares of Common Stock as part of the Qualified Offering, the Backstop Commitment, the Purchase Option and the Additional Subscription Offer, the Company has agreed to offer to Ressler and Orchard an additional number of shares of Common Stock equal to the shortfall amount at the subscription price.

Effective June 14, 2011, the respective holders of ESW's 10% unsecured subordinated promissory notes issued February 17, 2011 and May 3, 2011 in the aggregate principal amount of \$4 million (collectively the "Notes") pursuant to the terms of the Notes, extended the maturity date of the Notes to July 15, 2011.

Effective June 30, 2011, the Company closed its rights offering, as part of the rights offering and the Investment Agreement, the principal due on the Notes and the Bridge Notes in the aggregate amount of \$4,000,000 and corresponding interest in the amount of \$126,850 were converted into Common stock at the rights offering price of \$0.12 per share. As a result of these transactions, the Company satisfied its obligations with respect to the Notes and the Notes were cancelled.

ESW's ability to service its future indebtedness, other obligations and commitments in cash will depend on its future performance and ability to raise capital, which will be affected by prevailing economic conditions, financial, business, regulatory and other factors. Certain of these factors are beyond ESW's control. ESW believes that, based upon its current business plan it will meet its debt service obligations when due. ESW may need additional financing meet its financial projections and obligations. Significant assumptions underlie ESW's projections, including, among other things, that ESW will be successful in implementing its business strategy, that some of ESW's products that have received verification from the appropriate regulatory authorities will obtain customer and market acceptance, and that there will be no material adverse developments in ESW's business, liquidity or capital requirements. If ESW cannot generate sufficient cash flow from operations to service its indebtedness and to meet other obligations and commitments, ESW might be required to refinance or to dispose off assets to obtain funds for such purpose. There is no assurance that refinancing or asset dispositions or raising funds from sales of equity or otherwise could be effected on a timely basis or on satisfactory terms. In such circumstance, ESW would have to issue shares of its common stock as repayment of these obligations, which would be of a dilutive nature to ESW's present shareholders.

CONTRACTUAL OBLIGATIONS

LEASES

Effective November 24, 2004, the Company's wholly-owned subsidiary, ESWA, entered into a lease agreement for approximately 40,220 square feet of leasehold space at 2 Bethlehem Pike Industrial Center, Montgomery Township, Pennsylvania. The leasehold space houses the Company's research and development facilities and also houses ESW's new manufacturing operations. The lease commenced on January 15, 2005 and was to expire January 31, 2010. Effective October 16, 2009, the Company's wholly-owned subsidiary ESWA entered into a lease renewal agreement with Nappen & Associates for the leasehold property in Pennsylvania. There were no modifications to the original economic terms of the lease under the lease renewal agreement. Under the terms of the lease renewal, the lease term will now expire February 28, 2013. Effective March 31, 2011, ESWA entered into a lease amendment agreement with Nappen & Associates for the leasehold property in Pennsylvania, whereby ESWA has the sole option to extend the expiry of the lease agreement by an additional 3 years if exercised, six months prior to February 28, 2013; there were no modifications to the original economic terms of the lease.

Effective December 20, 2004, the Company's wholly-owned subsidiary, ESWC, entered into an offer to lease agreement for approximately 50,000 square feet of leasehold space in Concord, Ontario, Canada. The leasehold space houses the Company's executive offices and previously housed the manufacturing operations. The possession of the leasehold space took place on May 24, 2005 and the term of the lease was extended to September 30, 2010. ESWC renewed its lease agreement at the current property for an additional five year term. The renewed lease period commenced on October 1, 2010 and ends on September 30, 2015.

The following is a summary of the minimum annual lease payments, for both leases.

<u>YEAR</u>	
2012	454,642
2013	306,305
2014	283,603
2015	212,703
	<u>1,257,253</u>
	<u><u>1,257,253</u></u>

LEGAL MATTERS

From time to time, the Company may be involved in a variety of claims, suits, investigations and proceedings arising from the ordinary course of our business, breach of contract claims, labor and employment claims, tax and other matters. Although claims, suits, investigations and proceedings are inherently uncertain and their results cannot be predicted with certainty, ESW believes that the resolution of current pending matters will not have a material adverse effect on its business, consolidated financial position, results of operations or cash flow. Regardless of the outcome, litigation can have an adverse impact on ESW because of legal costs, diversion of management resources and other factors. In addition, it is possible that an unfavorable resolution of one or more such proceedings could in the future materially and adversely affect ESW's financial position, results of operations or cash flows in a particular period.

CAPITAL LEASE OBLIGATION

The Company is committed to the following lease payments in connection with the acquisition of equipment under capital leases:

<u>YEAR</u>	
2012	1,259
Less imputed interest	<u>(18)</u>
Total obligation under capital lease	1,241
Less current portion	<u>(1,241)</u>
Total long-term portion	<u><u>\$ 0</u></u>

The Company incurred \$17 and \$2,374 of interest expense on capital lease obligation for the twelve month periods ended December 31, 2011 and 2010, respectively.

RESTRUCTURING EXPENSES AND SEVERANCE AGREEMENTS

Restructuring charges relate to changes in the management and reductions in work force of the Company's subsidiary, ESW Canada Inc., hiring, training, moving, relocation charges related to the setup of the new subsidiary, Technology Fabricators Inc. and write downs related to changes in business strategy as a result of the decision to relocate operations. Restructuring expenses consist mainly of severance expenses amounting to \$748,155, travel costs of \$62,933, legal fees of \$26,467, recruiting cost of \$34,624, training and set up expenses of \$172,748, moving expenses of \$40,025, relocation expenses of certain employees of \$22,437, write down due to software impairment \$133,542, write down due to product line discontinuation \$125,113 and other expenses of \$19,641. The Company does not expect to incur further expenses related to severance agreements related to the 2011 restructuring plans, but could incur additional restructuring costs related to its Canadian facility.

CRITICAL ACCOUNTING POLICIES

ESW's discussion and analysis of the financial condition and results of operations is based upon its consolidated financial statements, which have been prepared in accordance with Generally Accepted Accounting Principles, in the United States ("US GAAP").

A critical accounting policy is defined as one that is both material to the presentation of ESW's financial statements and requires management to make difficult, subjective or complex judgments that could have a material effect on ESW's financial condition and results of operations. Specifically, critical accounting estimates generally require management to make assumptions about matters that are highly uncertain at the time of the estimate; and if different estimates or judgments were used, the use of these estimates or judgments would have a material effect on ESW's financial condition or results of operations.

The estimates and judgments ESW makes that affect the reported amount of assets, liabilities, revenues and expenses are based on historical experience and on various other factors, which ESW believes to be reasonable in the circumstances under which they are made. Actual results may differ from these estimates under different assumptions or conditions. ESW considers accounting policies related to revenue recognition, the valuation of inventories, research and development and accounting for the value of long-lived assets and intangible assets to be critical accounting policies. The Company's significant accounting policies are disclosed in Note 2 to the Financial Statements of this 10-K report.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

ESW is exposed to financial market risks, including changes in currency exchange rates and interest rates. The Company has foreign currency exposures at its foreign operations related to buying and selling currencies other than the local currencies. The risk under these interest rate and foreign currency exchange agreement is not considered to be significant.

FOREIGN EXCHANGE RISK

ESW's exposure to foreign currency translation gains and losses also arises from the translation of the assets and liabilities of its subsidiaries to U.S. dollars during consolidation. These risks have been significantly mitigated by the move of ESW's manufacturing operations to PA USA.

During the year, the Company changed the functional currency of its Canadian operations from the Canadian dollar to the U.S. dollar, see Note 3. Prior to this change, ESW recognized a translation loss of \$102,366 in 2011 as compared to a gain of \$21,166 in 2010 reported as other comprehensive income in the consolidated statements of changes in stockholders' equity / (deficit). Following the change in accounting policy, ESW recognized a translation loss of \$186,812, which is included in foreign exchange loss in the consolidated statements of operations and comprehensive loss. Also included in foreign exchange loss in the consolidated statements of operations and comprehensive loss for the year ended December 31, 2011, ESW has recognized a translation loss of \$61,494 as compared to a loss of \$103,256 in 2010 primarily as a result of exchange rate differences between the U.S. dollar and the Canadian dollar.

INTEREST RATE RISK

ESW currently has no variable-rate long-term debt that exposes ESW to interest rate risk.

ITEM 8. FINANCIAL STATEMENTS

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of
Environmental Solutions Worldwide, Inc.

We have audited the accompanying consolidated balance sheets of Environmental Solutions Worldwide, Inc. (the "Company") as of December 31, 2011 and 2010, and the related consolidated statements of operations and comprehensive loss, changes in stockholders' equity (deficit) and comprehensive income, and cash flows for the years then ended. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2011 and 2010, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

The accompanying consolidated financial statements have been prepared assuming the Company will continue as a going concern. As discussed in Note 1 to the consolidated financial statements, the Company's experience of negative cash flows from operations and its dependency upon future financing raise substantial doubt about its ability to continue as a going concern. Management's plans regarding these matters are also described in Note 1. The consolidated financial statements do not include any adjustments that might result from the outcome of this uncertainty.

NOTE 1 - NATURE OF BUSINESS AND GOING CONCERN

Environmental Solutions Worldwide, Inc. (the "Company" or "ESW") through its wholly-owned subsidiaries is engaged in the design, development, manufacturing and sales of emissions control technologies, ESW also provides emissions testing and environmental certification services with its primary focus on the North American on-road and off-road diesel retrofit market. ESW currently manufactures and markets a line of catalytic emission control and enabling technologies for a number of applications.

The audited consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("US GAAP"), which contemplates continuation of the Company as a going concern.

The Company has sustained recurring operating losses. As of December 31, 2011, the Company had an accumulated deficit of \$52,753,926 and cash and cash equivalents of \$1,103,649. During the twelve month period ended December 31, 2011 there were significant changes made to ESW's business. These changes in operations, the relocation of the Company's operations (See Note 2), and the prevailing economic conditions all create uncertainty in the operating results and accordingly there is no assurance that the Company will be successful in generating sufficient cash flow from operations or achieving profitability in the near future. As a result, there is substantial doubt regarding the Company's ability to continue as a going concern. The Company may require additional financing to fund its continuing operations, financing may not be available at acceptable terms or may not be available at all. The Company's ability to continue as a going concern is dependent on obtaining additional financing and achieving and maintaining a profitable level of operations.

On February 17, 2011 and May 3, 2011, the Company raised a total of \$4 million through the issuance of unsecured subordinated promissory notes (the "Notes") to certain shareholders, including deemed affiliates of certain members of the Board of Directors of the Company. Proceeds from the Notes funded working capital, capital investments and other general corporate purposes. Proceeds from Notes, along with available cash, were used to fund the Company's additional working capital needs related to its summer sales.

Effective May 10, 2011, the Company entered into an Investment Agreement with certain of its current shareholders and subordinated lenders under unsecured promissory notes (the "Bridge Lenders") for an aggregate amount of \$4.0 million. As per the Investment Agreement, the Bridge Lenders agreed to provide a backstop commitment (the "Backstop Commitment") to a rights offering targeted by the Company to raise up to \$8 million (the "Qualified Offering"). Under the Backstop Commitment, the Bridge Lenders agreed to purchase any shares offered in the Qualified Offering that were not purchased by the Company's shareholders of record, after giving effect to any oversubscriptions.

Effective June 30, 2011 the Company completed its rights offering. The Company's shareholders subscribed to 38,955,629 shares including over subscriptions. Under the Qualified Offering shareholders subscribed to \$4.7 million, which was subscribed for via cash (\$1.9 million), and the exchange of principal and accrued interest on the Notes and the Bridge Loan Notes (approximately \$2.8 million). Under the Backstop Commitment, the Bridge Lenders purchased 27,714,385 shares of Common Stock at price of \$0.12 per share for approximately \$3.3 million, of which \$2.0 million was paid in cash and \$1.3 million was paid for through the exchange of the balance of principal and accrued interest due on the Notes. As a result of these transactions, the Company satisfied its obligations with the Bridge Lenders and effectively cancelled the Notes effective June 30, 2011.

Effective July 18, 2011, ESW's wholly-owned subsidiary ESW Canada Inc, paid its senior lender the amount of \$1.5 million (Canadian dollars) from the proceeds of the rights offering (see Note 12) to liquidate the outstanding balance on the bank loan. The senior lender has discharged all liens, encumbrances and securities against the Company and its subsidiaries and cancelled the March 31, 2010 demand revolving credit facility agreement.

These consolidated financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts or the amounts and classification of liabilities that might be necessary should the Company be unable to continue as a going concern. All adjustments considered necessary for fair presentation and of a normal recurring nature have been included in these consolidated financial statements.

NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES

BASIS OF CONSOLIDATION

The consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries, ESW America Inc. ("ESWA"), ESW Technologies Inc. ("ESWT"), ESW Canada Inc. ("ESWC"), Technology Fabricators Inc. ("TFI") and BBL Technologies Inc. ("BBL"). All inter-company transactions and balances have been eliminated on consolidation. Amounts in the consolidated financial statements are expressed in U.S. dollars.

Effective July 6, 2011, ESW setup a wholly-owned subsidiary TFI. TFI, a Delaware corporation to house ESW's manufacturing operations that is co-located at 200 Progress Drive, Montgomeryville, PA, 18936 along with ESW's Air Testing operations. All manufacturing activities are housed in TFI effective October 1, 2011.

ESTIMATES

The preparation of consolidated financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expense during the reported period. Actual results could differ from those estimates. Significant estimates include amounts for inventory valuation, impairment of property plant and equipment, share based compensation, redeemable class A special shares, valuation of the warrants, accrued liabilities and accounts receivable exposures.

ALLOWANCE FOR DOUBTFUL ACCOUNTS

The Company extends unsecured credit to its customers in the ordinary course of business but mitigates the associated credit risk by performing credit checks and actively pursuing past due accounts. An allowance for doubtful accounts is estimated and recorded based on management's assessment of the credit history with the customer and current relationships with them. On this basis management has determined that an allowance for doubtful accounts of \$1,398 and \$70,028 was appropriate as of December 31, 2011 and December 31, 2010, respectively.

INVENTORY

Inventory is stated at the lower of cost or market determined using the first-in first-out method. Inventory is periodically reviewed for use and obsolescence, and adjusted as necessary. Inventory consists of raw materials, work in progress and finished goods.

PROPERTY, PLANT AND EQUIPMENT UNDER CONSTRUCTION

The Company capitalizes customized equipment built to be used in the future day to day operations at cost. Once complete and available for use, the cost for accounting purposes is transferred to property, plant and equipment, where normal depreciation rates apply.

PROPERTY, PLANT AND EQUIPMENT

Property, plant and equipment are recorded at cost. Depreciation is computed on a straight-line basis over the estimated useful lives of the assets, generally 5 to 7 years. Maintenance and repairs are charged to operations as incurred. Significant renewals and betterments are capitalized. An impairment loss would be recognized when the carrying amount of an asset exceeds the estimated discounted cash flow used in determining the fair value of the asset. Due to changes in circumstances related to its on-going restructuring plan, ESW conducted a test for impairment as of December 31, 2011 and recognized an impairment loss of \$163,668 (see Note 6 for details). Assets that have been held for sale during the year were written down to their fair value and depreciation has been suspended. Gains or losses not previously recognized resulting from the sale of an asset held for sale was recognized on the date of sale. For assets that are to be abandoned the undiscounted cash flows used in the test for recoverability are less than the long-lived assets carrying amount, the Company recognized an impairment loss as the carrying amount of the long-lived asset exceeds its fair value at December 31, 2011.

IMPAIRMENT OF LONG-LIVED ASSETS

The Company follows ASC Topic 360, which requires that long-lived assets be reviewed for impairment whenever events or changes in circumstances indicate that the assets' carrying amounts may not be recoverable. In performing the review for recoverability, if future undiscounted cash flows (excluding interest charges) from the use and ultimate disposition of the assets are less than their carrying values, an impairment loss represented by the difference between its fair value and carrying value, is recognized. Properties held for sale are recorded at the lower of the carrying amount or the expected sales price less costs to sell. Management reviewed the related assets for impairment in the fourth quarter (see Note 6 for details).

INTERNAL-USE SOFTWARE

ESW previously capitalized costs related to computer software obtained or developed for internal use. With the decision to relocate ESW's manufacturing operations from Concord, Ontario, Canada to Montgomeryville, PA, the Company expensed the capitalized costs for internal use software and discontinued the implementation. Related costs are included as software impairment under restructuring costs (See: Note 2: RESTRUCTURING CHARGES).

Costs capitalized as of December 31, 2011 and December 31, 2010 were \$0 and \$126,340, respectively.

PATENTS AND TRADEMARKS

Patents and trademarks consist primarily of the costs incurred to acquire them from an independent third party. Intangible assets with a finite life are tested for impairment whenever events or circumstances indicate that the carrying amount of an asset (or asset group) may not be recoverable. An impairment loss would be recognized when the carrying amount of an asset exceeds the estimated discounted cash flow used in determining the fair value of the asset.

Patents and trademarks are being amortized on a straight-line basis over their estimated life of ten years. Amortization expense for the twelve month periods ended December 31, 2011 and 2010 was \$16,145 and \$213,212 respectively. At December 31, 2011, Patents and trademarks were fully written down and have \$0 carrying value.

FAIR VALUE OF FINANCIAL INSTRUMENTS

ASC Topic 820 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements.

Included in the ASC Topic 820 framework is a three level valuation inputs hierarchy with Level 1 being inputs and transactions that can be effectively fully observed by market participants spanning to Level 3 where estimates are unobservable by market participants outside of the Company and must be estimated using assumptions developed by the Company. The Company discloses the lowest level input significant to each category of asset or liability valued within the scope of ASC Topic 820 and the valuation method as exchange, income or use. The Company uses inputs which are as observable as possible and the methods most applicable to the specific situation of each company or valued item.

The carrying amounts of accounts receivable, accounts payable, accrued liabilities, redeemable Class A special shares and capital lease obligation approximate fair value because of the short-term nature of these items. Per ASC Topic 820 framework these are considered Level 2 inputs where inputs other than Level 1 that are observable, either directly or indirectly, such as quoted prices in active markets for similar assets or liabilities, quoted prices for identical or similar assets or liabilities in markets that are not active, or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Interest rate risk is the risk that the value of a financial instrument might be adversely affected by a change in the interest rates. In seeking to minimize the risks from interest rate fluctuations, the Company manages exposure through its normal operating and financing activities.

REVENUE RECOGNITION

The Company derives revenue primarily from the sale of its catalytic products. In accordance with ASC Topic 605, revenue is recognized when persuasive evidence of an arrangement exists, delivery has occurred, the amount is fixed or determinable, risk of ownership has passed to the customer and collection is reasonably assured.

The Company also derives revenue (less than 4.8% and 1.5% of total revenue during the twelve month periods ended December 31, 2011 and 2010.) from providing air testing and environmental certification services. Revenues are recognized upon delivery of testing services when persuasive evidence of an arrangement exists and collection of the related receivable is reasonably assured.

LOSS PER COMMON SHARE

Loss per common share is computed by dividing the net loss by the weighted average number of common shares outstanding during the year. Common stock equivalents are excluded from the computation of diluted loss per share when their effect is anti-dilutive.

INCOME TAXES

Income taxes are computed in accordance with the provisions of ASC Topic 740, which requires, among other things, a liability approach to calculating deferred income taxes. The Company recognizes deferred tax liabilities and assets for the expected future tax consequences of events that have been recognized in their financial statements or tax returns. Under this method, deferred tax liabilities and assets are determined based on the difference between the financial statement carrying amounts and tax basis of assets and liabilities using enacted tax rates in effect in the years in which the differences are expected to reverse. The Company is required to make certain estimates and judgments about the application of tax law, the expected resolution of uncertain tax positions and other matters. In the event that uncertain tax positions are resolved for amounts different than the Company's estimates, or the related statutes of limitations expire without the assessment of additional income taxes, the Company will be required to adjust the amounts of the related assets and liabilities in the period in which such events occur.

Such adjustments may have a material impact on ESW's income tax provision and results of operations. Note 11 to the consolidated financial statements describes the guidance and the effects on results of operations and financial position arising from its adoption.

SHIPPING AND HANDLING COSTS

The Company's shipping and handling costs of \$138,815 (2010 – \$109,638) are included in cost of goods sold for all periods presented. Additionally, the Company has recorded recoveries of these costs amounting to \$77,963 (2010 - \$78,004), which are included in revenues.

RESEARCH AND DEVELOPMENT

The Company is engaged in research and development work. Research and development costs are charged as operating expense of the Company as incurred. Any grant money received for research and development work is used to offset these expenditures. For the years ended December 31, 2011 and 2010, the Company expensed \$692,977 and \$783,944 net of grant revenues, respectively, towards research and development costs. For the years ended December 31, 2011 and 2010, gross research and development expense, excluding any offsetting grant revenues amounted to \$971,689 and \$927,319, respectively, and grant money amounted to \$278,712 and \$143,375, respectively.

FOREIGN CURRENCY TRANSLATION

The consolidated financial statements have been translated into U.S. dollars in accordance with ASC Topic 830. All assets and liabilities have been translated using the current exchange rate as at the balance sheet dates. Amounts included in the consolidated statements of operations and comprehensive loss have been translated using the average exchange rate for the year. As a result of the change in accounting policy, all future translation adjustments that arise from translating the financial statements of the Company's foreign subsidiaries from local currency to U.S. dollars are recorded in net income.

COMPREHENSIVE INCOME

ASC Topic 830 establishes standards for reporting and display of comprehensive income and its components. As of December 31, 2011 and 2010, accumulated other comprehensive income is reported as a component of stockholders' equity/(deficit). Other comprehensive income includes only foreign currency translation adjustments related to translation of the Company's foreign subsidiaries from local currency to U.S. dollars. As a result of the change in accounting policy, the full amount of accumulated other comprehensive income was recognized in stockholders deficit.

PRODUCT WARRANTIES

The Company provides for estimated warranty costs at the time of sale and accrues for specific items at the time their existence is known and the amounts are determinable. The Company estimates warranty costs using standard quantitative measures based on industry warranty claim experience and evaluation of specific customer warranty issues. The Company currently records warranty costs as 2% of revenue. As of December 31, 2011 and December 31, 2010, \$192,674 and \$102,793, respectively, was accrued against warranty provision and included in accrued liabilities. For the twelve month periods ended December 31, 2011 and 2010, the total warranty, service, service travel and installation costs included in cost of sales were \$272,966 and \$224,766, respectively.

SEGMENTED REPORTING

ESW operates in two reportable segments. ASC 280-10, "Disclosures about Segments of an Enterprise and Related Information", establishes standards for the way that public business enterprises report information about operating segments in the Company's annual consolidated financial statements. Operating segments are components of an enterprise about which separate financial information is available that is evaluated regularly by the chief operating decision maker in deciding how to allocate resources and in assessing performance. ESW's operating segments include manufacturing operations and air testing services. ESW's Chief Operating Decision Maker is the Company's Executive Chairman.

RESTRUCTURING CHARGES

ESW recognizes restructuring expenses as they are incurred. ESW also evaluates the inventory and property, plant and equipment associated with restructuring actions for impairment. Asset impairment and accelerated depreciation expenses primarily relate to inventory write-downs for rationalized products and adjustments in the carrying value of the closed facilities to the Company's estimated fair value. In addition, the remaining useful lives of other property, plant and equipment associated with the related operations were re-evaluated based on the respective plan, resulting in the impairment of certain assets. In accordance with ASC 420-10-25-11 costs to terminate an operating lease" arise when a lessee will either: (a) terminate an operating lease; or (b) if it is unable to terminate the lease, discontinue its use of the asset and continue to make lease payments over the remaining term of the lease without benefit. When the lease will be terminated, the lessee should recognize a liability for the cost of terminating the lease at the time the lease is terminated. If the lease will not be terminated and the lessee will continue to incur costs under the lease without future benefit, the lessee should recognize a liability on the cease-use date (the date the lessee discontinues its use of the asset). In accordance with paragraphs 420-10-30-7 through 30-9, a liability for the remaining lease rentals, reduced by actual (or estimated) sublease rentals, would be recognized and measured at its fair value at the cease-use date. In accordance with paragraphs 420-10-35-1 through 35-4:, the liability would be adjusted for changes, if any, resulting from revisions to estimated cash flows after the cease-use date, measured using the credit-adjusted risk-free rate that was used to measure the liability initially.

NOTE 3 – CHANGE IN ACCOUNTING POLICY AND RECENTLY ISSUED ACCOUNTING STANDARDS

CHANGE IN ACCOUNTING POLICY

Effective October 1, 2011, ESW changed the functional currency for its Canadian operations from the Canadian dollar to the U.S. dollar. ESW's sales are primarily denominated in U.S. dollars. Additionally, with the closure of its operation in Canada, the majority of our inventory is sourced from its U.S. operations. The change in functional currency is applied on a prospective basis. The U.S dollar translated amounts of nonmonetary assets and liabilities at October 1, 2011 became the historical accounting basis for those assets and liabilities at October 1, 2011.

Until the point of transition a cumulative translation adjustment of \$102,366 was recognized in other comprehensive income, as a result of the change, losses of \$186,812 were recognized through net income and were included in foreign exchange loss on the consolidated statements of operations and comprehensive loss. Since the accumulated other comprehensive income related only to foreign currency translation adjustments the full amount of accumulated other comprehensive income, \$344,183, was reclassified into accumulated deficit.

The change in functional currency did not have a material effect on any other item on the consolidated balance sheets or the consolidated statements of operations and comprehensive loss.

RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS

In June 2011, the FASB issued ASU 2011-5 – “Comprehensive Income – Presentation of Comprehensive Income”. This statement removed the presentation of comprehensive income in the statement of changes in stockholders’ equity. The only two allowable presentations are below the components of net income in a statement of comprehensive income or in a separate statement of comprehensive income that begins with total net income. The guidance is effective for interim or annual reporting periods beginning after December 15, 2011. The Company does not expect the adoption of this guidance to have a material impact on the Company’s results of operations or financial position.

In May 2011, an update was made by the Financial Accounting Standards Board (“FASB”) to achieve common fair value measurement and disclosure requirements in GAAP and International Financial Reporting Standards (“IFRS”). It provides amendments to the definition of fair value and the market participant concept, grants an exception for the measurement of financial instruments held in a portfolio with certain offsetting risks, and modifies most disclosures. The changes in disclosures include, for all Level 3 fair value measurements, quantitative information about significant unobservable inputs used and a description of the valuation processes in place. The new guidance also requires disclosure of the highest and best use of a nonfinancial asset. This standard will be effective prospectively during interim and for annual periods beginning after December 15, 2011. Early application by public entities is not permitted. The adoption is not expected to have a significant impact on the Company’s consolidated financial statements.

RECENTLY ADOPTED ACCOUNTING PRONOUNCEMENTS

In August 2010, the FASB issued ASU No. 2010-22, Accounting for Various Topics - Technical Corrections to SEC Paragraphs. This update amends various SEC paragraphs based on external comments received and the issuance of SAB 112, which amends or rescinds portions of certain SAB topics. The adoption of this ASU had no effect on the Company's consolidated financial statements.

In August 2010, the FASB issued ASU No. 2010-21, Accounting for Technical Amendments to Various SEC Rules and Schedules. This updates various SEC paragraphs pursuant to the issuance of Release No. 33-9026: Technical Amendments to Rules, Forms, Schedules and Codification of Financial Reporting Policies. The adoption of this ASU had no effect on the Company's consolidated financial statements.

In April 2010, the FASB issued ASU No. 2010-17, Revenue Recognition - Milestone Method. The objective of this Update is to provide guidance on defining a milestone and determining when it may be appropriate to apply the milestone method of revenue recognition for research or development transactions. The amendments in this Update are effective on a prospective basis for milestones achieved in fiscal years, and interim periods within those years, beginning on or after June 15, 2010. The adoption of this ASU had no effect on the Company's consolidated financial statements.

In April 2010, the FASB issued ASU No. 2010-013, Compensation - Stock Compensation (Topic 718): Effect of Denominating the Exercise Price of a Share-Based Payment Award in the Currency of the Market in Which the Underlying Equity Security Trades a consensus of the FASB Emerging Issues Task Force. ASU 2010-13 addresses the classification of an employee share-based award with an exercise price denominated in the currency of a market in which the underlying equity security trades. The amendments are effective for fiscal years, and interim periods within those fiscal years, beginning on or after December 15, 2010. The adoption of this ASU had no effect on the Company's consolidated financial statements.

In October 2009, the FASB issued ASU No. 2009-13, Multiple Deliverable Revenue Arrangements - a consensus of the FASB Emerging Issues Task Force ("ASU 2009-13") (codified within ASC Topic 605). ASU 2009-13 addresses the accounting for multiple-deliverable arrangements to enable vendors to account for products or services (deliverables) separately rather than as a combined unit. ASU 2009-13 is effective prospectively for revenue arrangements entered into or materially modified in fiscal years beginning on or after June 15, 2010, with early adoption permitted. The adoption of this ASU had no effect on the Company's consolidated financial statements.

NOTE 4 - CASH AND CASH EQUIVALENTS

Cash and cash equivalents includes cash and highly liquid investments purchased with an original or remaining maturity of 90 days or less at the date of purchase. At December 31, 2011 and December 31, 2010, all of the Company's cash and cash equivalents consisted of cash.

NOTE 5 - INVENTORY

Inventory consists of:

INVENTORY	DECEMBER 31, 2011	DECEMBER 31, 2010
Raw materials	\$846,113	\$1,669,481
Work-in-process	1,705,346	2,737,545
Finished goods	102,575	7,492
	<u>\$2,654,034</u>	<u>\$4,414,518</u>
Less: Reserve for inventory	(223,007)	--
	<u>\$2,431,027</u>	<u>\$4,414,518</u>

The Company recorded inventory write downs amounting to \$638,048 and \$0 for the twelve month periods ended December 31, 2011 and 2010, respectively, related to certain inventory that were impaired as a result of the restructuring and product changes and were sold to recover cash.

NOTE 6 - PROPERTY, PLANT AND EQUIPMENT

Property, plant and equipment consist of the following:

CLASSIFICATION	DECEMBER 31, 2011	DECEMBER 31, 2010
Plant, machinery and equipment	\$ 6,338,221	\$ 5,790,507
Office equipment	383,912	384,902
Furniture and fixtures	456,981	461,817
Vehicles	25,604	18,288
Leasehold improvements	1,098,699	1,041,023
	<u>8,303,417</u>	<u>7,696,537</u>
Less: accumulated depreciation	(6,867,760)	(5,765,164)
Less: impairment loss	(163,668)	--
	<u>\$ 1,271,989</u>	<u>\$ 1,931,373</u>

Depreciation Expense	DECEMBER 31, 2011	DECEMBER 31, 2010
Depreciation expense included in cost of sales	\$ 271,563	\$ 174,012
Depreciation expense included in operating expenses	350,121	624,233
Depreciation expense included in research and development costs	97,200	246,849
Total depreciation expense	<u>\$ 718,884</u>	<u>\$ 1,045,095</u>

At December 31, 2011 and December 31, 2010, the Company had \$198,416 and \$185,542, respectively, of customized equipment under construction.

The plant, machinery and equipment above include \$37,508 and \$37,939 in assets under capital lease with a corresponding accumulated depreciation of \$34,384 and \$25,723 as of December 31, 2011 and December 31, 2010, respectively.

As a result of the decision to relocate ESW's manufacturing operations, the Company recognized an impairment loss. The estimated recovery from the sale of plant and machinery and office equipment was expected to be minimal and, accordingly, the Company determined that the carrying value of these assets exceeded the sum of undiscounted cash flows from their use and eventual disposition. Due to uncertainties in both timing and amount of these cash flows, the Company utilized an expected present value technique to estimate the fair value. Based on this valuation, the Company assessed a value of \$0 to these assets and recorded an impairment loss equal to the full amount of their carrying value. Recovery from the sale of these assets and differences due to exchange rate fluctuations will be offset against the impairment loss in the future periods. Impairment loss for the twelve months period ended December 31, 2011 and 2010 amounted to \$163,668 and \$0.

The details of impairment loss recognized for 2011 are summarized in the follows table:

Asset grouping	Impairment loss recognized
Plant and Machinery (Held for Sale)	\$ 180,993
Office equipment (Held for Sale)	36,983
Leasehold improvements (disposed or abandoned)	93,328
Total impairment loss recognized June 30, 2011	311,304
Effect of exchange rate fluctuations	(16,066)
Gain on disposal of Plant and Machinery	(131,570)
Total impairment loss recognized December 31, 2011	\$ 163,668

NOTE 7 - NOTES PAYABLE TO RELATED PARTIES

On February 17, 2011, the Company entered into note subscription agreements (collectively, the "Loan Agreements"), and issued unsecured subordinated promissory notes to, Orchard Investments, LLC; Black Family 1997 Trust; Leon D. Black Trust UAD 11/30/92 FBO Alexander Black; Leon D. Black Trust UAD 11/30/92 FBO Benjamin Black; Leon D. Black Trust UAD 11/30/92 FBO Joshua Black; Leon D. Black Trust UAD 11/30/92 FBO Victoria Black; Leon D. Black; John J. Hannan and Richard Ressler (each individually a "Subordinated Lender" or "Holder" and collectively the "Subordinated Lenders" or "Holders") who are current shareholders and deemed affiliates of certain members of the Board of Directors of the Company. The Loan Agreements were approved by the independent directors of the Company.

As per the Loan Agreements, the Subordinated Lenders made loans to the Company in the principal aggregate amount of \$3 million, represented by unsecured subordinated promissory notes (the "Notes"), dated February 17, 2011. Proceeds of the Loan, along with available cash funded working capital, capital investments and other general corporate expenditures. The Notes bore interest at a rate of 10% per annum, payable in-kind on a monthly basis commencing March 17, 2011, up to the date on which the Notes are paid in full. The maturity date of the Loan was the earlier of: (i) the closing of a rights offering of the Company's common stock, at a sale price of \$0.12 per share (adjusted for any stock split, stock dividend or other similar adjustment) pursuant to which the Company planned to offer rights to purchase approximately \$8 million in shares of Common Stock (the "Qualified Offering"), and also permitted all Subordinated Lenders to exchange their Notes and accrued interest (including any notes that may be issued for payment of interest) for shares of Common Stock at \$0.12 per share or (ii) June 17, 2011 (the "Outside Date").

Effective June 14, 2011, the respective holders of ESW's 10% unsecured subordinated promissory notes issued February 17, 2011 and May 3, 2011 in the aggregate principal amount of \$4 million (collectively the "Notes") pursuant to the terms of the Notes, extended the maturity date of the Notes to July 15, 2011.

The terms of the Loan Agreements were analyzed in accordance with ASC 815 Derivatives and Hedging. The Loan Agreements allowed for the price for Notes exchanged for Common Stock to be adjusted in certain circumstances. The potential adjustment in the exchange price precludes the Company from being qualified for the exemption from being considered to be a derivative instrument. As such, the option of the Holders to exchange Notes for Common Stock and the option of the Qualified Holders to invest the balance of \$1 million aggregate amount to purchase Common Stock were determined to be derivatives embedded in the Notes. These embedded derivatives are bundled together as a single compound embedded derivative and recorded and valued as a liability at the time of issuance on February 17, 2011 and on March 31, 2011.

The fair values of the embedded derivatives issued under the Loan Agreements on February 17, 2011 and March 31, 2011 were determined to be \$3,485,101 and \$2,148,656, respectively, with the following respective assumptions: (1) risk free interest rate of 0.15% and 0.17%, (2) remaining contractual life of 4 and 2.5 months, (3) expected stock price volatility of 194% and 201%, and (4) expected dividend yield of zero. Since the fair values of the embedded derivatives were in excess of the proceeds, the Company recorded an immediate expense of \$485,101 in the consolidated statement of operations and comprehensive loss as a financing charge on embedded derivative liability. The embedded derivatives liability was recorded as a discount to the Notes at the time of issuance. The discount was recorded as interest accretion expense in the consolidated statement of operations using the effective-interest method. The change in the fair value of \$1,336,445 of the embedded derivative liability was recorded as gain in the consolidated statements of operations for the twelve months ended December 31, 2011.

Subsequently, on May 3, 2011, the Company entered into additional note subscription agreements and issued unsecured subordinated promissory notes (the "Bridge Notes"), with Orchard Investments, LLC ("Orchard"); Black Family 1997 Trust; Leon D. Black, UAD 11/30/92 FBO Alexander Black; Leon D. Black, UAD 11/30/92 FBO Benjamin Black; Leon D. Black, UAD 11/30/92 FBO Joshua Black; Leon D. Black, UAD 11/30/92 FBO Victoria Black; Leon D. Black; John J. Hannan and Richard Ressler ("Ressler") who are current shareholders and were subordinated lenders under prior loan agreements in the aggregate amount of \$3 million with the Company entered into on February 17, 2011 and deemed affiliates of the Company. The Bridge Notes were approved by the Company's independent directors. Pursuant to the Loan agreements, the Subordinated Lenders made loans to the Company in the principal aggregate amount of \$1 million subject to the terms and conditions set forth in the Loan Agreements and represented by unsecured subordinated convertible promissory notes. Proceeds of the Bridge Loan, along with available cash, were used by the Company to fund working capital.

The fair value of the embedded derivatives issued under The Bridge Notes Agreements effective May 3, 2011 was determined to be \$506,074 with the following assumptions: (1) risk free interest rate of 0.60% (2) remaining contractual life of 48 days, (3) expected stock price volatility of 212%, and (4) expected dividend yield of zero. The embedded derivative liability was recorded as a discount to the Notes at the time of issuance. The discount is recorded as interest accretion expense in the consolidated statements of operations and comprehensive loss using the effective-interest method.

Effective May 10, 2011, the Company entered into an Investment Agreement (the "Investment Agreement") with Orchard Investments, LLC ("Orchard"); Black Family 1997 Trust; Leon D. Black, UAD 11/30/92 FBO Alexander Black; Leon D. Black, UAD 11/30/92 FBO Benjamin Black; Leon D. Black, UAD 11/30/92 FBO Joshua Black; Leon D. Black, UAD 11/30/92 FBO Victoria Black; Leon D. Black; John J. Hannan and Richard Ressler ("Ressler") (each individually a "Bridge Lender" and collectively the "Bridge Lenders"). Pursuant to the Investment Agreement, the Bridge Lenders agreed to provide a backstop commitment to the Qualified Offering and agreed to collectively backstop the Qualified Offering by purchasing from the Company at a subscription price of \$0.12 per share of Common Stock any shares not purchased by the Company's shareholders of record who were entitled to participate in the rights offering (after giving effect to any oversubscriptions) up to 29,166,667 shares of Common Stock for a total purchase price of \$3.5 million (the "Backstop Commitment"). In addition to their rights to purchase shares pursuant to the Qualified Offering and the Backstop Commitment, the Bridge Lenders had the option, in their sole discretion, to purchase from the Company, at the subscription price, any other shares not purchased by the Company's stockholders through the Qualified Offering (the "Purchase Option"). If, after giving effect to the Qualified Offering, the Backstop Commitment and the Purchase Option, any of the Bridge Lenders shall have been unable to exchange any portion of their or its Notes, the Company also offered each Bridge Lender the right to purchase additional shares of Common Stock at the subscription price (payable through the exchange of Bridge Loans for Common Stock) such that each Bridge Lender shall have exchanged all of their or its notes for shares of Common Stock (the "Additional Subscription Offer"). In addition, if Ressler and Orchard collectively acquired less than \$1.0 million worth of shares of Common Stock as part of the Qualified Offering, the Backstop Commitment, the Purchase Option and the Additional Subscription Offer, the Company agreed to offer to Ressler and Orchard an additional number of shares of Common Stock equal to the shortfall amount at the subscription price.

Effective June 30, 2011 the Company closed its rights offering. As part of the rights offering and the Investment Agreement, the principal due on the Notes and the Bridge Notes, in the aggregate amount of \$4,000,000, and corresponding interest in the amount of \$126,850, were converted into Common stock at the rights offering price of \$0.12 per share. As a result of these transactions, the Company satisfied its obligations with respect to the Notes and the Bridge Notes and both were cancelled.

As of December 31, 2011 and December 31, 2010, there was no outstanding principal and interest on notes payable to related parties.

The discount on the aggregate \$4 million notes issued on February 17, 2011 and May 3, 2011 was recorded as interest accretion expense in the consolidated statements of operations and comprehensive loss using the effective-interest method. Due to the conversion of the note the Company expensed the full amount of the discount and recorded interest accretion expense of \$3,506,074 in the consolidated statement of operations and comprehensive loss for the twelve months period ended December 31, 2011. The convertible derivative liability in the aggregate amount of \$2,654,730 recorded in relation to the aggregate \$4 million notes issued on February 17, 2011 and May 3, 2011 was transferred to equity on the consolidated balance sheet at June 30, 2011 (see Note 12).

NOTE 8 - BANK LOAN

Effective March 31, 2010, ESW's subsidiary, ESW Canada, had entered into a demand revolving credit facility agreement with a Canadian chartered bank, Canadian Imperial Bank of Commerce ("CIBC") to meet working capital requirements (the "Demand Credit Agreement"). The Demand Credit Agreement had a credit limit of \$4 million Canadian. Borrowings under the facility were limited to a percentage of accounts receivable plus a percentage of inventories (capped at \$1 million Canadian or 50% of the accounts receivable portion) less any prior ranking claims. The Demand Credit Agreement was guaranteed by the Company and its subsidiaries, ESWC, ESWA, BBL, and ESWT, through a general security agreement over all assets to CIBC. The facility had been guaranteed to CIBC under EDC's Export Guarantee Program. Borrowings under the Demand Credit Agreement bore interest at 2.25% above CIBC's prime rate of interest. Obligations under the Demand Credit Agreement were collateralized by a first-priority lien on the assets of the Company and its subsidiaries, including accounts receivable, inventory, equipment and other tangible and intangible property, including the capital stock of all direct subsidiaries.

The terms relating to the Demand Credit Agreement specifically noted that the Company maintain a tangible net worth of at least \$4.0 million Canadian. The Demand Credit Agreement contained, among other things, covenants, representations and warranties and events of default customary for a facility of this type for the Company and its subsidiaries. Such covenants included certain restrictions on the incurrence of additional indebtedness, liens, acquisitions and other investments, mergers, consolidations, liquidations and dissolutions, sales of assets, dividends and other repurchases in respect of capital stock, voluntary prepayments of certain other indebtedness, capital expenditures and transactions with affiliates, subject to certain exceptions. Under certain conditions amounts outstanding under the Demand Credit Agreement could be accelerated. Such events included failure to comply with covenants, breach of representations or warranties in any material respect, non-payment or acceleration of other material debt, entry of material judgments not covered by insurance, or a change of control of the Company.

On November 8, 2010, November 26, 2010, and December 23, 2010, the Company's wholly-owned subsidiary, ESWC, received the first, second and third waivers, respectively, of certain financial covenants under its Demand Credit Agreement with CIBC. Without the waivers, the Company's subsidiary would not be in compliance with the current ratio and effective tangible net worth covenants as set forth in the Demand Credit Agreement. In the event that the Company and its subsidiary, ESWC, failed to comply with the terms of the waiver and meet the current ratio and effective tangible net worth covenants prior to the end of the waiver period, same would constitute an event of default and the bank loan may need to be repaid unless a further waiver or modification to the Demand Credit Agreement could be obtained.

The third waiver provided by CIBC was through January 31, 2011 and also provided for a fee payable to the lender for the extension, as well as a reduction in the maximum security margin deficit as defined under the Demand Credit Agreement (by either reducing borrowing or increasing the borrowing base) and an increase in the annual interest rate to CIBC's prime rate plus 4.50% from CIBC's prime rate plus 2.25% effective January 1, 2011.

Effective February 4, 2011, the Company's wholly-owned subsidiary, ESWC, received a fourth waiver of certain financial covenants under its Demand Credit Agreement with CIBC. Without the waiver, the Company's subsidiary would not have been in compliance with the current ratio and effective tangible net worth covenants as set forth in the Demand Credit Agreement. The fourth waiver provided by CIBC extended the waiver period from January 31, 2011 through February 14, 2011 and also provided for a fee payable to CIBC for the extension as well as requiring the elimination of any margin deficit by February 14, 2011. In the event the Company and its subsidiary, ESWC, failed to comply with the terms of the waiver and meet the current ratio and effective tangible net worth covenants prior to the end of the waiver period, same could constitute an event of default as set forth in the Demand Credit Agreement unless a further waiver or modification to the Demand Credit Agreement could be obtained.

The closing of the \$3 million unsecured subordinated promissory notes effective February 17, 2011 allowed the Company and its subsidiaries to comply with covenants and obligations under the Demand Credit Agreement with CIBC dated March 10, 2010.

Effective May 31, 2011, the Company's wholly-owned subsidiary ESWC entered into a further modification of its Demand Credit Agreement dated March 10, 2010 (the "Credit Agreement") whereby it received an extension on the term of its Demand Credit Agreement from its commercial lender through June 30, 2011. The new modification was subject to all covenants and the security margin under the Demand Credit Agreement remaining in order at all times. The commercial lender and the Company agreed to reduce the Operating Loan limit as defined in the Demand Credit Agreement to a maximum of \$1,500,000 Canadian or the borrowing base established by the security margin if less; all loans made by the commercial lender were to be satisfied and the credit facilities cancelled upon the earlier of the completion of the Company's rights offering or June 30, 2011. The commercial lender had also advised that any reasonable request for an extension of the June 30, 2011 date would be considered in light of the Company's rights offering. With the modification to the Demand Credit Agreement, the Company's wholly-owned subsidiary ESWC agreed to pay a fee to its commercial lender for the extension including reasonable legal and advisory fees.

Effective July 18, 2011, ESW's wholly-owned subsidiary ESW Canada Inc, paid its senior lender the amount of \$1.5 million (Canadian dollars) from the proceeds of the rights offering (see Note 12) to liquidate the outstanding balance on the bank loan. The senior lender has also discharged all liens, encumbrances and securities against the Company and its subsidiaries and cancelled the March 31, 2010 demand revolving credit facility agreement.

As of December 31, 2011 and December 31, 2010, \$0 and \$3,424,889, respectively, was owed under the credit facility to CIBC.

NOTE 9 - REDEEMABLE CLASS A SPECIAL SHARES

700,000 Class A special shares authorized, issued, and outstanding.	\$453,900 (based on the historical exchange rate at the time of issuance.)
---	--

The redeemable Class A special shares were issued by the Company's wholly-owned subsidiary, BBL, without par value, and are redeemable on demand by the holder of the shares, which is a private Ontario Corporation, at \$700,000 Canadian (which translates to \$688,310 U.S. and \$703,801 U.S. at December 31, 2011 and 2010, respectively). As the redeemable Class A special shares were issued by the Company's wholly-owned subsidiary, BBL, the maximum value upon which the Company is liable is the net book value of BBL. As of December 31, 2011, BBL had an accumulated deficit of \$1,194,705 U.S. (\$1,847,203 Canadian) and \$1,192,858 U.S. (\$1,845,375 Canadian) as of December 31, 2010, respectively therefore, the holder would be unable to redeem the redeemable Class A special shares at their ascribed value.

NOTE 10 - CONVERTIBLE DEBENTURES

Included in the consolidated financial statements at December 31, 2011 is the effect of an exchange feature included in the terms of the Share Subscription Agreement for \$3,000,000 of Convertible Debentures issued on March 19, 2010, ("2010 Debentures"). The March 2010 Convertible Debentures were fully converted, including interest, into 6,007,595 shares of common stock on March 25, 2010. The exchange feature provided that if within twelve months from March 19, 2010, the Company enters into or closes another financing or other transaction (which for securities law purposes would be integrable with the offer and sale of the Securities) on terms and conditions more favorable to another purchaser, the terms and conditions of the 2010 Debentures shall be adjusted to reflect the more favorable terms. The exchange feature was determined by the Company to be a freestanding financial instrument and also to be a liability within the scope of ASC 480, Distinguishing Liabilities from Equity, since there is an inverse relationship between the stock price of the Company and the Company's obligation. On December 31, 2010, the Company evaluated the fair value of the exchange feature based on the probability of closing another financing by March 18, 2011, and the fair value of the number of incremental shares to be issued at a lower estimated issue price. The probability of closing another financing by March 18, 2011, was estimated to be 100% on December 31, 2010. The fair value of the Company's common stock was determined by the closing price on the valuation date. On December 31, 2010, an exchange feature liability of \$1,680,000 was recorded for the 2010 Debentures (see Note 12). Effective February 17, 2011, the Company and the 2010 Debenture investors reached an agreement ("the anti-dilution agreement") whereby the investors would receive an approximate aggregate of 19,000,000 additional shares of Common Stock at an estimated price of \$0.12 in conjunction with certain rights under the Prior Subscription Agreements in the event the Company closed a Qualified Offering (see Note 7). At March 31, 2011, the exchange feature liability related to the 2010 Debenture was recorded at a fair value of \$2,280,000 with the change in fair value of exchange feature liability of \$578,739 recorded as an expense in the consolidated statement of operations and comprehensive loss.

At June 30, 2011, concurrent with the closing of the rights offering, the anti-dilution agreements were also closed. The exchange feature liability was transferred to equity towards the issuance of 19,000,000 shares of Common Stock at a price of \$0.12 per share.

EXCHANGE FEATURE LIABILITY TABLE

Transaction Detail	Original Instrument	Additional Shares	Exchange Feature Liability December 31, 2010	Change in fair value of exchange feature liability March 31, 2011	Exchange Feature Liability March 31, 2011	Exchange Feature Liability December 31, 2011	Comments
March 2010 Offering	Convertible Debenture	19,000,000	\$ 1,680,000	\$ 600,000	\$ 2,280,000	\$ --	See Note 10
November 2010 Offering	Common Stock and Warrants	1,750,000	225,600	(9,300)	216,300	--	See Note 12
December 2010 Offering	Common Stock and Warrants	1,750,000	228,262	(11,961)	216,300	--	See Note 12
Totals		22,500,000	\$ 2,133,862	\$ 578,739	\$ 2,712,600	\$ --	

There were no convertible debentures outstanding and zero corresponding accrued interest as of December 31, 2011 and December 31, 2010. As of December 31, 2010, the debt discount of \$768,981 and deferred cost of \$117,131 were fully amortized and expensed due to the conversion of the debentures effective March 25, 2010.

LEGAL FEES RELATED TO THE 2010 CONVERTIBLE DEBENTURES

The Company had also recorded a deferred cost asset of \$80,625 for legal fees paid in relation to the issuance of the 2010 Debentures. The deferred costs were being amortized over the term of the 2010 Debentures using the straight line method. At December 31, 2010, the deferred cost assets were fully amortized due to the conversion of the debentures effective March 25, 2010.

NOTE 11- INCOME TAXES

As of December 31, 2011, there are tax loss carry forwards for Federal income tax purposes of approximately \$27,762,196 available to offset future taxable income in the United States. The tax loss carry forwards expire in various years through 2031. The Company does not expect to incur a Federal income tax liability in the foreseeable future. Accordingly, a valuation allowance for the full amount of the related deferred tax asset of approximately \$9,716,769 has been established until realizations of the tax benefit from the loss carry forwards meet the "more likely than not" criteria.

YEAR	LOSS CARRY FORWARD
1999	\$ 407,067
2000	2,109,716
2001	2,368,368
2002	917,626
2003	637,458
2004	1,621,175
2005	2,276,330
2006	3,336,964
2007	3,378,355
2008	3,348,694
2009	2,927,096
2010	2,269,987
2011	2,163,360
Total	\$27,762,196

Additionally, as of December 31, 2011, the Company's two wholly-owned Canadian subsidiaries had non-capital tax loss carry forwards of approximately \$13,352,099 available to be used, in future periods, to offset taxable income. The loss carry forwards expire in various years through 2031. The deferred tax asset of approximately \$3,538,306 has been fully offset by a valuation allowance until realization of the tax benefit from the non-capital tax loss carry forwards are more likely than not.

Financing charge on embedded derivative liability	169,785	--
Inducement premium on conversion of debentures	--	1,018,455
Stock-based compensation	62,980	32,616
Gain on convertible derivative	(467,756)	--
Long-term debt interest expense accretion	1,227,126	269,143
Mark to market adjustment on advance share subscription	--	(436,492)
Accrued interest on loans	--	(116,212)
	<u>(1,611,570)</u>	<u>(1,673,353)</u>
Benefit of losses not recognized	1,611,570	1,673,353
Income tax provision (recovery) per financial statements	<u>\$ --</u>	<u>\$ --</u>

Components of deferred income tax assets are as follows:

	As at December 31,	
	2011	2010
Property, plant and equipment	\$ 488,494	\$ 119,226
Tax loss carry forwards	13,255,075	11,550,796
Total	13,743,569	11,670,022
Valuation allowance	(13,743,569)	(11,670,022)
Carrying value	\$ --	\$ --

Based on the Company's current tax loss position tax benefits to be recognized is more-likely-than-not to be sustained upon examination by taxing authorities. The Company does not believe there will be any material changes in its unrecognized tax positions over the next twelve months.

The Company will recognize interest and penalties related to unrecognized tax benefits within the income tax expense line in the consolidated statement of operations and comprehensive loss. Accrued interest and penalties will be included within the related tax liability line in the consolidated balance sheet.

In many cases the Company's uncertain tax positions are related to tax years that remain subject to examination by tax authorities. The following describes the open tax years, by major tax jurisdiction, as of December 31, 2011:

United States - Federal	2007 - present
United States - State	2007 - present
Canada - Federal	2008 - present
Canada - Provincial	2008 - present

Valuation allowances reflect the deferred tax benefits that management is uncertain of the Company's ability to utilize in the future.

NOTE 12 - STOCKHOLDERS' EQUITY

On March 25, 2010, the Company issued 43,756,653 shares of common stock in connection with the conversion of 2008 Debentures and 2009 Debentures into equity.

On March 25, 2010, the Company issued 6,007,595 shares of restricted common stock in connection with the conversion of 2010 Debentures into equity.

On November 30, 2010, the Company issued 4,375,668 shares as an inducement premium to the holders to convert all convertible debentures outstanding as of March 25, 2010.

Effective October 14, 2010 the Company's Board of Directors approved an increase in the authorized share capital.

Effective November 9, 2010 and December 8, 2010, the Company closed on its first tranche and second tranche of a unit offering in the amount of \$300,000 per tranche for gross proceeds of \$600,000 whereby the Company issued 1,500,000 ("Unit Offering") units. The unit offering was for up to \$5 million. The units were in the form of shares of the Company's common stock, par value \$0.001 at \$0.40 per share plus for each share of Common Stock subscribed to under the unit offer the investor would receive one warrant, the exercise price would be \$0.55; if an Investor Warrant was exercised between the first and second years from issuance, the exercise price would be \$0.65. All investor warrants as issued would be subject to adjustment in all respects in the event of a stock split or similar adjustment by the Company. A commission of 4% of the gross proceeds was paid from the proceeds of the unit offering and 7.5 units for every \$100 of the gross proceeds raised were payable for brokers' fees were treated as a cost of capital and no income statement recognition was required.

The Share Subscription Agreement for the units contained an exchange feature which provides that if within six months from effective date of closing, the Company entered into or closed another financing or other transaction (which for securities law purposes would be integrable with the offer and sale of the Securities) on terms and conditions more favorable to another purchaser, the terms and conditions of the unit offering would be adjusted to reflect the more favorable terms. The exchange feature was determined by the Company to be a freestanding financial instrument and also to be a liability within the scope of ASC. On November 9, 2010, December 8, 2010 and December 31, 2010, the Company evaluated the fair value of the exchange feature based on the probability of closing another financing within six months and the fair value of the number of incremental shares and warrants to be issued at a lower estimated issue price for units. The probability of closing another financing in the next six months on November 9, 2010 and December 8, 2010 was estimated to be 50% and on December 31, 2010 was estimated to be 100%.

The fair value of the Company's common stock was determined by the closing price on the valuation date and the fair value of the warrants was determined using a binomial option valuation model. Key assumptions for the binomial option valuation were as follows:

November 9, 2010 Offering

<u>Valuation Date</u>	<u>Nov. 9, 2010</u>	<u>Nov. 9, 2010 - lower estimated strike price</u>	<u>Dec. 31, 2010</u>	<u>Dec. 31, 2010 - lower estimated strike price</u>
Strike Price - second year	\$0.65	\$0.63	\$0.65	\$0.36
Strike Price - first year	\$0.55	\$0.54	\$0.55	\$0.30
Closing market price	\$0.39	\$0.39	\$0.22	\$0.22
Volatility	135.72%	135.72%	113.47%	113.47%
Time to expiration	2 years	2 years	1.83 years	1.83 years
Risk free rate	0.46%	0.46%	0.61%	0.61%
Dividend yield	0%	0%	0%	0%

December 8, 2010 Offering

<u>Valuation Date</u>	<u>Dec. 8, 2010</u>	<u>Dec. 8, 2010 - lower estimated strike price</u>	<u>Dec. 31, 2010</u>	<u>Dec. 31, 2010 - lower estimated strike price</u>
Strike Price - second year	\$0.65	\$0.39	\$0.65	\$0.36
Strike Price - first year	\$0.55	\$0.33	\$0.55	\$0.30
Closing market price	\$0.24	\$0.24	\$0.22	\$0.22
Volatility	132.07%	132.07%	117.03%	117.03%
Time to expiration	2 years	2 years	1.92 years	1.92 years
Risk free rate	0.63%	0.63%	0.61%	0.61%
Dividend yield	0%	0%	0%	0%

On December 31, 2010, an exchange feature liability of \$453,862 was recorded for the unit offering.

Effective February 17, 2011, the Company and the Unit Offering investors reached an agreement whereby the investors received an approximate aggregate of 3,500,000 additional shares of Common Stock at an estimated price of \$0.12 in conjunction with certain rights under the Share Subscription Agreements in the event the Company closed a Qualified Offering (see Note 7). At March 31, 2011 the exchange feature liability related to the shares in the Unit Offering was recorded at a fair value of \$432,600. At March 31, 2011 the exchange feature liability related to the warrants in the Unit Offering was recorded at a fair value of \$0 since the probability of Company exchanging warrants with a lower strike price is estimated to be 0%. The change in fair value of exchange feature liability related to the Unit Offering of \$(21,262) was recorded as a reduction of the loss on fair value of exchange feature liability related to the 2010 Debentures.

The following table sets forth a summary of the shares issued on July 15, 2011 as a result of the closing of the rights offering effective June 30, 2011:

	<u>Number of Shares</u>	<u>Amount</u>
Subscription receivable at June 30, 2011	32,143,170	\$3,857,180
Conversion of notes payable to related parties and related accrued interest (see Note 7)	34,390,418	4,126,850
Conversion of accrued expenses	136,424	16,374
Reclassification of conversion option liabilities to equity (see Note 7)	--	2,654,730
Conversion of exchange feature liability (see Note 10)	22,500,000	2,712,600
Rights offering costs	--	(419,410)
Total	89,170,012	\$12,948,324

Effective November 6, 2011 the Company issued 400,000 restricted shares of common stock to two board members in connection with restricted stock grants under the 2010 stock incentive plan.

Effective November 6, 2011 the Company issued 166,668 restricted shares of common stock to four board members in lieu of outstanding board fees.

Effective December 31, 2011 the Company issued 250,000 restricted shares of common stock to five board members in connection with restricted stock grants under the 2010 stock incentive plan.

NOTE 13 - STOCK OPTIONS AND WARRANT GRANTS

On April 15, 2010 the Board of Directors granted an aggregate award of 900,000 stock options to a former executive officer and former director and one director. The options vest over a period of three years with an exercise price of \$0.65 (fair market value of the Company's common stock as of the date of grant) with expiry five years from the date of award. Effective February 7, 2011, with the resignation of a director, the unvested portion of the stock options cancelled as a result of the resignation. The balance of the stock option expense of the April 15, 2010 award is as follows:

DATE	STOCK OPTION EXPENSE
April 15, 2011	\$ 62,127
April 15, 2012	\$ 82,836
April 15, 2013	\$ 20,709

During the year ended December 31, 2011, 475,000 stock options were issued, of which 225,000 of these stock options reported previously as vesting over three years starting June 30, 2012. The 225,000 stock options compensation expense was to be recognized as an expense over the vesting period, which was to originally begin June 30, 2012. Consequently the Company had not previously recognized a compensation expense in relation to these options. As of October 6, 2011 the vesting terms of these 225,000 options were amended to be as of October 6, 2011 and vest immediately at that date. The amended stock option expense for these options has been recorded in the current reporting period.

A summary of option transactions, including those granted pursuant to the terms of certain employment and other agreements is as follows:

DETAILS	STOCK PURCHASE OPTIONS	WEIGHTED AVERAGE EXERCISE PRICE
OUTSTANDING, JANUARY 1, 2010	3,670,000	\$ 0.76
Granted	900,000	\$ 0.65
Expired	(970,000)	(\$ 0.97)
OUTSTANDING, DECEMBER 31, 2010	3,600,000	\$ 0.68
Granted	475,000	\$ 0.12
Expired or Cancelled	(500,000)	(\$ 0.73)
OUTSTANDING, DECEMBER 31, 2011	3,575,000	\$ 0.60

At December 31, 2011, and December 31, 2010 the outstanding options have a weighted average remaining life of 13 months and 23 months, respectively.

The weighted average fair value of options granted during 2011 were \$0.02 and \$0.07 and options granted during 2010 was \$0.41 and were estimated using the Black-Scholes option-pricing model, using the following assumptions:

	<u>2010</u>	<u>2011</u>
Expected volatility	117%	111%
Risk-free interest rate	1.08%	0.42%
Expected life	4 yrs	1.5 yrs
Dividend yield	0.00%	0.00%
Forfeiture rate	0.00%	0.00%

The Black-Scholes option-pricing model used by the Company to calculate options and warrant values was developed to estimate the fair value of freely tradable, fully transferable options without vesting restrictions, which significantly differ from the Company's stock purchase options and warrants. The model also requires highly subjective assumptions, including future stock price volatility and expected time until exercise, which greatly affect the calculated values. Accordingly, management believes that this model does not necessarily provide a reliable single measure of the fair value of the Company's stock options and warrants.

At December 31, 2011, the Company had outstanding options as follows:

NUMBER OF OPTIONS	EXERCISE PRICE	EXPIRATION DATE
2,150,000	\$0.71	February 16, 2012
100,000	\$1.00	February 8, 2013
250,000	\$0.27	August 6, 2013
600,000	\$0.65	April 15, 2015
250,000	\$0.12	December 31, 2012
225,000	\$0.12	June 30, 2016
3,575,000		

Warrants issued in connection with various private placements of equity securities are treated as a cost of capital and no income statement recognition is required. A summary of warrant transactions is as follows:

DETAILS	WEIGHTED AVERAGE	
	WARRANT SHARES	EXERCISE PRICE
OUTSTANDING, JANUARY 1, 2010	--	\$ --
Granted	1,545,000	\$ 0.65
Exercised	--	\$ --
Expired	--	\$ --
OUTSTANDING, DECEMBER 31, 2010 & DECEMBER 31, 2011	1,545,000	\$ 0.65

Effective November 9, 2010 and December 8, 2010, the Company closed on its first tranche and second tranche of a unit offering in the amount of \$300,000 per tranche for gross proceeds of \$600,000 whereby the Company issued 1,500,000 units. The unit offering was for up to \$5 million. The units were in the form of shares of the Company's common stock, at \$0.40 per share plus for each share of Common Stock subscribed to under the unit offer the investor received one warrant exercisable for 1 share of common stock at \$0.55; if an Investor Warrant is exercised between the first and second years from issuance, the exercise price will be \$0.65. All investor warrants as issued are subject to adjustment in the event of a stock split or similar adjustment by the Company. A commission of 4% of the gross proceeds was paid and 7.5 units for every \$100 of the gross proceeds raised were payable for brokers' fees.

No warrants were issued during the year ended December 31, 2011.

Effective November 6, 2011 the board approved restricted stock grants to 7 board members under the 2010 stock incentive plan, as per the terms of the grant each of the 7 board members will receive 150,000 shares vesting in equal parts on December 31, 2011, December 31, 2012 and December 31, 2013 subject to the execution of the requisite grant agreements. The board also approved restricted stock grants to 2 board members for serving as chair to various committees, as per the terms of the grant each of the 2 board members will receive 200,000 shares vesting immediately subject to the execution of the requisite grant agreements. Stock based compensation expense will be recorded as of the vesting terms of the grants. Of the vested shares 650,000 restricted shares of common stock have been issued as of December 31, 2011.

During the year ended December 31, 2011 and 2010, \$180,761 and \$93,189, respectively, has been recorded in the consolidated statements of operations and comprehensive loss for stock based compensation.

NOTE 14 - RELATED PARTY TRANSACTIONS

During the year ended December 31, 2011, in addition to fees and salaries as well as reimbursement of business expenses, transactions with related parties include:

- \$4,000,000 issuance of unsecured subordinated promissory notes (see Note 7 to the consolidated financial statements).
- Investment agreement with Bridge lenders Effective May 10, 2011, (see Note 7 to the consolidated financial statements).
- The effect of an exchange feature included in the terms of the Share Subscription Agreement for \$3,000,000 of Convertible Debentures issued on March 19, 2010 ("2010 Debentures") and fully converted including interest into 6,007,595 shares of common stock on March 25, 2010. The exchange feature provides that if within twelve months from March 19, 2010, the Company entered into or closed another financing or other transaction (which for securities law purposes would be integrable with the offer and sale of the Securities) on terms and conditions more favorable to another purchaser, the terms and conditions of the 2010 Debentures shall be adjusted to reflect the more favorable terms. The exchange feature was determined by the Company to be freestanding financial instrument and also to be a liability within the scope of ASC 480 Distinguishing Liabilities from Equity since there is an inverse relationship between the stock price of the Company and the Company's obligation. On December 31, 2010, the Company evaluated the fair value of the exchange feature based on the probability of closing another financing by March 18, 2011 and the fair value of the number of incremental shares to be issued at a lower estimated issue price. The probability of closing another financing by March 18, 2011 was estimated to be 100% on December 31, 2010. The fair value of the Company's common stock was determined by the closing price on the valuation date. On December 31, 2010, an exchange feature liability of \$1,680,000 was recorded for the 2010 Debentures (see Note 12). Effective February 17, 2011, the Company and the 2010 Debenture investors reached an agreement whereby the investors will receive an approximate aggregate of 19,000,000 additional shares of Common Stock in conjunction with certain rights under the Prior Subscription Agreements in the event the Company closed a qualified offering (see Note 7). At March 31, 2011 the exchange feature liability related to the convertible debentures was re-valued to \$2,280,000 with the change in fair value of exchange feature liability of \$578,738 expense recorded in the consolidated statements of operations and comprehensive loss. In March 2010, Orchard invested \$1 million in the \$3 million convertible debentures offering; of the exchange feature liability \$760,000 was attributed to the investment made by Orchard based on their relative contribution to the March 2010 subscription, this amount was transferred to equity as of June 30, 2011. Orchard received 6,333,333 additional shares of Common Stock in conjunction with certain rights under the Prior Subscription Agreements as the Company closed its Qualified Offering on June 30, 2011 (see Note 7).
- \$275,000 related to services provided by Orchard Capital Corporation under a services agreement effective January 30, 2011. On April 19, 2011, the Company's Board of Directors ratified a Services Agreement ("Agreement") between the Company and Orchard Capital Corporation ("Orchard") which was approved by the Company's Compensation Committee. Under the Agreement, which was effective as of January 30, 2011, Orchard agreed to provide services that may be mutually agreed to by and between Orchard and the Company including those duties customarily performed by the Chairman of the Board and executive of the Company as well as providing advice and consultation on general corporate matters and other projects as may be assigned by the Company's Board of Directors as needed. Orchard has agreed to appoint Mark Yung, who is also employed by Orchard, as the Company's Executive Chairman to act on Orchard's behalf and provide the services to the Company under the Agreement. Orchard reserves the right to replace Mr. Yung as the provider of services under the Agreement at its sole option. The Agreement may be terminated by either party upon thirty (30) days written notice unless otherwise provided for under the Agreement. Compensation under the agreement is the sum of \$300,000 per annum plus reimbursement for out-of-pocket expenses incurred by Orchard. The agreement includes other standard terms including indemnification and limitation liability provisions. Orchard is controlled by Richard Ressler; affiliated entities of Orchard as well as Richard Ressler own shares of the Company.

• Mr. Nitin Amersey who is a director of the Company is listed as a control person with the Securities and Exchange Commission of Bay City Transfer Agency Registrar Inc., the Company's transfer agent. He has no ownership equity in Bay City Transfer Agency Registrar Inc. nor is he an officer or a director of Bay City Transfer Agency Registrar Inc. For the twelve month periods ended December 31, 2011 and 2010, the Company paid Bay City Transfer Agency Registrar Inc. \$18,054 and \$7,363 respectively.

For the year ended December 31, 2011 and 2010, Mr. Nitin Amersey received \$0 and \$25,500 for consulting services to the Company.

Mr. Peter Bloch a prior director of the Company provided consulting services to the Company. For the year ended December 31, 2011 and 2010, the Company paid Mr. Bloch \$88,796 and \$112,104 for consulting services.

During the twelve month period ended December 31, 2010 additional transactions with related parties included \$6,134,024 related to conversion of convertible debentures including interest of \$634,024 thereon into common stock; \$1,032,849 related to inducement on early conversion of convertible debentures; and the repayment of \$511,342 principal and interest on promissory note in addition to salaries and reimbursement of business expenses.

NOTE 15 - COMMITMENTS AND CONTINGENCIES

LEASES

Effective November 24, 2004, the Company's wholly-owned subsidiary, ESWA, entered into a lease agreement for approximately 40,220 square feet of leasehold space at 2 Bethlehem Pike Industrial Center, Montgomery Township, Pennsylvania. The leasehold space houses the Company's research and development facilities and also houses ESW's new manufacturing operations. The lease commenced on January 15, 2005 and was to expire January 31, 2010. Effective October 16, 2009, the Company's wholly-owned subsidiary ESWA entered into a lease renewal agreement with Nappen & Associates for the leasehold property in Pennsylvania. There were no modifications to the original economic terms of the lease under the lease renewal agreement. Under the terms of the lease renewal, the lease term will now expire February 28, 2013. Effective March 31, 2011, ESWA entered into a lease amendment agreement with Nappen & Associates for the leasehold property in Pennsylvania, whereby ESWA has the sole option to extend the expiry of the lease agreement by an additional 3 years if exercised, six months prior to February 28, 2013; there were no modifications to the original economic terms of the lease.

Effective December 20, 2004, the Company's wholly-owned subsidiary, ESWC, entered into an offer to lease agreement for approximately 50,000 square feet of leasehold space in Concord, Ontario, Canada. The leasehold space houses the Company's executive offices and previously housed the manufacturing operations. The possession of the leasehold space took place on May 24, 2005 and the term of the lease was extended to September 30, 2010. ESWC renewed its lease agreement at the current property for an additional five year term. The renewed lease period commenced on October 1, 2010 and ends on September 30, 2015.

The following is a summary of the minimum annual lease payments, for both leases;

<u>YEAR</u>	
2012	\$454,642
2013	306,305
2014	283,603
2015	212,703
	<hr/>
	\$1,257,253

LEGAL MATTERS

From time to time, the Company may be involved in a variety of claims, suits, investigations and proceedings arising from the ordinary course of our business, breach of contract claims, labor and employment claims, tax and other matters. Although claims, suits, investigations and proceedings are inherently uncertain and their results cannot be predicted with certainty, ESW believes that the resolution of current pending matters will not have a material adverse effect on its business, consolidated financial position, results of operations or cash flow. Regardless of the outcome, litigation can have an adverse impact on ESW because of legal costs, diversion of management resources and other factors. In addition, it is possible that an unfavorable resolution of one or more such proceedings could in the future materially and adversely affect ESW's financial position, results of operations or cash flows in a particular period.

CAPITAL LEASE OBLIGATION

The Company is committed to the following lease payments in connection with the acquisition of equipment under capital leases:

<u>YEAR</u>	
2012	\$1,259
Less imputed interest	(18)
Total obligation under capital lease	<u>1,241</u>
Less: current portion	(1,241)
Total long-term portion	<u>\$ 0</u>

The Company incurred \$17 and \$2,374 of interest expense on capital lease obligation for the twelve month periods ended December 31, 2011 and 2010, respectively.

NOTE 16 – OPERATING SEGMENTS

The Company also derives revenue (4.8% of total revenue in 2011, and 1.5% in 2010) from providing air testing and environmental certification services. For the years ended December 31, 2011 and 2010, all revenues were generated from the United States. Expenses incurred in the United States in 2011 relate to air testing, environmental certification services and catalyst manufacturing operation, in 2010 catalyst manufacturing operations were located in Canada. During the years ended December 31, 2011 and 2010, cost of sales of \$2,753,997 and \$289,369, officers' compensation and directors fees of \$74,645 and \$117,375, marketing, office and general costs of \$940,304 and \$482,880, consulting and professional fees of \$74,136 and \$74,170, depreciation and amortization of \$302,207 and \$239,319 and research and development of \$353,922 and \$649,052 (net of grant funding), respectively.

As of December 31, 2011, property, plant and equipment, net of accumulated depreciation, located at the air testing facility and the manufacturing facility in Pennsylvania amounted to \$943,500 (2010 - \$1,182,263) and \$281,088 (2010 - \$0), respectively. All remaining long lived assets are located in Concord, Ontario.

NOTE 17 - RESTRUCTURING CHARGES

During March 2011, the Board of Directors approved a restructuring plan (the "Restructuring Plan"), that the Company's executive management then implemented. As part of the Restructuring Plan the Company accrued the expenses related to severance agreements with its former Chief Executive Officer, Vice President of Operations and Director of Sales and certain production employees. As of December 31, 2011, \$0 (December 31, 2010 - \$0) was included in accrued liabilities related to the balance of severance payments still outstanding. No further expense related to severance payments is expected.

In August 2011, the Company's restructuring plan was expanded to include a reorganization plan to reduce its overhead costs by re-locating its Canadian manufacturing operations into its facilities located in the United States. The Board of Directors approved the amendment to the Restructuring Plan. ESW believes that the synergies from operating at a single location will provide significant financial and logistical advantages, as well as synergies with its testing operations also located in the same facility. ESW has transitioned the production from Concord, Ontario, Canada to its existing facility located in Montgomeryville, PA, United States. ESW recognized a loss on impairment of property plant and equipment of \$0.16 million for the twelve month period ended December 31, 2011 and restructuring charges amounted to \$1.38 million. In addition, ESW expects to incur an additional \$0.1 million of restructuring charges associated with the closure of the facility and transfer of manufacturing equipment in 2012. Key components of our transition plan have been completed by December 31, 2011.

In accordance with ASC 420-10-25-11 costs to terminate an operating lease arise when a lessee will either: (a) terminate an operating lease; or (b) if it is unable to terminate the lease, discontinue its use of the asset and continue to make lease payments over the remaining term of the lease without benefit. When the lease will be terminated, the lessee should recognize a liability for the cost of terminating the lease at the time the lease is terminated. If the lease will not be terminated and the lessee will continue to incur costs under the lease without future benefit, the lessee should recognize a liability on the cease-use date (the date the lessee discontinues its use of the asset). In accordance with paragraphs 420-10-30-7 through 30-9, a liability for the remaining lease rentals, reduced by actual (or estimated) sublease rentals, would be recognized and measured at its fair value at the cease-use date. In accordance with paragraphs 420-10-35-1 through 35-4, the liability would be adjusted for changes, if any, resulting from revisions to estimated cash flows after the cease-use date, measured using the credit-adjusted risk-free rate that was used to measure the liability initially. The fair value estimate at the cease-use date amounts to \$0.14 million associated with the release of its manufacturing facility at Concord, Ontario, Canada. This fair value estimate will be re-measured and recorded as a liability at June 30, 2012 the expected release date of the facility (revised from previous estimate which was to release by December 31, 2011), any sub-lease or rent earned from the Concord, Ontario, Canada facility in excess of the fair value estimate will be used to offset this liability.

Major components of the restructuring expenses are tabulated below:

Details	Budgeted Restructuring Costs	Three months ended December 31, 2011	Twelve months ended December 31, 2011
Severance agreements	\$670,870	\$103,265	\$748,155
Training and set up expenses	384,500	48,566	172,748
Travel and moving expenses	93,127	28,708	125,395
Software impairment	--	--	133,542
Product line changes	--	--	125,113
Others	20,873	57,062	80,732
Totals	\$1,169,370	\$237,601	\$1,385,685

Restructuring charges relate to changes in the management and reductions in work force of the Company's subsidiary, ESW Canada Inc., hiring, training, moving, relocation charges related to the setup of the new subsidiary, Technology Fabricators Inc., and write downs related to changes in business strategy, product and software as a result of the decision to relocate operations. Budgeted amounts include amounts estimated for moving, additional training and relocation expenses that have not been accrued as of December 31, 2011 as these items are expensed as incurred.

The Company expensed amounts related to severance agreements with its former Chief Executive Officer, Vice President of Operations and Director of Sales and certain production employees, no further expense related to severance payments are expected related to the 2011 restructuring.

NOTE 18 - LOSS PER SHARE

Potential common shares of 3,575,000 related to ESW's outstanding stock options and 1,545,000 shares related to ESW's outstanding warrants, were excluded from the computation of diluted loss per share for the year ended December 31, 2011 because the inclusion of these shares would be anti-dilutive.

Potential common shares of 3,600,000 related to ESW's outstanding stock options and 4,375,665 shares related to ESW's advance share subscription were excluded from the computation of diluted loss per share for the year ended December 31, 2010 because the inclusion of these shares would be anti-dilutive.

Consequently, for the years ended December 31, 2011 and 2010, basic and diluted loss per share are equal. The reconciliation of the number of shares used to calculate the diluted loss per share is calculated as follows:

	For the Year ended December 31,	
	<u>2011</u>	<u>2010</u>
NUMERATOR		
Net loss for the year	\$ (9,127,088)	\$ (9,447,641)
Interest on long-term debt	-	183,858
Amortization of deferred costs	-	117,131
Long-term debt accretion	-	768,981
Inducement premium	-	2,909,872
Mark to market adjustment on advance share subscription	-	(1,247,119)
Change in fair value of exchange feature liability	578,739	2,021,213
Interest on notes payable to related party	126,850	11,342
Interest accretion expense	3,506,074	-
Financing charge on embedded derivative liability	485,101	-
Gain on convertible derivative	(1,336,445)	-
Bank fees related to credit facility covenant waivers	154,205	-
	<u>\$ (5,612,564)</u>	<u>\$ (4,682,363)</u>
DENOMINATOR		
Weighted average number of shares outstanding	170,818,147	112,793,477
Dilutive effect of :		
Stock options	--	--
Warrants	--	--
Exchange feature liability share	--	--
Exchange of unsecured subordinated promissory notes and rights	--	--
DILUTED WEIGHTED AVERAGE SHARES OUTSTANDING	<u>170,818,147</u>	<u>112,793,477</u>

NOTE 19 - RISK MANAGEMENT

CONCENTRATIONS OF CREDIT RISK AND ECONOMIC DEPENDENCE

The Company's cash balances are maintained in various banks in Canada and the United States. Deposits held in banks in the United States are insured up to \$250,000 per depositor for each bank by the Federal Deposit Insurance Corporation. Deposits held in banks in Canada are insured up to \$100,000 Canadian per depositor for each bank by The Canada Deposit Insurance Corporation, a federal Crown corporation. Actual balances at times may exceed these limits.

Accounts Receivable and Concentrations of Credit Risk: The Company performs on-going credit evaluations of its customers' financial condition and generally does not require collateral from its customers. The Company also manages its credit risk by insuring certain of its accounts receivable. Three of its customers accounted for 41.2%, 15.7% and 10.6%, of the Company's revenue during the year ended December 31, 2011 and 37.4%, 25.1% and 14.0%, respectively, of its accounts receivable as of December 31, 2011.

Three of the Company's customers accounted for 21%, 19%, and 13%, of the Company's revenue during the year ended December 31, 2010 and 48%, 21%, and 13%, respectively, of its accounts receivable as at December 31, 2010.

For the year ended December 31, 2011, the Company purchased approximately 28.7% and 13.5% of its inventory from two vendors (2010 – two vendors 27.0% and 11.1%). The accounts payable to these two vendors aggregated approximately \$511,271 and \$786,163 as of December 31, 2011 and 2010, respectively.

NOTE 20 - COMPARATIVE FIGURES

Certain 2010 figures have been reclassified to conform to the current financial statement presentation.

NOTE 21 - SUBSEQUENT EVENTS

Effective February 3, 2012 ESW's wholly-owned non-operational subsidiary BBL Technologies Inc., filed for bankruptcy in the Province of Ontario, Canada. Estimation of the effect of the bankruptcy proceedings on the consolidated financial statements of ESW cannot be made until the bankruptcy procedures are complete.

Effective March 5, 2012, ESW's board approved the financing of ESW America's purchase of new dynamometers and air testing equipment under the Pennsylvania Department Of Community & Economic Development - Machinery & Equipment Loan Fund ("MELF"). MELF is designed to assist Pennsylvania businesses in modernizing and upgrading their plants through low interest, long-term loans for machinery and equipment. ESW America has been approved for \$0.5 million of MELF funding.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

In 2011 there were no changes or disagreements.

ITEM 9A. CONTROLS AND PROCEDURES

DISCLOSURE CONTROLS AND PROCEDURES

Under the supervision and with the participation of ESW's management, including ESW's Executive Chairman and Chief Financial Officer, ESW evaluated the effectiveness of the design and operation of its disclosure controls and procedures (as defined in Rule 13a-15(e) under the Exchange Act) as of December 31, 2011 (the "Evaluation Date"). Based upon that evaluation, the Executive Chairman and Chief Financial Officer concluded that, as of the Evaluation Date, ESW's disclosure controls and procedures were effective to provide reasonable assurance to ensure that information required to be disclosed in ESW's Exchange Act reports is recorded, processed, summarized, and reported within the time periods specified by the Securities and Exchange Commission's rules and forms and that such information is accumulated and communicated to management, including the Executive Chairman and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosures.

CHANGES IN INTERNAL CONTROLS

There was no significant change in the Company's internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) during the last fiscal year that has materially affected, or is reasonably likely to materially affect the Company's internal control over financial reporting.

INTERNAL CONTROL OVER FINANCIAL REPORTING.

MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING.

ESW's management is responsible for establishing and maintaining adequate internal control over financial reporting as such term is defined in Exchange Act Rule 13a-15(f). Internal control over financial reporting is a process designed by, or under the supervision of, ESW's Executive Chairman and Chief Financial Officer and effected ESW's Board of Directors, management and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles, and includes those policies and procedures that: (1) pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of our assets; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that ESW's receipts and expenditures are being made only in accordance with the authorizations of its management and directors; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of our assets that could have a material effect on ESW's consolidated financial statements.

Because of inherent limitations, a control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. Also projections of any evaluation of effectiveness to future periods are subject to the risks that controls may become inadequate because of changes in conditions, or that the degree of compliance with policies or procedures may deteriorate.

Under the supervision of and with the participation of management, including ESW's Executive Chairman and Chief Financial Officer, ESW assessed the effectiveness of its internal control over financial reporting as of December 31, 2011. In making this assessment, management used the framework in INTERNAL CONTROL-INTEGRATED FRAMEWORK issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this assessment, ESW's management concluded that ESW's internal control over financial reporting was adequate as of December 31, 2011.

This annual report does not include an attestation of ESW's registered public accounting firm regarding internal controls over financial reporting as management's report was not subject to attestation by ESW's registered public accounting firm pursuant to Securities and Exchange Commission Rule for small business issuers.

ITEM 9B OTHER INFORMATION

None.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS, AND CORPORATE GOVERNANCE

DIRECTORS AND EXECUTIVE OFFICERS

Certain information concerning the directors and executive officers of the Company is set forth in the following table and in the paragraphs following. Information regarding each such directors and executive officer's ownership of voting securities of the Company appears as "Securities Ownership of Certain Beneficial Owners and Management" below.

FISCAL YEAR 2011

NAME	POSITION	DATE ELECTED/APPOINTED
Mark Yung	Executive Chairman	February 07, 2011
Nitin Amersey	Director	January 2003
John D. Dunlap III	Director	February 2007
John J Suydam	Director	January 25, 2011
John J Hannan	Director	January 25, 2011
Benjamin Black	Director	January 25, 2011
Joshua Black	Director	January 25, 2011
Zohar Loshitzer	Director	January 25, 2011
Frank Haas	Chief Technology Officer and Chief Regulatory Officer	March 09, 2011
Virendra Kumar	Vice President of Operations	March 09, 2011
Praveen Nair	Chief Financial Officer	March 09, 2011

Set forth below is information relating to the business experience of each of the directors and executive officers of the Company.

MARK YUNG, age 38, is a Senior Investment Executive at Orchard Capital, an investment firm located in Los Angeles, California. Mr. Yung currently acts as Executive Chairman of ESW and as a board member of Polymer Plainfield. He joined the Company in 2001 and served in several capacities, such as technical Sales Engineer and Director of Sales. Prior to joining the Company Mr. Haas was employed by Nett Technologies and Husky Injection Moulding, where he served in the roles of technical Sales and Project Engineer. Mr. Haas holds a Bachelor's degree in Mechanical Engineering with specialization in Production Engineering from the University of Applied Sciences in Cologne, Germany.

VIRENDRA KUMAR, age 37, was appointed Vice President of Operations of the Company. Mr. Kumar has been General Manager of ESW America, Inc. ("ESWA") since 2010 and is responsible for the overall operations related to Air Testing Services. Prior to joining ESWA in 2009, Mr. Kumar was employed by Cummins Inc. as an Emission Operations Leader from 2004 through 2009, prior to that by Escort JCB as a design and production engineer, and by the Indian Institute of Technology Delhi as a project manager. Mr. Kumar holds a Master's degree in Mechanical Engineering from the Indian Institute of Technology Delhi and a Bachelor's degree in Mechanical Engineering from the University of Rajasthan. Mr. Kumar was also a PhD candidate at University of California, Riverside.

PRAVEEN NAIR, age 36, was appointed Chief Accounting Officer in February 2008. He joined the Company in May 2005 and served in the position of Assistant to the Chief Financial Officer supporting the Company's Chief Financial Officer in day-to-day operations. In May 2006 he was promoted to Controller for the Company's wholly-owned subsidiaries, ESW America Inc. and ESW Canada Inc. Prior to joining the Company, Mr. Nair was with e-Serve International Ltd, a Citigroup company from December 2000 through January 2005 where he served as a Deputy Manager in the Business Development and Migrations Unit and subsequently as Manager and Senior Manager. He was responsible for feasibility studies and regionalizing operations from countries in Europe, North America and Africa into processing centers in Mumbai and Chennai in India. Mr. Nair has a Bachelor's Degree in Commerce with specialization in Accounting and a Master's Degree in Finance from Faculty of Management Studies, College of Materials Management, Jabalpur, India. Effective March 9, 2011 Mr. Nair was promoted to the position of Chief Financial Officer of the Company.

CORPORATE GOVERNANCE

GENERAL

ESW's management and Board of Directors believe that good corporate governance is important to ensure that the Company is managed for the long-term benefit of its stockholders. This section describes key corporate governance practices that have been adopted.

BOARD OF DIRECTORS MEETINGS AND ATTENDANCE

The Board of Directors has responsibility for establishing broad corporate policies and reviewing overall performance of the Company rather than day-to-day operations. The primary responsibility of ESW's Board of Directors is to oversee the management of the Company and, in doing so, serve the best interests of the Company and its stockholders. The Board of Directors selects, evaluates and provides for the succession of executive officers and, subject to stockholder approval, the election of directors. The Board also reviews and approves corporate objectives and strategies, and evaluates significant policies and proposed major commitments of corporate resources as well as participates in decisions that have a potential major economic impact on our Company. Management keeps the directors informed of Company activity through regular communication, including written reports and presentations at Board of Directors and committee meetings. We have no formal policy regarding director attendance at the annual meeting of stockholders. The Board of Directors held ten (10) meetings in 2011, all of which were telephonic. All board members were in attendance for at least seventy five percent (75%) of the board meetings.

AUDIT COMMITTEE COMPOSITION

The Company has a separately designated standing Audit Committee comprised of Nitin M. Amersey (Chairman) and John Dunlap III. Nitin Amersey qualifies as a "financial expert" as defined by SEC rules. The Company's Board has also determined that Nitin Amersey meets the SEC definition of an "independent" director. The Audit Committee met 6 times during 2011.

COMPENSATION COMMITTEE COMPOSITION

The Compensation Committee is currently comprised of John Dunlap III, who serves as Chairman and Nitin Amersey. In accordance with its charter, the Compensation Committee is responsible for establishing and reviewing the overall compensation philosophy of the Company, establishing and reviewing: the Company's general compensation policies applicable to the executive officers and other officers; evaluating the performance of the executive officer and other officers and approving their annual compensation; reviewing and recommending the compensation of directors; reviewing and recommending employment, consulting, retirement and severance arrangements involving officers and directors of the Corporation; and reviewing and recommending proposed and existing incentive-compensation plans and equity-based compensation plans for the Corporation's directors, officers, employees and consultants. The Compensation Committee met 4 times during 2011.

COMPENSATION POLICY

The objective of the Compensation Committee with respect to compensation for executive officers is to ensure that compensation packages are designed and implemented to align compensation with both short-term and long-term key corporate objectives and employee performance and to ensure that the Corporation is able to attract, motivate and retain skilled and experienced executives in an effort to enhance ESW's success and shareholder value.

The compensation policies are designed to align the interests of management with ESW's shareholders. In order to do so, the committee takes into consideration the experience, responsibility and performance of each individual over the longer term and considers a range of short- and long-term cash, and non-cash compensation elements. The Company believes that this serves the goals of compensating ESW's executive officers competitively on a current basis, tying a significant portion of the executives' compensation to company performance, and allowing the executive officers and key employees to gain an ownership stake in ESW's commensurate with their relative levels of seniority and responsibility. Each year, a review of the executive compensation program, compensation philosophy, committee mission and performance is completed. In addition, each year the committee reviews the nature and amounts of all elements of the executive officers' compensation, both separately and in the aggregate, to ensure that the total amount of compensation is competitive with respect to ESW's peer companies, and that there is an appropriate balance for compensation that is tied to the short- and long-term performance of the Company.

NOMINATION COMMITTEE

The Company does not at present have a formal nominating committee. The full Board of Directors as a group performs the role. The Board does not assign specific weights to particular criteria and no particular criterion is a prerequisite for each prospective nominee. ESW believes that the backgrounds and qualifications of our directors, considered as a group, should provide a significant breadth of experience, knowledge and abilities that will allow its Board to fulfill its responsibilities.

COMPLIANCE WITH SECTION 16(A) OF THE EXCHANGE ACT

Under the securities laws of the United States, the Company's directors, executive officers, and any persons holding more than ten percent of the Company's common stock are required to report their initial ownership of the Company's common stock and any subsequent changes in their ownership to the Securities and Exchange Commission. Specific due dates have been established by the Commission, and the Company is required to disclose any failure to file by those dates. Based upon the copies of Section 16 (a) reports that the Company received from such persons for their 2011 fiscal year transactions, the Company believes there has been compliance with all Section 16 (a) filing requirements applicable to such officers, directors and ten-percent beneficial owners for such fiscal year.

CODE OF ETHICS

ESW's Board of Directors has adopted a Code of Business Conduct and Ethics which provides a framework for directors, officers and employees on the conduct and ethical decision-making integral to their work. The Audit Committee is responsible for monitoring compliance with this code of ethics and any waivers or amendments thereto can only be made by the Board or a Board committee. The Code of Ethics is available on www.sec.gov as an exhibit with the Company's Form 10KSB filed with the Securities and Exchange Commission on April 3, 2006. The Company can provide a copy of such Code of Ethics, upon receipt of a written request to the attention of the CFO's Office, at ESW Inc., 335 Connie Crescent, Concord, Ontario, Canada, L4K 5R2. The written request should include the Company name, contact person and full mailing address and/or email address of the requestor.

ITEM 11. EXECUTIVE COMPENSATION

The following table sets forth the compensation for each of the last two (2) fiscal years earned by each of the most highly compensated executive officers (the "Named Executives").

SUMMARY COMPENSATION TABLE

NAME / PRINCIPAL POSITION	YEAR	SALARY	BONUS	STOCK AWARDS	OPTION AWARDS (4)	NON-EQUITY	NON-QUALIFIED	ALL OTHER COMPENSATION	TOTAL
						INCENTIVE PLAN COMPENSATION	DEFERRED COMPENSATION EARNINGS		
Praveen Nair (1)	2011	\$145,555	--	--	--	--	--	\$3,647	\$149,202
Chief Financial Officer	2010	\$116,516	--	--	--	--	--	\$7,636	\$124,152
Frank Haas (2)	2011	\$146,307	--	--	--	--	--	\$3,647	\$149,955
Chief Technology Officer & Chief Regulatory Officer	2010	\$87,387	--	--	--	--	--	\$5,073	\$92,460
Virendra Kumar (3)	2011	\$141,542	--	--	--	--	--	\$6,900	\$148,442
Vice President Of Operations	2010	\$112,000	--	--	--	--	--	\$6,900	\$118,900

1. Mr. Praveen Nair was paid at the annual rate of CAD\$150,000 (which translates to USD \$151,620 for the year ended December 31, 2011). In 2010 Mr. Nair received \$145,555 as salary and standard medical and dental benefits provided by the Company totaling \$3,674. 2010 Mr. Nair received \$116,516 as salary, \$3,262 pay in lieu of vacation, and standard medical and dental benefits provided by the Company totaling \$4,374.

2. Mr. Haas will was paid at the annual rate of CAD\$160,000 (which translates to USD \$161,728 for the year ended December 31, 2011). In 2011 Mr. Haas received \$ 146,307.77 as salary and standard medical and dental benefits provided by the Company totaling \$3,674. In 2010 Mr. Haas received \$87,387 as salary, \$699 pay in lieu of vacation, and standard medical and dental benefits provided by the Company totaling \$4,374

3. Mr. Kumar receives an annual salary of \$150,000. In 2011 Mr. Kumar received \$141,542 as salary and standard medical and dental benefits provided by the Company totaling \$6,900. In 2010 Mr. Kumar received \$112,000 as salary and standard medical and dental benefits provided by the Company totaling \$6,900.

4. Represents the cost of the compensation expense recorded by the Company for option grants in 2011.

Contracts and Agreements

On April 19, 2011, the Company's Board of Directors ratified a Services Agreement ("Agreement") between the Company and Orchard Capital Corporation ("Orchard") which was approved by the Company's Compensation Committee. Under the Agreement, which was effective as of January 30, 2011, Orchard agreed to provide services that may be mutually agreed to by and between Orchard and the Company including those duties customarily performed by the Chairman of the Board and executive of the Company as well as providing advice and consultation on general corporate matters and other projects as may be assigned by the Company's Board of Directors as needed. Orchard has agreed to appoint Mark Yung, who is also employed by Orchard, as the Company's Executive Chairman to act on Orchard's behalf and provide the services to the Company under the Agreement. Orchard reserves the right to replace Mr. Yung as the provider of services under the Agreement at its sole option. The Agreement may be terminated by either party upon thirty (30) days written notice unless otherwise provided for under the Agreement. Compensation under the agreement is the sum of \$300,000 per annum plus reimbursement for out-of-pocket expenses incurred by Orchard. The agreement includes other standard terms including indemnification and limitation liability provisions. Orchard is controlled by Richard Ressler; affiliated entities of Orchard as well as Richard Ressler own shares of the Company. Under the agreement the Company has paid \$275,000 for the year ended December 31, 2011.

OUTSTANDING EQUITY AWARDS AT FISCAL YEAR-END

The following table shows certain information regarding the outstanding equity awards held by the Named Executives at the end of 2011.

There were no equity awards granted to named executives in 2010/2011.

STOCK OPTION PLAN

The 2010 Stock Incentive Plan (the "Stock Incentive Plan" or the "Plan") replaces the Company's 2002 Stock Option Plan. While previously granted options under the Company's 2002 Stock Option Plan will remain in effect in accordance with the terms of the individual options, the 2010 Stock Incentive Plan will replace the Company's 2002 Plan for future grants. The Stock Incentive Plan is to be capitalized with 5,000,000 shares. The Stock Incentive Plan authorizes the granting of awards to employees (including officers) of the Company and certain related companies in the form of any combination of (1) options to purchase shares of common stock, (2) stock appreciation rights ("SARs"), (3) shares of restricted common stock ("restricted stock"), (4) shares of deferred common stock ("deferred stock"), (5) bonus stock, and (6) tax-offset payments with respect to any of such awards. The Stock Incentive Plan also authorizes the granting of awards to directors who are not employees or officers of the Company ("Outside Directors") to purchase shares of common stock and related limited SARs and tax-offset payments. The Stock Incentive Plan is administered by a committee of the Company's Board of Directors, which consists of at least two Outside Directors. The Committee has authority to interpret the Stock Incentive Plan, adopt administrative regulations, and determine and amend the terms of awards to employees. The Board of Directors has similar authority with respect to Outside Directors (although the Stock Incentive Plan may also provide for certain automatic grants to Outside Directors). The aggregate number of shares of common stock which may be issued under the Stock Incentive Plan is 5,000,000. Such shares may consist of authorized but unissued shares or treasury shares. The exercise of a SAR for cash or for the settlement of any other award in cash will not count against this share limit. Shares subject to lapsed, forfeited or cancelled awards, including options cancelled upon the exercise of tandem SARs for cash, will not count against this limit and can be re-granted under the Stock Incentive Plan. If the exercise price of an option is paid in common stock or if shares are withheld from payment of an award to satisfy tax obligations with respect to the award, such shares also will not count against the above limit. No employee or Outside Director may be granted tax-offset payments with respect to more than the number of shares of common stock covered by awards held by such employee. The Stock Incentive Plan does not limit awards which may be made under other plans of the Company.

	2010	\$ --	\$ --	\$ --

In 2011, the compensation structure for outside directors was amended; there is no cash compensation for outside directors serving on the board of ESW. The Chairman of the Audit Committee and Compensation Committee receive \$2,500 per month as cash compensation. The each outside directors serving on the board was awarded 150,000 shares of restricted common stock with 50,000 shares vesting on December 31, 2011, 2012 and 2013.

Until April 2011 outside directors were compensated at the rate of \$2,500 a month. The Chairman of the Board of Directors received an additional \$2,000 per month and the Chair of the Audit Committee received an additional \$1,000 per month.

During the fiscal year 2010, outside directors were compensated at the rate of \$2,500 a month. The Chairman of the Board of Directors received an additional \$2,000 per month and the Chair of the Audit Committee received an additional \$1,000 per month.

(1) Represents the cost of the compensation expense recorded by the Company in accordance with FAS123R (ASC 718-10-10). In 2011, compensation expense for restricted stock grants amounted to \$47,000. In 2010 no stock option awards were issued to Outside Directors.

(2) In 2011, Mr. Amersey received \$38,000 in board fees for 2011 and \$15,938 related to outstanding board fees for 2010. Mr. Amersey also received a one-time grant of 200,000 shares of restricted common stock for serving as the Chairman of the Audit Committee and 50,000 shares of restricted common stock for serving as a board member for 2011 under the 2010 Stock Incentive Plan. In 2010 Mr. Amersey received \$19,000 in board fees.

(3) In 2011, Mr. Dunlap received \$30,000 in board fees for 2011 and \$17,500 related to outstanding board fees for 2010. Mr. Dunlap also received a one-time grant of 200,000 shares of restricted common stock for serving as the Chairman of the Compensation Committee and 50,000 shares of restricted common stock for serving as a board member for 2011 under the 2010 Stock Incentive Plan. In 2010 Mr. Dunlap received \$15,000 in board fees.

(4) Represents \$5,000 in board fees for months prior to the amendment of the board compensation structure, this amount was paid out in the form of a stock grant of 41,667 shares of restricted common stock in November 2011. No compensation was paid in 2010.

(5) Represents \$5,000 in board fees for months prior to the amendment of the board compensation structure, this amount was paid out in the form of a stock grant of 41,667 shares of restricted common stock in November 2011 and 50,000 shares of restricted common stock for serving as a board member for 2011 under the 2010 Stock Incentive Plan. No compensation was paid in 2010.

(6) Represents \$5,000 in board fees for months prior to the amendment of the board compensation structure, this amount is included in accrued liabilities at December 31, 2011. No compensation was paid in 2010.

The following table shows certain information regarding the outstanding equity awards (Options to purchase common stock and restricted stock grants) held by the outside directors at the end of 2011.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS, MANAGEMENT AND RELATED STOCKHOLDER MATTERS.

The following table sets forth, to the best knowledge of the Company, as of March 30, 2012, certain information with respect to (1) beneficial owners of more than five percent (5%) of the outstanding Common Stock of the Company, (2) beneficial ownership of shares of the Company's Common Stock by each director and named executive, (3) beneficial ownership of shares of Common Stock of the Company by all directors and officers as a group.

Unless otherwise noted, all shares are beneficially owned and the sole voting and investment power is held by the persons/entities indicated.

Calculations are based upon the aggregate of all shares of Common Stock issued and outstanding as of March 30, 2012 in addition to shares issuable upon exercise of options currently exercisable or becoming exercisable within 60 days and which are held by the individuals named on the table.

(1) On the basis of 219,450,447 shares of common stock outstanding, plus, in the case of any person deemed to own shares of common stock as a result of owning options or rights to purchase common stock or equity grants rights exercisable within 60 days of March 30, 2012.

(2) Includes 41,667 shares of restricted Common Stock.

(3) Includes 250,000 shares of restricted Common Stock and options to purchase 50,000 shares of Common Stock at \$0.27 per share expiring August 6, 2013 also includes stock grants of 100,000 shares of restricted common stock with 50,000 shares vesting each on December 31, 2012 and 2013.

(4) Includes 250,000 shares of restricted Common Stock and options to purchase 300,000 shares of Common Stock at \$0.71 per share expiring February 16, 2012 also includes stock grants of 100,000 shares of restricted common stock with 50,000 shares vesting each on December 31, 2012 and 2013.

(5) Includes 91,667 shares of restricted Common Stock, also includes stock grants of 100,000 shares of restricted common stock with 50,000 shares vesting each on December 31, 2012 and 2013.

(6) Mr. Benjamin Black is a beneficiary of the Leon D. Black Trust UAD 11/30/92 FBO Benjamin Black (the "Benjamin Trust") and the Black Family 1997 Trust (the "1997 Trust"). John J. Hannan is the trustee of the Benjamin Trust and the 1997 Trust and has the sole voting, investment and dispositive power with respect to the shares held by the Benjamin Trust and the 1997 Trust. Mr. Benjamin Black disclaims any beneficial ownership of the shares of Common Stock of the Company held by the Benjamin Trust and the 1997 Trust.

Includes stock grants of 150,000 shares of restricted common stock with 50,000 shares vesting each on December 31, 2011, 2012 and 2013. Also includes option to convert outstanding board fees to 41,667 shares of common stock. No stock has been issued to date against the grants.

(7) Mr. Joshua Black is a beneficiary of the Leon D. Black Trust UAD 11/30/92 FBO Joshua Black (the "Joshua Trust") and the 1997 Trust. John J. Hannan is the trustee of the Joshua Trust and the 1997 Trust and has the sole voting, investment and dispositive power with respect to the shares held by the Joshua Trust and the 1997 Trust. Mr. Joshua Black disclaims any beneficial ownership of the shares of Common Stock of the Company held by the Joshua Trust and the 1997 Trust.

Includes stock grants of 150,000 shares of restricted common stock with 50,000 shares vesting each on December 31, 2011, 2012 and 2013. Also includes option to convert outstanding board fees to 41,667 shares of common stock. No stock has been issued to date against the grants.

(8) Includes 91,667 shares of restricted Common Stock, also includes stock grants of 100,000 shares of restricted common stock with 50,000 shares vesting each on December 31, 2012 and 2013.

(9) Includes 2,225,834 shares of Common Stock directly owned by John J. Hannan, also includes stock grants of 100,000 shares of restricted common stock with 50,000 shares vesting each on December 31, 2012 and 2013.. As the trustee of each of the 1997 Trust, the Leon D. Black Trust UAD 11/30/92 FBO Alexander Black (the "Alexander Trust"), the Leon D. Black Trust UAD 11/30/92 FBO Victoria Black (the "Victoria Trust"), the Benjamin Trust and the Joshua Trust, Mr. Hannan is the beneficial owner of an additional 70,285,195 shares of Common Stock.

(10) Includes 246,050 shares of Common Stock.

(11) Includes 900 shares of Common Stock.

(12) Includes 30,645,399 shares of Common Stock directly beneficially owned by the 1997 Trust. John J. Hannan is the trustee of the 1997 Trust and has the sole voting, investment and dispositive power with respect to the Common Stock shares of the Company held by the 1997 Trust.

(13) Includes 12,622,980 shares of Common Stock directly owned by Mr. Leon Black.

(14) Includes 9,909,949 shares of Common Stock directly beneficially owned by the Alexander Trust. John J. Hannan is the trustee of the Alexander Trust and has the sole voting, investment and dispositive power with respect to the Common Stock shares of the Company held by the Alexander Trust.

(15) Includes 9,909,949 shares of Common Stock directly beneficially owned by the Benjamin Trust. John J. Hannan is the trustee of the Benjamin Trust and has the sole voting, investment and dispositive power with respect to the Common Stock shares of the Company held by the Benjamin Trust.

(16) Includes 9,909,949 shares of Common Stock directly beneficially owned by the Joshua Trust. John J. Hannan is the trustee of the Joshua Trust and has the sole voting, investment and dispositive power with respect to the Common Stock shares of the Company held by the Joshua Trust.

(17) Includes 9,909,949 shares of Common Stock directly beneficially owned by the Victoria Trust. John J. Hannan is the trustee of the Victoria Trust and has the sole voting, investment and dispositive power with respect to the Common Stock shares of the Company held by the Victoria Trust.

(18) Includes 2,134,167 shares of Common Stock directly owned by Richard S. Ressler. Richard Ressler is the President of Orchard Capital Corporation, the Manager of Orchard Investments LLC.

(19) Includes 16,695,551 shares of Common Stock directly owned by Orchard Investments, LLC ("Orchard").

(20) The aggregate amount of Common Stock beneficially owned by Mr. Bengt Odner, a former director of ESW, is represented by 1,412,205 shares of Common Stock and 350,000 shares of Common Stock underlying stock options that may be exercised. In addition to the direct ownership listed herein, Mr. Odner has indirect beneficial ownership by way of Sedam Limited (supra). Sedam Limited, a corporation organized under the laws of Cyprus, is controlled by a trust, of which Mr. Bengt Odner is the sole beneficiary. Sedam Limited includes 34,587,795 shares.

(21) Includes 13,350,205 shares of Common Stock directly owned by Financial Trust Co. Inc.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

During the twelve month period ended December 31, 2011, in addition to fees and salaries as well as reimbursement of business expenses, any one transaction or combination attributed to one individual or entity exceeding \$120,000 on an annual basis has been disclosed as follows:

- \$4,000,000 issuance of unsecured subordinated promissory notes (see Note 7 to the consolidated financial statements).
- Investment agreement with Bridge lenders Effective May 10, 2011, (see Note 7 to the consolidated financial statements).
- The effect of an exchange feature included in the terms of the Share Subscription Agreement for \$3,000,000 of Convertible Debentures issued on March 19, 2010 ("2010 Debentures") and fully converted including interest into 6,007,595 shares of common stock on March 25, 2010. The exchange feature provides that if within twelve months from March 19, 2010, the Company entered into or closed another financing or other transaction (which for securities law purposes would be integrable with the offer and sale of the Securities) on terms and conditions more favorable to another purchaser, the terms and conditions of the 2010 Debentures shall be adjusted to reflect the more favorable terms. The exchange feature was determined by the Company to be freestanding financial instrument and also to be a liability within the scope of ASC 480 Distinguishing Liabilities from Equity since there is an inverse relationship between the stock price of the Company and the Company's obligation. On December 31, 2010, the Company evaluated the fair value of the exchange feature based on the probability of closing another financing by March 18, 2011 and the fair value of the number of incremental shares to be issued at a lower estimated issue price. The probability of closing another financing by March 18, 2011 was estimated to be 100% on December 31, 2010. The fair value of the Company's common stock was determined by the closing price on the valuation date. On December 31, 2010, an exchange feature liability of \$1,680,000 was recorded for the 2010 Debentures (see Note 12). Effective February 17, 2011, the Company and the 2010 Debenture investors reached an agreement whereby the investors will receive an approximate aggregate of 19,000,000 additional shares of Common Stock in conjunction with certain rights under the Prior Subscription Agreements in the event the Company closed a qualified offering (see Note 7). At March 31, 2011 the exchange feature liability related to the convertible debentures was re-valued to \$2,280,000 with the change in fair value of exchange feature liability of \$578,738 expense recorded in the consolidated statements of operations and comprehensive loss. In March 2010, Orchard invested \$1 million in the \$3 million convertible debentures offering; of the exchange feature liability \$760,000 was attributed to the investment made by Orchard based on their relative contribution to the March 2010 subscription, this amount was transferred to equity as of June 30, 2011. Orchard received 6,333,333 additional shares of Common Stock in conjunction with certain rights under the Prior Subscription Agreements as the Company closed its Qualified Offering on June 30, 2011 (see Note 7).

- \$275,000 related to services provided by Orchard Capital Corporation under a services agreement effective January 30, 2011. On April 19, 2011, the Company's Board of Directors ratified a Services Agreement ("Agreement") between the Company and Orchard Capital Corporation ("Orchard") which was approved by the Company's Compensation Committee. Under the Agreement, which was effective as of January 30, 2011, Orchard agreed to provide services that may be mutually agreed to by and between Orchard and the Company including those duties customarily performed by the Chairman of the Board and executive of the Company as well as providing advice and consultation on general corporate matters and other projects as may be assigned by the Company's Board of Directors as needed. Orchard has agreed to appoint Mark Yung, who is also employed by Orchard, as the Company's Executive Chairman to act on Orchard's behalf and provide the services to the Company under the Agreement. Orchard reserves the right to replace Mr. Yung as the provider of services under the Agreement at its sole option. The Agreement may be terminated by either party upon thirty (30) days written notice unless otherwise provided for under the Agreement. Compensation under the agreement is the sum of \$300,000 per annum plus reimbursement for out-of-pocket expenses incurred by Orchard. The agreement includes other standard terms including indemnification and limitation liability provisions. Orchard is controlled by Richard Ressler; affiliated entities of Orchard as well as Richard Ressler own shares of the Company.

- Mr. Nitin Amersey who is a director of the Company is listed as a control person with the Securities and Exchange Commission of Bay City Transfer Agency Registrar Inc., the Company's transfer agent. He has no ownership equity in Bay City Transfer Agency Registrar Inc. nor is he an officer or a director of Bay City Transfer Agency Registrar Inc. For the twelve month periods ended December 31, 2011 and 2010, the Company paid Bay City Transfer Agency Registrar Inc. \$18,054 and \$7,363 respectively.

For the year ended December 31, 2011 and 2010, Mr. Nitin Amersey received \$0 and \$25,500 for consulting services to the company.

Mr. Peter Bloch a prior director of the Company provided consulting services to the Company. For the year ended December 31, 2011 and 2010, the Company paid Mr. Bloch \$88,796 and \$112,104 for consulting services.

During the twelve month period ended December 31, 2010 additional transactions with related parties included \$6,134,024 related to conversion of convertible debentures including interest of \$634,024 thereon into common stock; \$1,032,849 related to inducement on early conversion of convertible debentures; and the repayment of \$511,342 principal and interest on promissory note in addition to salaries and reimbursement of business expenses.

ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES

AUDIT FEES:

The Company paid its principal accountant MSCM LLP, \$25,181 to date in audit fees for the audit of the Company's annual financial statements for 2011.

The Company paid its principal accountant MSCM LLP \$47,401 in audit fees for review of the financial statements included in its Form 10-QSB for the three quarterly reports in 2011.

The Company paid its principal accountant MSCM LLP, \$ 78,636 to date in audit fees for the audit of the Company's annual financial statements for 2010.

The Company paid its principal accountant MSCM LLP \$47,468 in audit fees for review of the financial statements included in its Form 10-QSB for the three quarterly reports in 2010

TAX AND OTHER FEES:

The Company paid its principal accountant MSCM LLP \$0 and \$16,814 for tax / compliance and other services for 2011.

The Company paid its principal accountant MSCM LLP \$0 and \$0 for tax /compliance and other services for 2010.

EXHIBIT 31.1

**CERTIFICATION PURSUANT TO SECTION 302 OF
THE SARBANES-OXLEY ACT OF 2002**

I, Mark Yung, certify that:

1. I have reviewed this annual report on Form 10-K of Environmental Solutions Worldwide, Inc;
2. Based on my knowledge, this annual report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this annual report;
4. The registrant's other certifying Officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15(d)-15(f) for the Registrant and we have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the Registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this annual report is being prepared;
 - b) Designed such internal control over financial reporting or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance the generally accepted accounting principles;
 - c) Evaluated the effectiveness of the Registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures as of the end of the period covered by this report based on such evaluation; and
 - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's fourth fiscal quarter of 2011 that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officers and I have disclosed, based on our most recent evaluation, to the registrant's auditors and the audit committee of the registrant's Board of Directors (or persons performing the equivalent function):
 - a) All significant deficiencies in the design or operation of internal controls which could adversely affect the registrant's ability to record, process, summarize and report financial data and have identified for the registrant's auditors any material weaknesses in internal controls; and
 - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal controls; and
6. The registrant's other certifying officers and I have indicated in this annual report whether or not there were significant changes in internal controls or in other factors that could significantly affect internal controls subsequent to the date of our most recent evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.

**CERTIFICATION PURSUANT TO SECTION 302 OF
THE SARBANES-OXLEY ACT OF 2002**

I, Praveen Nair, certify that:

1. I have reviewed this annual report on Form 10-K of Environmental Solutions Worldwide, Inc;
2. Based on my knowledge, this annual report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this annual report;
3. Based on my knowledge, the financial statements, and other financial information included in this annual report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this annual report;
4. The registrant's other certifying Officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15(d)-15(f) for the Registrant and we have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the Registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this annual report is being prepared;
 - b) Designed such internal control over financial reporting or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance the generally accepted accounting principles;
 - c) Evaluated the effectiveness of the Registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures as of the end of the period covered by this report based on such evaluation; and
 - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's fourth fiscal quarter of 2011 that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officers and I have disclosed, based on our most recent evaluation, to the registrant's auditors and the audit committee of the registrant's Board of Directors (or persons performing the equivalent function):
 - a) All significant deficiencies in the design or operation of internal controls which could adversely affect the registrant's ability to record, process, summarize and report financial data and have identified for the registrant's auditors any material weaknesses in internal controls; and
 - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal controls; and
6. The registrant's other certifying officers and I have indicated in this annual report whether or not there were significant changes in internal controls or in other factors that could significantly affect internal controls subsequent to the date of our most recent evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.
